Abstracts

Celiac Disease - Pipeline Review, H1 2020

SUMMARY

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Celiac Disease - Pipeline Review, H1 2020, provides an overview of the Celiac Disease (Gastrointestinal) pipeline landscape.

Celiac disease is an autoimmune disorder caused by an immune response to wheat protein gluten. Symptoms include weight loss, vomiting, abdominal bloating, abdominal pain and persistent diarrhea. Risk factors include lupus, rheumatoid arthritis, type 1 diabetes, autoimmune liver disease, Sjogren's syndrome and Turner syndrome. Treatment includes steroids such as betamethasone and prednisolone. Further the treatment regime also involves adhering to strict gluten free diet.

REPORT HIGHLIGHTS

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Celiac Disease - Pipeline Review, H1 2020, provides comprehensive information on the therapeutics under development for Celiac Disease (Gastrointestinal), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Celiac Disease (Gastrointestinal) pipeline guide also reviews of key players involved in therapeutic development for Celiac Disease and features dormant and discontinued projects. The guide covers therapeutics under Development by

Companies/Universities/Institutes, the molecules developed by Companies in Phase III, Phase II, Phase I, IND/CTA Filed, Preclinical and Discovery stages are 1, 4, 4, 1, 4 and 7 respectively. Similarly, the Universities portfolio in Phase I stages comprises 1 molecule, respectively.

Celiac Disease (Gastrointestinal) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The pipeline guide provides a snapshot of the global therapeutic landscape of Celiac Disease (Gastrointestinal).

The pipeline guide reviews pipeline therapeutics for Celiac Disease (Gastrointestinal) by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Celiac Disease (Gastrointestinal) therapeutics and enlists all their major and minor projects.

The pipeline guide evaluates Celiac Disease (Gastrointestinal) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA)

and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Celiac Disease (Gastrointestinal)

REASONS TO BUY

Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

Find and recognize significant and varied types of therapeutics under development for Celiac Disease (Gastrointestinal).

Classify potential new clients or partners in the target demographic.

Develop tactical initiatives by understanding the focus areas of leading companies.

Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.

Formulate corrective measures for pipeline projects by understanding Celiac Disease (Gastrointestinal) pipeline depth and focus of Indication therapeutics.

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope.

Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.

Featured News & Press Releases

Feb 27, 2020: Anokion announces initiation of patient dosing in Phase 1 clinical trial of KAN-101 in celiac disease

Feb 19, 2020: Innovate Biopharmaceuticals announces acceptance of three abstracts for the 2020 Digestive Disease Week (DDW) conference

Feb 14, 2020: ImmunogenX starts enrolment in Phase IIb celiac disease study

Jan 21, 2020: Anokion announces FDA clearance of IND application for its lead program in celiac disease

Oct 22, 2019: Takeda Pharmaceutical: New treatment may reverse celiac disease

Aug 19, 2019: ActoBio Therapeutics receives IND green light for new antigen-specific immunotherapy study aimed at improving celiac patients tolerance of gluten

Aug 13, 2019: Innovate Biopharmaceuticals announces first patient dosed in the first phase 3 clinical trial for patients with celiac disease

Jul 15, 2019: Innovate Biopharmaceuticals announces corporate update and expected date for second quarter earnings release

Jun 25, 2019: ImmusanT discontinues phase 2 clinical trial for Nexvax2 in patients with celiac disease

Jun 24, 2019: Innovate Biopharmaceuticals expands its management team with the addition of Ed Sitar as Its Chief Financial Officer

Jun 10, 2019: Innovate Biopharmaceuticals announces the start of the first phase 3 clinical trial in Celiac Disease

May 21, 2019: ImmusanT presents early evidence supporting its lead therapeutic vaccine candidate during the Digestive Disease Week Annual Conference 2019

Apr 09, 2019: ImmunogenX receives major grant from the National Institutes of Health (NIH) to conduct a clinical trial for Latiglutenase

Apr 02, 2019: Innovate Biopharmaceuticals to announce first quarter 2019 financial results and to provide operational progress updates on April 29, 2019

Mar 21, 2019: ImmusanT to present and participate in multiple upcoming industry and

scientific conferences
