### SUMMARY

Glucokinase (Hexokinase D or Hexokinase 4 or GCK or EC 2.7.1.2) pipeline Target constitutes close to 13 molecules. Out of which approximately 11 molecules are developed by companies and remaining by the universities/institutes. The latest report Glucokinase - Drugs In Development, 2021, outlays comprehensive information on the Glucokinase (Hexokinase D or Hexokinase 4 or GCK or EC 2.7.1.2) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type.

Glucokinase (Hexokinase D or Hexokinase 4 or GCK or EC 2.7.1.2) - Glucokinase is an enzyme that catalyzes the initial step in utilization of glucose by the beta-cell and liver at physiological glucose concentration. The role of GCK is to provide G6P for the synthesis of glycogen. Pancreatic glucokinase plays an important role in modulating insulin secretion. Hepatic glucokinase helps to facilitate the uptake and conversion of glucose by acting as an insulin-sensitive determinant of hepatic glucose usage. The molecules developed by companies in Pre-Registration, Phase II and Preclinical stages are 1, 4 and 6 respectively. Similarly, the universities portfolio in Preclinical stages comprises 2 molecules, respectively. Report covers products from therapy areas Metabolic Disorders which include indications Type 2 Diabetes, Type 1 Diabetes (Juvenile Diabetes), Diabetes and Obesity.

Furthermore, this report also reviews key players involved in Glucokinase (Hexokinase

D or Hexokinase 4 or GCK or EC 2.7.1.2) targeted therapeutics development with respective active and dormant or discontinued projects. Driven by data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

**Note:** Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.
