Dyslipidemia Drugs in Development by Stages, Target, MoA, RoA, Molecule Type and Key Players, 2022 Update

SUMMARY

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Dyslipidemia - Drugs In Development, 2022, provides an overview of the Dyslipidemia (Metabolic Disorders) pipeline landscape.

Dyslipidemia is defined as elevation of the total cholesterol, the 'bad' low-density lipoprotein (LDL) cholesterol and the triglyceride concentrations, and a decrease in the 'good' high-density lipoprotein (HDL) cholesterol concentration in the blood. Numerous factors and causes can lead to an abnormality in the levels of lipids in the blood such as genetic predisposition, diet, age and gender, type II diabetes. Common symptoms that may be encountered in relation to dyslipidemia include corneal opacification, corneal arcus, xanthomas, balance impairment, pain in the calf when walking, dizziness and confusion.

REPORT HIGHLIGHTS

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Dyslipidemia - Drugs In Development, 2022, provides comprehensive information on the therapeutics under development for Dyslipidemia (Metabolic Disorders), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive

pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Dyslipidemia (Metabolic Disorders) pipeline guide also reviews of key players involved in therapeutic development for Dyslipidemia and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies/Universities/Institutes, the molecules developed by Companies in Pre-Registration, Phase III, Phase II, Phase I, IND/CTA Filed, Preclinical, Discovery and Unknown stages are 11, 34, 21, 27, 3, 38, 16 and 3 respectively. Similarly, the Universities portfolio in Phase I, Preclinical and Discovery stages comprises 1, 14 and 4 molecules, respectively.

Dyslipidemia (Metabolic Disorders) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The pipeline guide provides a snapshot of the global therapeutic landscape of Dyslipidemia (Metabolic Disorders).

The pipeline guide reviews pipeline therapeutics for Dyslipidemia (Metabolic Disorders) by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration

details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Dyslipidemia (Metabolic Disorders) therapeutics and enlists all their major and minor projects.

The pipeline guide evaluates Dyslipidemia (Metabolic Disorders) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Dyslipidemia (Metabolic Disorders)

REASONS TO BUY

Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

Find and recognize significant and varied types of therapeutics under development for Dyslipidemia (Metabolic Disorders).

Classify potential new clients or partners in the target demographic.

Develop tactical initiatives by understanding the focus areas of leading companies.

Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.

Formulate corrective measures for pipeline projects by understanding Dyslipidemia (Metabolic Disorders) pipeline depth and focus of Indication therapeutics.

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope.

Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.

Featured News & Press Releases

Feb 25, 2022: Arrowhead concludes enrolment in Phase IIb mixed dyslipidemia trial

Dec 22, 2021: Akeso: Early completion of patient enrollment of Ebronucimab (PCSK9 monoclonal antibody, AK102) in a phase III clinical trial for primary hypercholesterolemia and mixed hyperlipidemia in China

Nov 15, 2021: Arrowhead presents new clinical data on ARO-APOC3 at AHA 2021

Nov 15, 2021: NewAmsterdam Pharma reports positive data in Phase II dyslipidemia trial

Nov 03, 2021: Ionis begins clinical trial of severe hypertriglyceridemia medicine

Nov 02, 2021: Rivus reports positive data from trial of cardiometabolic disease therapy

Sep 30, 2021: Arrowhead Pharmaceuticals initiates phase 2b study of ARO-APOC3 for treatment of mixed dyslipidemia

Jul 28, 2021: NewAmsterdam Pharma reports positive results from phase 2 study of Oral Obicetrapib demonstrating over 50% LDL-lowering as an adjunct to high-intensity statins

Jul 06, 2021: Novartis announces complete response resubmission for inclisiran new drug application

Jun 30, 2021: Arrowhead Pharmaceuticals initiates phase 2b study of investigational

ARO-ANG3 for treatment of mixed dyslipidemia

Jun 03, 2021: Arrowhead Pharmaceuticals initiates phase 2b study of investigational

ARO-APOC3 for treatment of severe hypertriglyceridemia

May 16, 2021: tctMD: Evinacumab lowers triglycerides in severe hypertriglyceridemia

Mar 22, 2021: JW Pharmaceutical: Proving the effect of improving lipids as a result of phase 3 clinical trial of RivaroJet 'NDA application'

Mar 01, 2021: Arrowhead Pharmaceuticals files IND to begin phase 2b study of ARO-APOC3 in patients with severe hypertriglyceridemia

Feb 01, 2021: Matinas BioPharma announces topline results from ENHANCE-IT study of LYPDISO against Vascepa
