## SCOPE

The pipeline guide provides a snapshot of the global therapeutic landscape of Chemotherapy Induced Nausea and Vomiting (Toxicology).

The pipeline guide reviews pipeline therapeutics for Chemotherapy Induced Nausea and Vomiting (Toxicology) by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Chemotherapy Induced Nausea and Vomiting (Toxicology) therapeutics and enlists all their major and

minor projects.

The pipeline guide evaluates Chemotherapy Induced Nausea and Vomiting (Toxicology) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Chemotherapy Induced Nausea and Vomiting (Toxicology)

## **REASONS TO BUY**

Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

Find and recognize significant and varied types of therapeutics under development for Chemotherapy Induced Nausea and Vomiting (Toxicology).

Classify potential new clients or partners in the target demographic.

Develop tactical initiatives by understanding the focus areas of leading companies.

Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.

Formulate corrective measures for pipeline projects by understanding Chemotherapy Induced Nausea and Vomiting (Toxicology) pipeline depth and focus of Indication therapeutics.

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope.

Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.
