

# H<sup>+</sup> Transporting Two Sector ATPase - Pipeline Review, H2 2019

<https://marketpublishers.com/r/H4DC1F7823FAEN.html>

Date: December 2019

Pages: 48

Price: US\$ 2,625.00 (Single User License)

ID: H4DC1F7823FAEN

## Abstracts

H<sup>+</sup> Transporting Two Sector ATPase - Pipeline Review, H2 2019

### SUMMARY

H<sup>+</sup> Transporting Two Sector ATPase (F<sub>1</sub>F<sub>0</sub> ATP Synthase or ATP Synthase or Mitochondrial ATPase or Bacterial Ca<sup>2+</sup>/Mg<sup>2+</sup> ATPase or EC 7.1.2.2) pipeline Target constitutes close to 6 molecules. Out of which approximately 4 molecules are developed by companies and remaining by the universities/institutes. The latest report H<sup>+</sup> Transporting Two Sector ATPase - Pipeline Review, H2 2019, outlays comprehensive information on the H<sup>+</sup> Transporting Two Sector ATPase (F<sub>1</sub>F<sub>0</sub> ATP Synthase or ATP Synthase or Mitochondrial ATPase or Bacterial Ca<sup>2+</sup>/Mg<sup>2+</sup> ATPase or EC 7.1.2.2) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type.

H<sup>+</sup> Transporting Two Sector ATPase (F<sub>1</sub>F<sub>0</sub> ATP Synthase or ATP Synthase or Mitochondrial ATPase or Bacterial Ca<sup>2+</sup>/Mg<sup>2+</sup> ATPase or EC 7.1.2.2) - ATP synthase (EC 3.6.3.14) is an important enzyme that creates the energy storage molecule adenosine triphosphate (ATP). The majority of cellular energy in the form of adenosine triphosphate (ATP) is synthesized by the ubiquitous F<sub>1</sub>F<sub>0</sub> ATP synthase. Power for ATP synthesis derives from an electrochemical proton (or Na<sup>+</sup>) gradient, which drives rotation of membranous F<sub>0</sub> motor components. The molecules developed by companies in Pre-Registration, Phase II, Phase I and Preclinical stages are 1, 1, 1 and 1 respectively. Similarly, the universities portfolio in Preclinical and Discovery stages comprises 1 and 1 molecules, respectively. Report covers products from therapy areas Infectious Disease and Immunology which include indications Tuberculosis, Leprosy, Plaque Psoriasis (Psoriasis Vulgaris) and Pulmonary Tuberculosis.

Furthermore, this report also reviews key players involved in H<sup>+</sup> Transporting Two Sector ATPase (F1F0 ATP Synthase or ATP Synthase or Mitochondrial ATPase or Bacterial Ca<sup>2+</sup>/Mg<sup>2+</sup> ATPase or EC 7.1.2.2) targeted therapeutics development with respective active and dormant or discontinued projects. Driven by data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

## SCOPE

The report provides a snapshot of the global therapeutic landscape for H<sup>+</sup> Transporting Two Sector ATPase (F1F0 ATP Synthase or ATP Synthase or Mitochondrial ATPase or Bacterial Ca<sup>2+</sup>/Mg<sup>2+</sup> ATPase or EC 3.6.3.14)

The report reviews H<sup>+</sup> Transporting Two Sector ATPase (F1F0 ATP Synthase or ATP Synthase or Mitochondrial ATPase or Bacterial Ca<sup>2+</sup>/Mg<sup>2+</sup> ATPase or EC 3.6.3.14) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in H<sup>+</sup> Transporting Two Sector ATPase (F1F0 ATP Synthase or ATP Synthase or Mitochondrial ATPase or Bacterial Ca<sup>2+</sup>/Mg<sup>2+</sup> ATPase or EC 3.6.3.14) targeted therapeutics and enlists all their major and minor projects

The report assesses H<sup>+</sup> Transporting Two Sector ATPase (F1F0 ATP Synthase or ATP Synthase or Mitochondrial ATPase or Bacterial Ca<sup>2+</sup>/Mg<sup>2+</sup> ATPase or EC 3.6.3.14) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to H<sup>+</sup> Transporting Two Sector ATPase (F1F0 ATP Synthase or ATP Synthase or Mitochondrial ATPase or Bacterial Ca<sup>2+</sup>/Mg<sup>2+</sup> ATPase or EC 3.6.3.14) targeted therapeutics

## REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for H<sup>+</sup> Transporting Two Sector ATPase (F1F0 ATP Synthase or ATP Synthase or Mitochondrial ATPase or Bacterial Ca<sup>2+</sup>/Mg<sup>2+</sup> ATPase or EC 3.6.3.14)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding H<sup>+</sup> Transporting Two Sector ATPase (F1F0 ATP Synthase or ATP Synthase or Mitochondrial ATPase or Bacterial Ca<sup>2+</sup>/Mg<sup>2+</sup> ATPase or EC 3.6.3.14) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

## Contents

Introduction

Global Markets Direct Report Coverage

H<sup>+</sup> Transporting Two Sector ATPase (F1F0 ATP Synthase or ATP Synthase or Mitochondrial ATPase or Bacterial Ca<sup>2+</sup>/Mg<sup>2+</sup> ATPase or EC 7.1.2.2) - Overview

H<sup>+</sup> Transporting Two Sector ATPase (F1F0 ATP Synthase or ATP Synthase or Mitochondrial ATPase or Bacterial Ca<sup>2+</sup>/Mg<sup>2+</sup> ATPase or EC 7.1.2.2) - Therapeutics Development

Products under Development by Stage of Development

Products under Development by Therapy Area

Products under Development by Indication

Products under Development by Companies

Products under Development by Universities/Institutes

H<sup>+</sup> Transporting Two Sector ATPase (F1F0 ATP Synthase or ATP Synthase or Mitochondrial ATPase or Bacterial Ca<sup>2+</sup>/Mg<sup>2+</sup> ATPase or EC 7.1.2.2) - Therapeutics Assessment

Assessment by Mechanism of Action

Assessment by Route of Administration

Assessment by Molecule Type

H<sup>+</sup> Transporting Two Sector ATPase (F1F0 ATP Synthase or ATP Synthase or Mitochondrial ATPase or Bacterial Ca<sup>2+</sup>/Mg<sup>2+</sup> ATPase or EC 7.1.2.2) - Companies Involved in Therapeutics Development

Hinova Pharmaceuticals Inc

Johnson & Johnson

Lycera Corp

Shanghai Jiatan Pharmaceutical Technology Co Ltd

H<sup>+</sup> Transporting Two Sector ATPase (F1F0 ATP Synthase or ATP Synthase or Mitochondrial ATPase or Bacterial Ca<sup>2+</sup>/Mg<sup>2+</sup> ATPase or EC 7.1.2.2) - Drug Profiles  
bedaquiline fumarate - Drug Profile

Product Description

Mechanism Of Action

R&D Progress

HCX-028 - Drug Profile

Product Description

Mechanism Of Action

R&D Progress

LYC-30937 - Drug Profile

Product Description

Mechanism Of Action

R&D Progress

Small Molecule to Inhibit F<sub>0</sub>F<sub>1</sub>-ATP Synthase for Tuberculosis - Drug Profile

Product Description

Mechanism Of Action

R&D Progress

Small Molecules to Inhibit ATP Synthase for Tuberculosis - Drug Profile

### LIST OF FIGURES

Number of Products under Development by Stage of Development, H2 2019

Number of Products under Development by Therapy Areas, H2 2019

Number of Products under Development by Top 10 Indications, H2 2019

Number of Products by Stage and Mechanism of Actions, H2 2019

Number of Products by Stage and Route of Administration, H2 2019

Number of Products by Stage and Molecule Type, H2 2019

### COMPANIES MENTIONED

Hinova Pharmaceuticals Inc

Johnson & Johnson

Lycera Corp

Shanghai Jiatan Pharmaceutical Technology Co Ltd

## I would like to order

Product name: H+ Transporting Two Sector ATPase - Pipeline Review, H2 2019

Product link: <https://marketpublishers.com/r/H4DC1F7823FAEN.html>

Price: US\$ 2,625.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

[info@marketpublishers.com](mailto:info@marketpublishers.com)

## Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/H4DC1F7823FAEN.html>

To pay by Wire Transfer, please, fill in your contact details in the form below:
