Abstracts

Hepatitis C Virus Envelope Protein E2 - Drugs in Development, 2021

SUMMARY

Hepatitis C Virus Envelope Protein E2 pipeline Target constitutes close to 10 molecules. Out of which approximately 4 molecules are developed by companies and remaining by the universities/institutes. The latest report Hepatitis C Virus Envelope Protein E2 - Drugs In Development, 2021, outlays comprehensive information on the Hepatitis C Virus Envelope Protein E2 targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type.

Hepatitis C Virus Envelope Protein E2 - E2 is a viral structural protein found in the hepatitis C virus. It is present on the viral membrane and functions as a host receptor binding protein mediating entry into host cells. It is an important target for the design of entry inhibitors and vaccine immunogens. The molecules developed by companies in Preclinical stages are 4 respectively. Similarly, the universities portfolio in Phase II, Preclinical and Discovery stages comprises 1, 3 and 2 molecules, respectively. Report covers products from therapy areas Infectious Disease which include indications Hepatitis C.

Furthermore, this report also reviews key players involved in Hepatitis C Virus Envelope Protein E2 targeted therapeutics development with respective active and dormant or discontinued projects. Driven by data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university

sites and industry-specific third party sources.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Hepatitis C Virus Envelope Protein E2

The report reviews Hepatitis C Virus Envelope Protein E2 targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Hepatitis C Virus Envelope Protein E2 targeted therapeutics and enlists all their major and minor projects

The report assesses Hepatitis C Virus Envelope Protein E2 targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Hepatitis C Virus Envelope Protein E2 targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Hepatitis C Virus Envelope Protein E2
Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Hepatitis C Virus Envelope Protein E2 development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Contents

Introduction

Global Markets Direct Report Coverage

Hepatitis C Virus Envelope Protein E2 - Overview

Hepatitis C Virus Envelope Protein E2 - Therapeutics Development

Products under Development by Stage of Development

Products under Development by Therapy Area

Products under Development by Indication

Products under Development by Companies

Products under Development by Universities/Institutes

Hepatitis C Virus Envelope Protein E2 - Therapeutics Assessment

Assessment by Mechanism of Action

Assessment by Route of Administration

Assessment by Molecule Type

Hepatitis C Virus Envelope Protein E2 - Companies Involved in Therapeutics Development

Ennaid Therapeutics LLC

Integrated BioTherapeutics Inc

Toray Industries Inc

Uvax Bio LLC

Hepatitis C Virus Envelope Protein E2 - Drug Profiles
