Abstracts

Human Papillomavirus Protein E6 (E6) - Pipeline Review, H2 2019

SUMMARY

Human Papillomavirus Protein E6 (E6) pipeline Target constitutes close to 34 molecules. Out of which approximately 22 molecules are developed by companies and remaining by the universities/institutes. The latest report Human Papillomavirus Protein E6 (E6) - Pipeline Review, H2 2019, outlays comprehensive information on the Human Papillomavirus Protein E6 (E6) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type.

Human Papillomavirus Protein E6 (E6) - The Human Papillomavirus (HPV) E6 protein is one of oncoproteins encoded by the virus. It is a 151 amino-acid peptide. It plays a major role in the induction and maintenance of cellular transformation. It acts mainly as an oncoprotein by stimulating the destruction of many host cell key regulatory proteins. The complex E6/E6P targets several other substrates to degradation via the proteasome including host NFX1-91. The resulting increased expression of hTERT prevents the shortening of telomere length leading to cell immortalization. The molecules developed by companies in Phase III, Phase II, Phase I, IND/CTA Filed, Preclinical and Discovery stages are 1, 6, 3, 1, 9 and 2 respectively. Similarly, the universities portfolio in Phase II, Phase I, Preclinical and Discovery stages comprises 2, 2, 6 and 2 molecules, respectively. Report covers products from therapy areas Oncology, Women's Health, Infectious Disease and Gastrointestinal which include indications Human Papillomavirus (HPV) Associated Cancer, Cervical Cancer, Cervical Intraepithelial Neoplasia (CIN), Head And Neck Cancer Squamous Cell Carcinoma,

Human Papillomavirus Infections, Penile Cancer, Anal Cancer, Head And Neck Cancer, Oropharyngeal Cancer, Vaginal Cancer, Vulvar Cancer, Anal Dysplasia, Glioblastoma Multiforme (GBM), Lung Cancer, Melanoma, Pancreatic Cancer and Triple-Negative Breast Cancer (TNBC).

Furthermore, this report also reviews key players involved in Human Papillomavirus Protein E6 (E6) targeted therapeutics development with respective active and dormant or discontinued projects. Driven by data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Human Papillomavirus Protein E6 (E6)

The report reviews Human Papillomavirus Protein E6 (E6) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Human Papillomavirus Protein E6 (E6) targeted therapeutics and enlists all their major and minor projects

The report assesses Human Papillomavirus Protein E6 (E6) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Human Papillomavirus Protein E6 (E6) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Human Papillomavirus Protein E6 (E6)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Human Papillomavirus Protein E6 (E6) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Contents

- Introduction
- Global Markets Direct Report Coverage
- Human Papillomavirus Protein E6 (E6) - Overview
- Human Papillomavirus Protein E6 (E6) - Therapeutics Development
- Products under Development by Stage of Development
- Products under Development by Therapy Area
- Products under Development by Indication
- Products under Development by Companies
- Products under Development by Universities/Institutes
- Human Papillomavirus Protein E6 (E6) - Therapeutics Assessment
- Assessment by Mechanism of Action
- Assessment by Route of Administration
- Assessment by Molecule Type
- Human Papillomavirus Protein E6 (E6) - Companies Involved in Therapeutics Development
- Abion Inc
- AstraZeneca Plc
- BioNTech SE
- Cellid Co Ltd
- Etubics Corp
- Genexine Inc
- Hookipa Pharma Inc
- Immunomic Therapeutics Inc
- Innovene
- Inovio Pharmaceuticals Inc
- Ispin Inc
- Papivax LLC
- Rottapharm Biotech Srl
- Selecta Biosciences Inc
- Touchlight Genetics Ltd
- Transgene SA
- UbiVac LLC
- ViciniVax BV
- Vir Biotechnology Inc
- Human Papillomavirus Protein E6 (E6) - Drug Profiles
(bivalimogene ralaplasmid + mavilimogene ralaplasmid) - Drug Profile
- Product Description
