Abstracts

Herpes Zoster (Shingles) - Pipeline Review, H2 2020

SUMMARY

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Herpes Zoster - Pipeline Review, H2 2020, provides an overview of the Herpes Zoster (Infectious Disease) pipeline landscape.

Shingles (herpes zoster) is a painful, blistering skin rash. It is caused by the varicella-zoster virus. Symptoms may include fever and chills, headache, joint pain and swollen glands. The predisposing factors include age and weakened immune system.

Treatment includes antihistamines and pain relievers.

REPORT HIGHLIGHTS

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Herpes Zoster - Pipeline Review, H2 2020, provides comprehensive information on the therapeutics under development for Herpes Zoster (Infectious Disease), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Herpes Zoster (Infectious Disease) pipeline guide also reviews of key players involved in therapeutic development for Herpes Zoster (Shingles) and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies/Universities/Institutes, the molecules developed by Companies in Pre-Registration, Phase III, Phase I, Preclinical, Discovery and Unknown stages are 1, 1, 2, 7, 2 and 1 respectively. Similarly, the Universities portfolio in Phase I stages comprises 1 molecules, respectively.

Herpes Zoster (Infectious Disease) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Note:

Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The pipeline guide provides a snapshot of the global therapeutic landscape of Herpes Zoster (Infectious Disease).

The pipeline guide reviews pipeline therapeutics for Herpes Zoster (Infectious Disease) by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Herpes Zoster (Infectious Disease) therapeutics and enlists all their major and minor projects.

The pipeline guide evaluates Herpes Zoster (Infectious Disease) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Herpes Zoster (Infectious Disease)

REASONS TO BUY

Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

Find and recognize significant and varied types of therapeutics under development for Herpes Zoster (Infectious Disease).

Classify potential new clients or partners in the target demographic.

Develop tactical initiatives by understanding the focus areas of leading companies.

Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.

Formulate corrective measures for pipeline projects by understanding Herpes Zoster (Infectious Disease) pipeline depth and focus of Indication therapeutics.

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope.

Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.

Featured News & Press Releases

Sep 15, 2020: Curevo Vaccine announces robust antibody response results of Phase I clinical trial of investigational vaccine for Shingles CRV-101

Jul 23, 2020: CHMP recommended extension of indication for Shingrix

May 14, 2020: NanoViricides provides update on drug candidate NV-HHV-101

Mar 10, 2020: First QS-21 royalty payment due to Agenus is triggered

Jan 09, 2020: NanoViricides successfully completes required genetic toxicology testing of lead Drug candidate NV-HHV-101

Jan 07, 2020: NanoViricides has initiated genetic toxicology testing required for an IND for its drug candidate

Dec 06, 2019: NanoViricides annual meeting of shareholders to be held on Saturday, December 7th, 2019 at the Sheraton Hotel, Stamford, CT

Dec 03, 2019: NanoViricides founder Dr. Diwan provides \$2,000,000 loan commitment to the company

Dec 02, 2019: NanoViricides has initiated required safety pharmacology assessment of lead drug candidate towards IND

Nov 19, 2019: NanoViricides files quarterly report for period ending September 30, 2019 - HerpeCide drug candidate ind enabling studies update, progressing towards clinical trials

Oct 31, 2019: NanoViricides initiates required dermal sensitization and ocular irritation testing of lead drug candidate towards IND

Oct 09, 2019: NanoViricides has initiated bio-analytical studies as part of IND-enabling

safety and toxicology studies of lead candidate NV-HHV-101

Oct 03, 2019: NanoViricides is creating nanomedicines to develop antiviral therapies to combat shingles and herpes viruses

Sep 26, 2019: Curevo Vaccine announces interim results of phase I clinical trial of CRV-101

Aug 26, 2019: NanoViricides advancing rapidly towards first IND
