Abstracts

Diabetic Neuropathy Drugs in Development by Stages, Target, MoA, RoA, Molecule Type and Key Players, 2022 Update

SUMMARY

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Diabetic Neuropathy - Drugs In Development, 2022, provides an overview of the Diabetic Neuropathy (Metabolic Disorders) pipeline landscape.

Diabetic neuropathy, a common complication of diabetes, is damage to the nerves that allow feeling things such as pain. Symptoms include tingling, numbness, burning and pain. The predisposing factors are obesity, hypertension, high lipid and sugar levels, smoking, etc. It may be managed by medication and dietary modification.

REPORT HIGHLIGHTS

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Diabetic Neuropathy - Drugs In Development, 2022, provides comprehensive information on the therapeutics under development for Diabetic Neuropathy (Metabolic Disorders), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Diabetic Neuropathy (Metabolic Disorders) pipeline guide also reviews of key

players involved in therapeutic development for Diabetic Neuropathy and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies/Universities/Institutes, the molecules developed by Companies in Phase III, Phase II, Phase I, Preclinical and Discovery stages are 1, 8, 7, 18 and 6 respectively. Similarly, the Universities portfolio in Preclinical stages comprises 1 molecules, respectively.

Diabetic Neuropathy (Metabolic Disorders) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The pipeline guide provides a snapshot of the global therapeutic landscape of Diabetic Neuropathy (Metabolic Disorders).

The pipeline guide reviews pipeline therapeutics for Diabetic Neuropathy (Metabolic Disorders) by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Diabetic Neuropathy (Metabolic Disorders) therapeutics and enlists all their major and minor projects.

The pipeline guide evaluates Diabetic Neuropathy (Metabolic Disorders) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Diabetic Neuropathy (Metabolic Disorders)

REASONS TO BUY

Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

Find and recognize significant and varied types of therapeutics under development for Diabetic Neuropathy (Metabolic Disorders).

Classify potential new clients or partners in the target demographic.

Develop tactical initiatives by understanding the focus areas of leading companies.

Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.

Formulate corrective measures for pipeline projects by understanding Diabetic Neuropathy (Metabolic Disorders) pipeline depth and focus of Indication therapeutics.

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope.

Adjust the therapeutic portfolio by recognizing discontinued projects and

understand from the know-how what drove them from pipeline.

Featured News & Press Releases

Aug 02, 2021: Innovative drug HSK16149 capsule was approved to carry out phase II clinical trial of 'auxiliary opioid analgesia'

Jun 02, 2021: Innovative drug HSK16149 capsule new indications obtained IND application 'Notice of Acceptance'

May 13, 2021: Pure Green Pharmaceuticals reports unexpected results of a randomized, placebo controlled clinical trial with sublingual CBD in patients with painful diabetic peripheral neuropathy

Apr 01, 2021: Celon Pharma announces CPL'280, second generation oral GPR40 agonist, meets primary endpoint in phase 1 trial

Jan 25, 2021: Sonnet BioTherapeutics announces the successful completion of a non-human primate toxicology study of SON-080

Sep 30, 2020: Praetego receives NIH phase 2 STTR funding to advance novel

amadorin drug candidates for diabetic peripheral neuropathy

Apr 12, 2019: "SYHA1402" for the treatment of diabetic neuropathy was granted clinical trial approval

Jun 01, 2018: Reata Selected to Present on its Early-Stage Program RTA 901 at the BIO International Convention

Mar 16, 2018: Reata to Present on its Diabetic Neuropathy Drug Candidate RTA-901 at the BIO Asia International Conference

Aug 02, 2017: Neuralstem Awarded \$~1MM Grant by NIH to Continue Preclinical Research into the Potential of NSI-189 for Treatment of Diabetic Neuropathy

Sep 04, 2016: Salvianolic acid A tablets developed by the National Drug Screening Center received clinical approval
