Abstracts

Human Cytomegalovirus Envelope Glycoprotein B - Pipeline Review, H1 2020

SUMMARY

Human Cytomegalovirus Envelope Glycoprotein B (gB) pipeline Target constitutes close to 9 molecules. Out of which approximately 8 molecules are developed by companies and remaining by the universities/institutes. The latest report Human Cytomegalovirus Envelope Glycoprotein B Pipeline Review, H1 2020, outlays comprehensive information on the Human Cytomegalovirus Envelope Glycoprotein B (gB) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type.

Human Cytomegalovirus Envelope Glycoprotein B (gB) - Human Cytomegalovirus envelope glycoprotein B plays an important role in host cell entry and cell to cell virus transmission. It is involved in the initial attachment via binding to heparan sulfate together with the gM/gN complex that binds heparin with higher affinity. It interacts with host integrin ITGB1, PDGFRA and EGFR that likely serve as post attachment entry receptors. It participates in the fusion of viral and cellular membranes leading to virus entry into the host cell. The molecules developed by companies in Phase II, Phase I, Preclinical and Discovery stages are 1, 1, 5 and 1 respectively. Similarly, the universities portfolio in Preclinical stages comprises 1 molecules, respectively. Report covers products from therapy areas Infectious Disease, Oncology and Women's Health which include indications Cytomegalovirus (HHV-5) Infections, Chlamydia Infections, Female Contraception, Gonorrhoea, Human Immunodeficiency Virus (HIV) Infections (AIDS), Medulloblastoma, Recurrent Glioblastoma Multiforme (GBM), Simplexvirus (HSV) Infections and Trichomonas Vaginitis.

Furthermore, this report also reviews key players involved in Human Cytomegalovirus Envelope Glycoprotein B (gB) targeted therapeutics development with respective active and dormant or discontinued projects. Driven by data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Human Cytomegalovirus Envelope Glycoprotein B (gB)

The report reviews Human Cytomegalovirus Envelope Glycoprotein B (gB) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Human Cytomegalovirus Envelope Glycoprotein B (gB) targeted therapeutics and enlists all their major and minor projects

The report assesses Human Cytomegalovirus Envelope Glycoprotein B (gB) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Human Cytomegalovirus

Envelope Glycoprotein B (gB) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Human Cytomegalovirus Envelope Glycoprotein B (gB)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Human Cytomegalovirus Envelope Glycoprotein B (gB) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Contents

Introduction

Global Markets Direct Report Coverage

Human Cytomegalovirus Envelope Glycoprotein B (gB) - Overview

Human Cytomegalovirus Envelope Glycoprotein B (gB) - Therapeutics Development

Products under Development by Stage of Development

Products under Development by Therapy Area

Products under Development by Indication

Products under Development by Companies

Products under Development by Universities/Institutes

Human Cytomegalovirus Envelope Glycoprotein B (gB) - Therapeutics Assessment

Assessment by Mechanism of Action

Assessment by Route of Administration

Assessment by Molecule Type

Human Cytomegalovirus Envelope Glycoprotein B (gB) - Companies Involved in
Therapeutics Development

Helocyte Biosciences Inc

Merck & Co Inc

Stadius Biopharma LLC

Trellis Bioscience Inc

VBI Vaccines Inc

Yaso Therapeutics Inc

Human Cytomegalovirus Envelope Glycoprotein B (gB) - Drug Profiles

Bispecific Monoclonal Antibody to Target CD3 and Glycoprotein B for Cytomegalovirus
(HHV-5) Infections - Drug Profile

Milestones

Featured News & Press Releases

Nov 22, 2019: VBI Vaccines presents early GBM tumor response and immunologic data from part B of ongoing phase 1/2a study of VBI-1901 at the 2019 SNO Annual Meeting

Nov 11, 2019: VBI Vaccines to present initial phase 1/2a part B data of VBI-1901 at the 2019 Society for Neuro-Oncology (SNO) Annual Meeting

Oct 24, 2019: VBI Vaccines to present new immuno-oncology data at the World Vaccine Congress Europe 2019

Sep 11, 2019: VBI to study cancer vaccine with GSK's adjuvant system

Jul 29, 2019: VBI Vaccines announces dosing of first recurrent GBM patient in Part B of ongoing phase 1/2a study of VBI-1901

Jun 04, 2019: VBI Vaccines reports data from part A of the ongoing phase 1/2a study of VBI-1901 in recurrent glioblastoma (GBM) patients at ASCO 2019

Apr 23, 2019: VBI Vaccines provides update on GBM program and announces upcoming conference call

Apr 03, 2019: VBI Vaccines announces poster presentation at the 7th International Congenital CMV Conference & 17th International CMV Workshop

Feb 07, 2019: VBI Vaccines announces third positive DSMB review in phase 1/2a study of VBI-1901 in recurrent GBM patients

Dec 20, 2018: VBI Vaccines Announces Phase 2 Clinical Study Design of its Prophylactic CMV Vaccine Candidate

Oct 24, 2018: VBI Vaccines to present initial data for VBI-1901 in recurrent glioblastoma (GBM) patients at the 2018 Annual Meeting of the Society for Neuro-Oncology (SNO)

Oct 02, 2018: VBI Vaccines late-breaker cytomegalovirus abstract chosen for oral presentation at IDWeek 2018

Sep 25, 2018: VBI Vaccines announces second positive DSMB review in phase 1/2a study of VBI-1901 in recurrent glioblastoma

Sep 25, 2018: VBI Vaccines announces second positive DSMB review in phase 1/2a study of VBI-1901 in recurrent glioblastoma (GBM) patients

May 10, 2018: VBI Vaccines Announces Positive Final Phase 1 Study Results of Preventative CMV Vaccine
