Abstracts

Granulocyte Macrophage Colony Stimulating Factor Receptor Subunit Alpha (CDw116 or CD116 or CSF2RA) - Pipeline Review, H1 2018

SUMMARY

Granulocyte Macrophage Colony Stimulating Factor Receptor Subunit Alpha (CDw116 or CD116 or CSF2RA) pipeline Target constitutes close to 15 molecules. Out of which approximately 13 molecules are developed by companies and remaining by the universities/institutes. The latest report Granulocyte Macrophage Colony Stimulating Factor Receptor Subunit Alpha - Pipeline Review, H1 2018, outlays comprehensive information on the Granulocyte Macrophage Colony Stimulating Factor Receptor Subunit Alpha (CDw116 or CD116 or CSF2RA) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type.

Granulocyte Macrophage Colony Stimulating Factor Receptor Subunit Alpha (CDw116 or CD116 or CSF2RA) - Granulocyte macrophage colony stimulating factor receptor subunit alpha also known as CD116 is a receptor for granulocyte macrophage colony-stimulating factor. It is a member of the cytokine family of receptors. It plays an important role in controls the production, differentiation, and function of granulocytes and macrophages. The molecules developed by companies in Phase III, Phase II, Phase I and Preclinical stages are 2, 5, 1 and 5 respectively. Similarly, the universities portfolio in Phase I and Preclinical stages comprises 1 and 1 molecules, respectively. Report covers products from therapy areas Oncology, Respiratory, Toxicology, Central Nervous System, Dermatology, Gastrointestinal, Hematological Disorders and

Infectious Disease which include indications Melanoma, Colorectal Cancer, Lung Disease, Prostate Cancer, Radiation Toxicity (Radiation Sickness, Acute Radiation Syndrome), Acute Respiratory Distress Syndrome, Alzheimer's Disease, Appendicitis, Asthma, Chemotherapy Effects, Chemotherapy Induced Neutropenia, Chronic Obstructive Pulmonary Disease (COPD), Crohn's Disease (Regional Enteritis), Epithelial Ovarian Cancer, Lung Infections, Lung Injury, Malignant Pleural Mesothelioma, Metastatic Hormone Refractory (Castration Resistant, Androgen-Independent) Prostate Cancer, Mild Cognitive Impairment, Multiple Myeloma (Kahler Disease), Neurology, Parkinson's Disease, Peritonitis, Radiation Induced Myelosuppression, Radiation Injury, Respiratory Syncytial Virus (RSV) Infections, Skin Ulcers and Wounds.

Furthermore, this report also reviews key players involved in Granulocyte Macrophage Colony Stimulating Factor Receptor Subunit Alpha (CDw116 or CD116 or CSF2RA) targeted therapeutics development with respective active and dormant or discontinued projects. Driven by data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Granulocyte Macrophage Colony Stimulating Factor Receptor Subunit Alpha (CDw116 or CD116 or CSF2RA)

The report reviews Granulocyte Macrophage Colony Stimulating Factor Receptor Subunit Alpha (CDw116 or CD116 or CSF2RA) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and

collaboration details & other developmental activities

The report reviews key players involved in Granulocyte Macrophage Colony Stimulating Factor Receptor Subunit Alpha (CDw116 or CD116 or CSF2RA) targeted therapeutics and enlists all their major and minor projects

The report assesses Granulocyte Macrophage Colony Stimulating Factor Receptor Subunit Alpha (CDw116 or CD116 or CSF2RA) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Granulocyte Macrophage Colony Stimulating Factor Receptor Subunit Alpha (CDw116 or CD116 or CSF2RA) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Granulocyte Macrophage Colony Stimulating Factor Receptor Subunit Alpha (CDw116 or CD116 or CSF2RA)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it’s most promising pipeline therapeutics

+44 20 8123 2220
info@marketpublishers.com

Devise corrective measures for pipeline projects by understanding Granulocyte Macrophage Colony Stimulating Factor Receptor Subunit Alpha (CDw116 or CD116 or CSF2RA) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope
