Abstracts

Calcitonin Gene Related Peptide - Drugs In Development, 2021

SUMMARY

Calcitonin Gene Related Peptide (CGRP) pipeline Target constitutes close to 11 molecules. Out of which approximately 10 molecules are developed by companies and remaining by the universities/institutes. The latest report Calcitonin Gene Related Peptide - Drugs In Development, 2021, outlays comprehensive information on the Calcitonin Gene Related Peptide (CGRP) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type.

Calcitonin Gene Related Peptide (CGRP) - Calcitonin gene related peptide (CGRP) is a member of the calcitonin family of peptides. It exists in two forms alpha-CGRP and beta-CGRP. CGRP is produced in both peripheral and central neurons. CGRP is derived mainly from the cell bodies of motor neurons when synthesized in the ventral horn of the spinal cord and contribute to the regeneration of nervous tissue after injury. CGRP is derived from dorsal root ganglion when synthesized in the dorsal horn of the spinal cord and linked to the transmission of pain. CGRP also plays an important role in cardiovascular homeostasis and nociception. The molecules developed by companies in Pre-Registration, Filing rejected/Withdrawn, Phase III, Preclinical and Discovery stages are 1, 1, 1, 5 and 2 respectively. Similarly, the universities portfolio in Preclinical stages comprises 1 molecules, respectively. Report covers products from therapy areas Central Nervous System, Immunology, Oncology and Undisclosed which include indications Migraine, Cluster Headache Syndrome (Cluster Headache), Dental Pain (Toothache/Tooth Pain), Fibromyalgia (Fibromyalgia Syndrome), Inflammatory Pain,

Medullary Thyroid Cancer, Osteoarthritis Pain, Pain, Psoriasis and Unspecified.

Furthermore, this report also reviews key players involved in Calcitonin Gene Related Peptide (CGRP) targeted therapeutics development with respective active and dormant or discontinued projects. Driven by data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Calcitonin Gene Related Peptide (CGRP)

The report reviews Calcitonin Gene Related Peptide (CGRP) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Calcitonin Gene Related Peptide (CGRP) targeted therapeutics and enlists all their major and minor projects

The report assesses Calcitonin Gene Related Peptide (CGRP) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Calcitonin Gene Related

Peptide (CGRP) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Calcitonin Gene Related Peptide (CGRP) Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Calcitonin Gene Related Peptide (CGRP) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Featured News & Press Releases

Jun 23, 2021: Teva announces Ministry of Health, Labour and Welfare approves AJOVY (fremanezumab) Injection in Japan for the preventive treatment of Migraine in

Adults

Jun 21, 2021: New data supporting the safety and efficacy profile of AJOVY

(fremanezumab) shared at 7th European Academy of Neurology Congress

Jun 16, 2021: Lilly plans head-to-head study of Emgality to prevent migraine

Jun 16, 2021: Lilly plans head-to-head study of Emgality to prevent migraine

Jun 15, 2021: The Journal of the American Medical Association publishes data on efficacy and safety of preventive migraine treatment VYEPTI (eptinezumab-jjmr) when administered during an active migraine attack

Jun 03, 2021: Teva to present latest data on AJOVY (fremanezumab-vfrm) Injection at the 2021 American Headache Society (AHS) Annual Meeting, showcasing Teva's longstanding heritage in the management of Migraine

Jun 03, 2021: Lilly reveals real-world evidence data of Emgality at AHS 2021

Jun 03, 2021: New Clinical and Real-World Data evaluating efficacy of AJOVY (fremanezumab-vfrm) Injection presented at 2021 American Headache Society (AHS) Annual Meeting

Jun 03, 2021: Lundbeck to showcase new VYEPTI (eptinezumab-jjmr) data at 63rd Annual Scientific Meeting of the American Headache Society (AHS)

Apr 19, 2021: New data presented at 2021 American Academy of Neurology (AAN) Annual Meeting Shows VYEPTI (eptinezumab-jjmr) demonstrated earlier time to freedom from headache pain and absence of most bothersome symptoms compared to placebo

Apr 19, 2021: New clinical and real-world data evaluating efficacy of AJOVY (fremanezumab-vfrm) injection and reduction of migraine burden presented at 2021 American Academy of Neurology Virtual Annual Meeting

Apr 15, 2021: Teva to present new analyses of AJOVY (fremanezumab-vfrm) Injection at Upcoming 2021 American Academy of Neurology Virtual Annual Meeting, highlighting Teva's ongoing commitment to neurology

Apr 08, 2021: Teva Canada announces new autoinjector for AJOVY for the preventive treatment of migraine in adults

Feb 26, 2021: New study published in Cephalalgia identifies mechanistic differences among CGRP migraine treatments

Feb 25, 2021: Emgality (galcanezumab) now approved for use in Canada for the treatment of episodic cluster headache
