Hepcidin (Liver Expressed Antimicrobial Peptide 1 or Putative Liver Tumor Regressor or HAMP) - Pipeline Review, H1 2017

SUMMARY

Hepcidin (Liver Expressed Antimicrobial Peptide 1 or Putative Liver Tumor Regressor or HAMP) - Hepcidin is a protein encoded by the HAMP gene. It acts by promoting endocytosis and degradation of ferroportin leading to the retention of iron in iron exporting cells and decreased flow of iron into plasma. It controls the major flows of iron into plasma, absorption of dietary iron in the intestine and recycling of iron by macrophages.

Hepcidin (Liver Expressed Antimicrobial Peptide 1 or Putative Liver Tumor Regressor or HAMP) pipeline Target constitutes close to 6 molecules. Out of which approximately 6 molecules are developed by Companies. The molecules developed by companies in Phase II, Preclinical and Discovery stages are 2, 3 and 1 respectively. Report covers products from therapy areas Hematological Disorders, Genetic Disorders, Immunology, Oncology and Toxicology which include indications Hemochromatosis, Thalassemia, Acute Inflammation, Anemia, Anemia in Chronic Kidney Disease (Renal Anemia), Anemia of Chronic Disease, Chemotherapy Induced Anemia, Iron Deficiency Anemia, Polycythemia Vera and Sickle Cell Disease.

The latest report Hepcidin - Pipeline Review, H1 2017, outlays comprehensive information on the Hepcidin (Liver Expressed Antimicrobial Peptide 1 or Putative Liver Tumor Regressor or HAMP) targeted therapeutics, complete with analysis by

indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type. It also reviews key players involved in Hepcidin (Liver Expressed Antimicrobial Peptide 1 or Putative Liver Tumor Regressor or HAMP) targeted therapeutics development with respective active and dormant or discontinued projects.

The report is built using data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Hepcidin (Liver Expressed Antimicrobial Peptide 1 or Putative Liver Tumor Regressor or HAMP)

The report reviews Hepcidin (Liver Expressed Antimicrobial Peptide 1 or Putative Liver Tumor Regressor or HAMP)targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Hepcidin (Liver Expressed Antimicrobial Peptide 1 or Putative Liver Tumor Regressor or HAMP)targeted therapeutics and enlists all their major and minor projects

The report assesses Hepcidin (Liver Expressed Antimicrobial Peptide 1 or Putative Liver Tumor Regressor or HAMP) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Hepcidin (Liver Expressed Antimicrobial Peptide 1 or Putative Liver Tumor Regressor or HAMP) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Hepcidin (Liver Expressed Antimicrobial Peptide 1 or Putative Liver Tumor Regressor or HAMP)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Hepcidin (Liver Expressed Antimicrobial Peptide 1 or Putative Liver Tumor Regressor or HAMP)development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Contents

Introduction

Global Markets Direct Report Coverage

Hepcidin (Liver Expressed Antimicrobial Peptide 1 or Putative Liver Tumor Regressor or HAMP) - Overview

Hepcidin (Liver Expressed Antimicrobial Peptide 1 or Putative Liver Tumor Regressor or HAMP) - Therapeutics Development

Products under Development by Stage of Development

Products under Development by Therapy Area

Products under Development by Indication

Products under Development by Companies

Hepcidin (Liver Expressed Antimicrobial Peptide 1 or Putative Liver Tumor Regressor or HAMP) - Therapeutics Assessment

Assessment by Mechanism of Action

Assessment by Route of Administration

Assessment by Molecule Type

Hepcidin (Liver Expressed Antimicrobial Peptide 1 or Putative Liver Tumor Regressor or HAMP) - Companies Involved in Therapeutics Development

Daiichi Sankyo Company Ltd

Noxxon Pharma AG
