Free Fatty Acid Receptor 1 (G Protein Coupled Receptor 40 or GPR40 or FFAR1) - Pipeline Review, H2 2018

SUMMARY

Free Fatty Acid Receptor 1 (G Protein Coupled Receptor 40 or GPR40 or FFAR1) - Free fatty acid receptor 1 (FFA1), also known as GPR40, is a class A G-protein coupled receptor that is encoded by the FFAR1 gene. It is strongly expressed in the pancreatic islet cells and to a lesser extent in the brain. This membrane protein binds free fatty acids, acting as a nutrient sensor for regulating energy homeostasis.

Free Fatty Acid Receptor 1 (G Protein Coupled Receptor 40 or GPR40 or FFAR1) pipeline Target constitutes close to 13 molecules. Out of which approximately 10 molecules are developed by companies and remaining by the universities/institutes. The molecules developed by companies in Phase I and Preclinical stages are 1 and 9 respectively. Similarly, the universities portfolio in Preclinical stages comprises 3 molecules, respectively. Report covers products from therapy areas Metabolic Disorders and Infectious Disease which include indications Type 2 Diabetes, Diabetes and Hepatitis B.

The latest report Free Fatty Acid Receptor - Pipeline Review, H2 2018, outlays comprehensive information on the Free Fatty Acid Receptor 1 (G Protein Coupled Receptor 40 or GPR40 or FFAR1) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type.

It also reviews key players involved in Free Fatty Acid Receptor 1 (G Protein Coupled Receptor 40 or GPR40 or FFAR1) targeted therapeutics development with respective active and dormant or discontinued projects.

The report is built using data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Free Fatty Acid Receptor 1 (G Protein Coupled Receptor 40 or GPR40 or FFAR1)

The report reviews Free Fatty Acid Receptor 1 (G Protein Coupled Receptor 40 or GPR40 or FFAR1) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Free Fatty Acid Receptor 1 (G Protein Coupled Receptor 40 or GPR40 or FFAR1) targeted therapeutics and enlists all their major and minor projects

The report assesses Free Fatty Acid Receptor 1 (G Protein Coupled Receptor 40 or GPR40 or FFAR1) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Free Fatty Acid Receptor 1 (G Protein Coupled Receptor 40 or GPR40 or FFAR1) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Free Fatty Acid Receptor 1 (G Protein Coupled Receptor 40 or GPR40 or FFAR1)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Free Fatty Acid Receptor 1 (G Protein Coupled Receptor 40 or GPR40 or FFAR1) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Contents

Introduction

Global Markets Direct Report Coverage

Free Fatty Acid Receptor 1 (G Protein Coupled Receptor 40 or GPR40 or FFAR1) -
Overview

Free Fatty Acid Receptor 1 (G Protein Coupled Receptor 40 or GPR40 or FFAR1) -
Therapeutics Development

Products under Development by Stage of Development

Products under Development by Therapy Area

Products under Development by Indication
