Abstracts

Eosinophilic Esophagitis Drugs in Development by Stages, Target, MoA, RoA, Molecule Type and Key Players, 2022 Update

SUMMARY

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Eosinophilic Esophagitis - Drugs In Development, 2022, provides an overview of the Eosinophilic Esophagitis (Gastrointestinal) pipeline landscape.

Eosinophilic esophagitis is disease characterized by the presence of a large number of a special type of white blood cell, the eosinophil that can cause inflammation in the esophagus. Symptoms include poor weight gain, abdominal pain, nausea, and vomiting, coughing, heartburn and chest pain. Risk factors include weakened immune system, chemotherapy, aspirin and anti-inflammatory medications, chronic vomiting, obesity and alcohol and cigarette use. Treatment includes antiviral, antifungal and pain relievers.

REPORT HIGHLIGHTS

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Eosinophilic Esophagitis - Drugs In Development, 2022, provides comprehensive information on the therapeutics under development for Eosinophilic Esophagitis (Gastrointestinal), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Eosinophilic Esophagitis (Gastrointestinal) pipeline guide also reviews of key players involved in therapeutic development for Eosinophilic Esophagitis and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies/Universities/Institutes, the molecules developed by Companies in Phase III, Phase II, Phase I, IND/CTA Filed, Preclinical, Discovery and Unknown stages are 5, 4, 4, 1, 9, 2 and 1 respectively. Similarly, the Universities portfolio in Preclinical stages comprises 1 molecules, respectively.

Eosinophilic Esophagitis (Gastrointestinal) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The pipeline guide provides a snapshot of the global therapeutic landscape of Eosinophilic Esophagitis (Gastrointestinal).

The pipeline guide reviews pipeline therapeutics for Eosinophilic Esophagitis (Gastrointestinal) by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Eosinophilic Esophagitis

(Gastrointestinal) therapeutics and enlists all their major and minor projects.

The pipeline guide evaluates Eosinophilic Esophagitis (Gastrointestinal) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Eosinophilic Esophagitis (Gastrointestinal)

REASONS TO BUY

Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

Find and recognize significant and varied types of therapeutics under development for Eosinophilic Esophagitis (Gastrointestinal).

Classify potential new clients or partners in the target demographic.

Develop tactical initiatives by understanding the focus areas of leading companies.

Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.

Formulate corrective measures for pipeline projects by understanding Eosinophilic Esophagitis (Gastrointestinal) pipeline depth and focus of Indication therapeutics.

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and @Scope.

Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.

Featured News & Press Releases

Jul 14, 2022: Dupixent (dupilumab) Phase 3 trial shows positive results in children 1 to 11 years of age with eosinophilic esophagitis

Jun 14, 2022: Aqilion receives regulatory approval to conduct Phase 1 clinical trial in Regulus program within inflammatory diseases

Jun 14, 2022: EsoCap holds a multidisciplinary advisory board meeting on Barrett's esophagus

Jun 01, 2022: Aqilion strengthens its operational team in clinical development prior to planned phase I study with drug candidate for inflammatory diseases

May 20, 2022: EsoCap supports first European EoE Day of the European Society of Eosinophilic Oesophagitis on May 22, 2022

May 20, 2022: FDA approves first treatment for eosinophilic esophagitis, a chronic immune disorder

May 16, 2022: Revolo Biotherapeutics announces presentations at upcoming medical meetings

Apr 04, 2022: FDA accepts Dupixent (dupilumab) for priority review in patients aged 12 years and older with eosinophilic esophagitis

Feb 26, 2022: Late-breaking data at 2022 AAAAI Annual Meeting show Dupixent

(dupilumab) significantly improved signs and symptoms of eosinophilic esophagitis
Feb 01, 2022: Positive Dupixent (dupilumab) data across five diseases with underlying type 2 inflammation to be presented at 2022 AAAAI Annual Meeting

Dec 21, 2021: Allakos announces topline phase 3 data from the ENIGMA 2 study and phase 2/3 data from the KRYPTOS study in patients with eosinophilic gastrointestinal diseases

Nov 17, 2021: Children's Hospital of Philadelphia receives \$2 million gift to jump start new clinical trial for severe food allergies

Oct 28, 2021: Revolo Biotherapeutics activates clinical sites and opens enrollment in a phase 2 clinical trial of '1104 in eosinophilic esophagitis

Oct 26, 2021: Revolo Biotherapeutics to present at Stifel 2021 Virtual Healthcare Conference

Oct 25, 2021: EsoCap announces first patient enrolled in Phase II eosinophilic esophagitis trial
