Cholesteryl Ester Transfer Protein (Lipid Transfer Protein I or CETP) Drugs in Development by Therapy Areas and Indications, Stages, MoA, RoA, Molecule Type and Key Players, 2022 Update

SUMMARY

Cholesteryl Ester Transfer Protein (Lipid Transfer Protein I or CETP) pipeline Target constitutes close to 6 molecules. Out of which approximately 4 molecules are developed by companies and remaining by the universities/institutes. The latest report Cholesteryl Ester Transfer Protein – Drugs In Development, 2022, outlays comprehensive information on the Cholesteryl Ester Transfer Protein (Lipid Transfer Protein I or CETP) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type.

Cholesteryl Ester Transfer Protein (Lipid Transfer Protein I or CETP) – Cholesteryl ester transfer protein (CETP), also called plasma lipid transfer protein is a plasma protein that promotes the transfer of cholesteryl esters from anti-atherogenic HDLs to proatherogenic apolipoprotein B (apoB)-containing lipoproteins, including VLDLs, VLDL remnants, IDLs, and LDLs. A deficiency of CETP is associated with increased HDL levels and decreased LDL levels, a profile that is typically anti-atherogenic. The molecules developed by companies in Phase III, Phase I and Preclinical stages are 2, 1 and 1 respectively. Similarly, the universities portfolio in Preclinical stages comprises 2 molecules, respectively. Report covers products from therapy areas Cardiovascular,

Metabolic Disorders, Central Nervous System and Infectious Disease which include indications Dyslipidemia, Acute Coronary Syndrome, Alzheimer's Disease, Atherosclerosis, Cardiovascular Disease, Coronavirus Disease 2019 (COVID-19), Diabetes, Heterozygous familial hypercholesterolemia (heFH) and Hypercholesterolemia.

Furthermore, this report also reviews key players involved in Cholesteryl Ester Transfer Protein (Lipid Transfer Protein I or CETP) targeted therapeutics development with respective active and dormant or discontinued projects. Driven by data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

Note: Certain content / sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Cholesteryl Ester Transfer Protein (Lipid Transfer Protein I or CETP)

The report reviews Cholesteryl Ester Transfer Protein (Lipid Transfer Protein I or CETP) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Cholesteryl Ester Transfer Protein (Lipid Transfer Protein I or CETP) targeted therapeutics and enlists all their major and minor projects

The report assesses Cholesteryl Ester Transfer Protein (Lipid Transfer Protein I or CETP) targeted therapeutics based on mechanism of action (MoA), route of

administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Cholesteryl Ester Transfer Protein (Lipid Transfer Protein I or CETP) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Cholesteryl Ester Transfer Protein (Lipid Transfer Protein I or CETP)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Cholesteryl Ester Transfer Protein (Lipid Transfer Protein I or CETP) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope
