Abstracts

Glucose Dependent Insulinotropic Receptor (G Protein Coupled Receptor 119 or GPR119) Drugs in Development by Therapy Areas and Indications, Stages, MoA, RoA, Molecule Type and Key Players, 2022 Update

SUMMARY

Glucose Dependent Insulinotropic Receptor (G Protein Coupled Receptor 119 or GPR119) pipeline Target constitutes close to 8 molecules. Out of which approximately 7 molecules are developed by companies and remaining by the universities/institutes. The latest report Glucose Dependent Insulinotropic Receptor - Drugs In Development, 2022, outlays comprehensive information on the Glucose Dependent Insulinotropic Receptor (G Protein Coupled Receptor 119 or GPR119) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type.

Glucose Dependent Insulinotropic Receptor (G Protein Coupled Receptor 119 or GPR119) - G protein-coupled receptor 119 also known as GPR119 is a G protein-coupled receptor that is encoded by the GPR119 gene. GPR119 is expressed at high concentrations in the pancreas and gastrointestinal tract. GPR119 regulates incretin and insulin hormone secretion. Activation of GPR119 receptor causes a reduction in food intake and weight gain. This target is a potential drug target in treatments for obesity and diabetes. The molecules developed by companies in Phase II, Phase I,

IND/CTA Filed and Preclinical stages are 1, 3, 1 and 2 respectively. Similarly, the universities portfolio in Preclinical stages comprises 1 molecules, respectively. Report covers products from therapy areas Metabolic Disorders and Gastrointestinal which include indications Type 2 Diabetes, Obesity, Dyslipidemia, Hypoglycemia and Non-Alcoholic Steatohepatitis (NASH).

Furthermore, this report also reviews key players involved in Glucose Dependent Insulinotropic Receptor (G Protein Coupled Receptor 119 or GPR119) targeted therapeutics development with respective active and dormant or discontinued projects. Driven by data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Glucose Dependent Insulinotropic Receptor (G Protein Coupled Receptor 119 or GPR119)

The report reviews Glucose Dependent Insulinotropic Receptor (G Protein Coupled Receptor 119 or GPR119) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Glucose Dependent Insulinotropic Receptor (G Protein Coupled Receptor 119 or GPR119) targeted therapeutics and enlists all their major and minor projects

The report assesses Glucose Dependent Insulinotropic Receptor (G Protein Coupled Receptor 119 or GPR119) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Glucose Dependent Insulinotropic Receptor (G Protein Coupled Receptor 119 or GPR119) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Glucose Dependent Insulinotropic Receptor (G Protein Coupled Receptor 119 or GPR119)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Glucose Dependent Insulinotropic Receptor (G Protein Coupled Receptor 119 or GPR119) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand

business potential and @Scope

Contents

Introduction

Global Markets Direct Report Coverage

Glucose Dependent Insulinotropic Receptor (G Protein Coupled Receptor 119 or GPR119) - Overview

Glucose Dependent Insulinotropic Receptor (G Protein Coupled Receptor 119 or GPR119) - Therapeutics Development

Products under Development by Stage of Development

Products under Development by Therapy Area

Products under Development by Indication

Products under Development by Companies

Products under Development by Universities/Institutes

Glucose Dependent Insulinotropic Receptor (G Protein Coupled Receptor 119 or GPR119) - Therapeutics Assessment

Assessment by Mechanism of Action

Assessment by Route of Administration

Assessment by Molecule Type

Glucose Dependent Insulinotropic Receptor (G Protein Coupled Receptor 119 or GPR119) - Companies Involved in Therapeutics Development

CymaBay Therapeutics Inc

Dong-A Socio Holdings Co Ltd

Hyundai Pharma Co Ltd

Japan Tobacco Inc

Mankind Pharma Ltd

Merck & Co Inc

Scohia Pharma Inc
