- Pipeline Review, H2 2018

SUMMARY

Glial Cell Line Derived Neurotrophic Factor (Astrocyte Derived Trophic Factor or GDNF)
- Glial -derived neurotrophic factor is a member of the cysteine-knot superfamily of growth factors. It promotes the survival and differentiation of dopaminergic neurons and was able to prevent apoptosis of motor neurons. The mature form of the protein is a ligand for the product of the RET (rearranged during transfection) protooncogene.

Glial Cell Line Derived Neurotrophic Factor (Astrocyte Derived Trophic Factor or GDNF) pipeline Target constitutes close to 12 molecules. Out of which approximately 10 molecules are developed by companies and remaining by the universities/institutes. The molecules developed by companies in Phase II, Phase I and Preclinical stages are 1, 1 and 8 respectively. Similarly, the universities portfolio in Phase II and Discovery stages comprises 1 and 1 molecules, respectively. Report covers products from therapy areas Central Nervous System, Central Nervous System and Ophthalmology which include indications Parkinson's Disease, Amyotrophic Lateral Sclerosis, Ischemic Stroke, Neurodegenerative Diseases, Neuropathic Pain (Neuralgia), Peripheral Nerve Injury and Retinal Degeneration.

The latest report Glial Cell Line Derived Neurotrophic Factor - Pipeline Review, H2 2018, outlays comprehensive information on the Glial Cell Line Derived Neurotrophic Factor (Astrocyte Derived Trophic Factor or GDNF) targeted therapeutics, complete

with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type. It also reviews key players involved in Glial Cell Line Derived Neurotrophic Factor (Astrocyte Derived Trophic Factor or GDNF) targeted therapeutics development with respective active and dormant or discontinued projects.

The report is built using data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Glial Cell Line Derived Neurotrophic Factor (Astrocyte Derived Trophic Factor or GDNF)

The report reviews Glial Cell Line Derived Neurotrophic Factor (Astrocyte Derived Trophic Factor or GDNF) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Glial Cell Line Derived Neurotrophic Factor (Astrocyte Derived Trophic Factor or GDNF) targeted therapeutics and enlists all their major and minor projects

The report assesses Glial Cell Line Derived Neurotrophic Factor (Astrocyte Derived Trophic Factor or GDNF) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Glial Cell Line Derived Neurotrophic Factor (Astrocyte Derived Trophic Factor or GDNF) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Glial Cell Line Derived Neurotrophic Factor (Astrocyte Derived Trophic Factor or GDNF)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Glial Cell Line Derived Neurotrophic Factor (Astrocyte Derived Trophic Factor or GDNF) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope
