Abstracts

Hepatocyte Growth Factor (Hepatopoietin A or Scatter Factor or HGF) - Pipeline Review, H2 2018

SUMMARY

According to the recently published report 'Hepatocyte Growth Factor - Pipeline Review, H2 2018'; Hepatocyte Growth Factor (Hepatopoietin A or Scatter Factor or HGF) pipeline Target constitutes close to 14 molecules.

Hepatocyte Growth Factor (Hepatopoietin A or Scatter Factor or HGF) - Hepatocyte growth factor (HGF) is a paracrine cellular growth and morphogenic factor secreted by mesenchymal cells and stimulates epithelial cell proliferation, motility, morphogenesis and angiogenesis in various organs via tyrosine phosphorylation of its receptor. It has a major role in embryonic organ development, specifically in myogenesis, in adult organ regeneration and in wound healing. In addition, HGF exerts protective effects on epithelial and non-epithelial organs (including the heart and brain) via anti-apoptotic and anti-inflammatory signals.

The report 'Hepatocyte Growth Factor - Pipeline Review, H2 2018' outlays comprehensive information on the Hepatocyte Growth Factor (Hepatopoietin A or Scatter Factor or HGF) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type; that are being developed by Companies/Universities.

It also reviews key players involved in Hepatocyte Growth Factor (Hepatopoietin A or Scatter Factor or HGF) targeted therapeutics development with respective active and

dormant or discontinued projects. Currently, The molecules developed by companies in Pre-Registration, Phase III, Phase II, Phase I, Preclinical and Discovery stages are 1, 1, 4, 2, 3 and 3 respectively. Report covers products from therapy areas Oncology, Central Nervous System, Cardiovascular, Dermatology, Genito Urinary System And Sex Hormones, Hematological Disorders and Metabolic Disorders which include indications Amyotrophic Lateral Sclerosis, Critical Limb Ischemia, Glioblastoma Multiforme (GBM), Non-Small Cell Lung Cancer, Alzheimer's Disease, Gastric Cancer, Melanoma, Myocardial Infarction, Ovarian Cancer, Pancreatic Cancer, Peripheral Arterial Disease (PAD)/Peripheral Vascular Disease (PVD), Acute Renal Failure (ARF) (Acute Kidney Injury), Acute Spinal Cord Injury, Advanced Malignancy, Angina (Angina Pectoris), Arteriosclerosis, Breast Cancer, Cervical Cancer, Colon Cancer, Colorectal Cancer, Coronary Artery Disease (CAD) (Ischemic Heart Disease), Dementia, Diabetic Ischemic Foot Ulcers, Diabetic Peripheral Neuropathy, Gallbladder Cancer, Head And Neck Cancer, Hepatocellular Carcinoma, Kidney Cancer (Renal Cell Cancer), Leiomyosarcoma, Liver Cancer, Lung Cancer, Lymphedema, Lymphoma, Metastatic Cancer, Nasopharyngeal Cancer, Parkinson's Disease, Post-Operative Pain, Prostate Cancer, Refractory Multiple Myeloma, Relapsed Multiple Myeloma, Scar and Thromboangiitis obliterans (Buerger disease).

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Hepatocyte Growth Factor (Hepatopoietin A or Scatter Factor or HGF)

The report reviews Hepatocyte Growth Factor (Hepatopoietin A or Scatter Factor or HGF) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Hepatocyte Growth Factor (Hepatopoietin A or Scatter Factor or HGF) targeted therapeutics and enlists all their major and minor projects

The report assesses Hepatocyte Growth Factor (Hepatopoietin A or Scatter Factor or HGF) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Hepatocyte Growth Factor (Hepatopoietin A or Scatter Factor or HGF) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Hepatocyte Growth Factor (Hepatopoietin A or Scatter Factor or HGF)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Hepatocyte Growth Factor (Hepatopoietin A or Scatter Factor or HGF) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope
