Abstracts

C-C Chemokine Receptor Type 5 (CHEMR13 or HIV 1 Fusion Coreceptor or CD195 or CCR5) - Pipeline Review, H2 2018

SUMMARY

According to the recently published report 'C-C Chemokine Receptor Type 5 - Pipeline Review, H2 2018'; C-C Chemokine Receptor Type 5 (CHEMR13 or HIV 1 Fusion Coreceptor or CD195 or CCR5) pipeline Target constitutes close to 10 molecules. Out of which approximately 7 molecules are developed by companies and remaining by the universities/institutes.

C-C Chemokine Receptor Type 5 (CHEMR13 or HIV 1 Fusion Coreceptor or CD195 or CCR5) - C-C chemokine receptor type 5 (CCR5) also known as CD195, is a surface protein located on the plasma membrane of white blood cells and is encoded by CCR5 gene. This receptor binds and responds to a variety of chemokines (CCL3, CCL4, CCL5, CCL3L1). This protein is expressed by T cells and macrophages, and is known to be an important co-receptor for macrophage-tropic virus, including HIV, to enter host cells. It plays a role in granulocyte lineage proliferation and differentiation.

The report 'C-C Chemokine Receptor Type 5 - Pipeline Review, H2 2018' outlays comprehensive information on the C-C Chemokine Receptor Type 5 (CHEMR13 or HIV 1 Fusion Coreceptor or CD195 or CCR5) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type; that are being developed by Companies/Universities.

It also reviews key players involved in C-C Chemokine Receptor Type 5 (CHEMR13 or HIV 1 Fusion Coreceptor or CD195 or CCR5) targeted therapeutics development with respective active and dormant or discontinued projects. Currently, The molecules developed by companies in Phase III, Phase II, Phase I and Preclinical stages are 2, 1, 1 and 3 respectively.

Similarly, the universities portfolio in Preclinical stages comprises 3 molecules, respectively. Report covers products from therapy areas Infectious Disease, Oncology, Gastrointestinal and Immunology which include indications Human Immunodeficiency Virus (HIV) Infections (AIDS), Graft Versus Host Disease (GVHD), Liver Fibrosis, Metastatic Colorectal Cancer, Metastatic Pancreatic Cancer, Non-Alcoholic Steatohepatitis (NASH), Pancreatic Ductal Adenocarcinoma and Primary Sclerosing Cholangitis.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for C-C Chemokine Receptor Type 5 (CHEMR13 or HIV 1 Fusion Coreceptor or CD195 or CCR5)

The report reviews C-C Chemokine Receptor Type 5 (CHEMR13 or HIV 1 Fusion Coreceptor or CD195 or CCR5) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in C-C Chemokine Receptor Type 5 (CHEMR13 or HIV 1 Fusion Coreceptor or CD195 or CCR5) targeted therapeutics and enlists all their major and minor projects

The report assesses C-C Chemokine Receptor Type 5 (CHEMR13 or HIV 1 Fusion Coreceptor or CD195 or CCR5) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to C-C Chemokine Receptor Type 5 (CHEMR13 or HIV 1 Fusion Coreceptor or CD195 or CCR5) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for C-C Chemokine Receptor Type 5 (CHEMR13 or HIV 1 Fusion Coreceptor or CD195 or CCR5)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding C-C Chemokine Receptor Type 5 (CHEMR13 or HIV 1 Fusion Coreceptor or CD195 or CCR5) development landscape

Develop and design in-licensing and out-licensing strategies by identifying

prospective partners with the most attractive projects to enhance and expand business potential and scope

Contents

Introduction

Global Markets Direct Report Coverage

C-C Chemokine Receptor Type 5 (CHEMR13 or HIV 1 Fusion Coreceptor or CD195 or CCR5) - Overview

C-C Chemokine Receptor Type 5 (CHEMR13 or HIV 1 Fusion Coreceptor or CD195 or CCR5) - Therapeutics Development

Products under Development by Stage of Development

Products under Development by Therapy Area

Products under Development by Indication

Products under Development by Companies

Products under Development by Universities/Institutes

C-C Chemokine Receptor Type 5 (CHEMR13 or HIV 1 Fusion Coreceptor or CD195 or CCR5) - Therapeutics Assessment

Assessment by Mechanism of Action

Assessment by Route of Administration

Assessment by Molecule Type

C-C Chemokine Receptor Type 5 (CHEMR13 or HIV 1 Fusion Coreceptor or CD195 or CCR5) - Companies Involved in Therapeutics Development

Allergan Plc

American Gene Technologies International Inc

Auritec Pharmaceuticals Inc

Bristol-Myers Squibb Co

Cytodyn Inc

GlaxoSmithKline Plc

C-C Chemokine Receptor Type 5 (CHEMR13 or HIV 1 Fusion Coreceptor or CD195 or CCR5) - Drug Profiles
