Gamma Secretase - Pipeline Review, H2 2020

SUMMARY

According to the recently published report 'Gamma Secretase - Pipeline Review, H2 2020'; Gamma Secretase (EC 3.4.23.) pipeline Target constitutes close to 20 molecules. Out of which approximately 17 molecules are developed by companies and remaining by the universities/institutes.

Gamma Secretase (EC 3.4.23.) - Gamma secretase is a multi-subunit protease complex, itself an integral membrane protein, that cleaves single-pass transmembrane proteins at residues within the transmembrane domain. The most well-known substrate of gamma secretase is amyloid precursor protein, when cleaved by both gamma and beta secretase, produces a short 39-42 amino acid peptide called amyloid beta whose abnormally folded fibrillar form is the primary component of amyloid plaques found in the brains of Alzheimer's disease patients. Gamma secretase is also critical in the related processing of the Notch protein.

The report 'Gamma Secretase - Pipeline Review, H2 2020' outlays comprehensive information on the Gamma Secretase (EC 3.4.23.) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type; that are being developed by Companies/Universities.

It also reviews key players involved in Gamma Secretase (EC 3.4.23.) targeted therapeutics development with respective active and dormant or discontinued projects. Currently, The molecules developed by companies in Phase III, Phase II, Phase I, Preclinical and Discovery stages are 1, 3, 3, 9 and 1 respectively. Similarly, the universities portfolio in Preclinical and Discovery stages comprises 1 and 2 molecules, respectively. Report covers products from therapy areas Central Nervous System, Oncology, Ear Nose Throat Disorders, Non Malignant Disorders, Cardiovascular and

Metabolic Disorders which include indications Alzheimer's Disease, Adenoid Cystic Carcinoma (ACC), Benign Tumor, Hearing Disorders, Refractory Multiple Myeloma, Relapsed Multiple Myeloma, Soft Tissue Sarcoma, Triple-Negative Breast Cancer (TNBC), Acute Sensorineural Hearing Loss, Bile Duct Cancer (Cholangiocarcinoma), Burkitt Lymphoma, Chronic Lymphocytic Leukemia (CLL), Colon Cancer, Congestive Heart Failure (Heart Failure), Gastrointestinal Stromal Tumor (GIST), Glioblastoma Multiforme (GBM), Leiomyosarcoma, Leukemia, Metastatic Breast Cancer, Metastatic Hepatocellular Carcinoma (HCC), Multiple Myeloma (Kahler Disease), Natural Killer Cell Lymphomas, Obesity, Solid Tumor and T-Cell Acute Lymphocytic Leukemia (T-Cell Acute Lymphoblastic Leukaemia).

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Gamma Secretase (EC 3.4.23.)

The report reviews Gamma Secretase (EC 3.4.23.) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Gamma Secretase (EC 3.4.23.) targeted therapeutics and enlists all their major and minor projects

The report assesses Gamma Secretase (EC 3.4.23.) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Gamma Secretase (EC 3.4.23.) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Gamma Secretase (EC 3.4.23.) Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Gamma Secretase (EC 3.4.23.) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Featured News & Press Releases

Sep 18, 2020: Ayala Pharmaceuticals presents positive interim data from phase 2 ACCURACY trial of AL101 for the treatment of recurrent/metastatic adenoid cystic carcinoma with notch activating mutations at ESMO 2020

Sep 16, 2020: SpringWorks Therapeutics announces collaboration with Children's Oncology Group to conduct a phase 2 clinical trial of nirogacestat in pediatric patients with desmoid tumors and reports publication of nirogacestat case series in pediatric/young adult desmoid tumor patients

Sep 14, 2020: Ayala Pharmaceuticals to host virtual KOL event reviewing interim data presented at ESMO 2020 from ongoing phase 2 accuracy trial of AL101 for the treatment of recurrent/metastatic adenoid cystic carcinoma

Jul 27, 2020: Ayala Pharmaceuticals to present updated data from ongoing phase 2 ACCURACY trial of AL101 for the treatment of R/M adenoid cystic carcinoma at the European Society for Medical Oncology (ESMO) virtual congress 2020

Jul 23, 2020: Pipeline Therapeutics initiates Phase 1/2a clinical trial of PIPE-505 in sensorineural hearing loss

Jul 22, 2020: SpringWorks Therapeutics announces full enrollment of phase 3 DeFi trial evaluating nirogacestat in adult patients with desmoid tumors

Jun 22, 2020: SpringWorks Therapeutics announces dosing of first patient in phase 1b combination study evaluating Nirogacestat and GlaxoSmithKline's Belantamab Mafodotin for the treatment of Relapsed or Refractory Multiple Myeloma

Mar 18, 2020: SpringWorks Therapeutics announces issuance of new U.S. composition of matter patent to polymorphic form of Nirogacestat, extending patent protection into 2039

Mar 03, 2020: Ayala Pharmaceuticals granted U.S. FDA Fast Track Designation for AL101 for the treatment of recurrent or metastatic adenoid cystic carcinoma

Dec 09, 2019: Researchers present preclinical data showing synergistic activity of Springworks Therapeutics gamma secretase inhibitor (Nirogacestat) with glaxosmithkline's BCMA antibody-drug conjugate (Belantamab Mafodotin) at the American Society of Hematology (ASH) Annual Meeting

Sep 30, 2019: Ayala Pharmaceuticals presents encouraging preliminary safety and efficacy data in patients with Recurrent/Metastatic Adenoid Cystic Carcinoma with progressing disease and notch activating mutations from ongoing phase 2 clinical trial at ESMO

Sep 26, 2019: SpringWorks receives orphan status for nirogacestat in Europe

Sep 19, 2019: Ayala Pharmaceuticals announces presentation at the European Society for Medical Oncology (ESMO)

Aug 30, 2019: SpringWorks receives breakthrough status for desmoid tumour drug

May 20, 2019: Ayala Pharmaceuticals to present at ASCO Annual Meeting on

investigational drug AL101 in adenoid cystic carcinoma and triple negative breast cancer
