Abstracts

Hypertrophic Cardiomyopathy - Pipeline Review, H1 2020

SUMMARY

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Hypertrophic Cardiomyopathy - Pipeline Review, H1 2020, provides an overview of the Hypertrophic Cardiomyopathy (Cardiovascular) pipeline landscape.

Hypertrophic cardiomyopathy (HCM) is a disease in which the heart muscle (myocardium) becomes abnormally thick (hypertrophied). The thickened heart muscles make it harder for the heart to pump blood. Symptoms include chest pain, especially during exercise, sensation of rapid, fluttering or pounding heartbeats and heart murmur. Hypertrophic cardiomyopathy usually is inherited. Treatment includes beta blockers, calcium channel blockers and blood thinners.

REPORT HIGHLIGHTS

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Hypertrophic Cardiomyopathy - Pipeline Review, H1 2020, provides comprehensive information on the therapeutics under development for Hypertrophic Cardiomyopathy (Cardiovascular), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Hypertrophic Cardiomyopathy (Cardiovascular) pipeline guide also reviews of key

players involved in therapeutic development for Hypertrophic Cardiomyopathy and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies/Universities/Institutes, the molecules developed by Companies in Phase III, Phase II, Phase I, Preclinical and Discovery stages are 1, 3, 2, 4 and 1 respectively. Similarly, the Universities portfolio in Preclinical and Discovery stages comprises 2 and 1 molecules, respectively.

Hypertrophic Cardiomyopathy (Cardiovascular) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The pipeline guide provides a snapshot of the global therapeutic landscape of Hypertrophic Cardiomyopathy (Cardiovascular).

The pipeline guide reviews pipeline therapeutics for Hypertrophic Cardiomyopathy (Cardiovascular) by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Hypertrophic Cardiomyopathy (Cardiovascular) therapeutics and enlists all their major and

minor projects.

The pipeline guide evaluates Hypertrophic Cardiomyopathy (Cardiovascular) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Hypertrophic Cardiomyopathy (Cardiovascular)

REASONS TO BUY

Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

Find and recognize significant and varied types of therapeutics under development for Hypertrophic Cardiomyopathy (Cardiovascular).

Classify potential new clients or partners in the target demographic.

Develop tactical initiatives by understanding the focus areas of leading companies.

Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.

Formulate corrective measures for pipeline projects by understanding Hypertrophic Cardiomyopathy (Cardiovascular) pipeline depth and focus of Indication therapeutics.

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope.

Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.

Featured News & Press Releases

Mar 30, 2020: MyoKardia announces Mavacamten treatment well tolerated and significantly reduced biomarkers of cardiac injury and wall stress in non-obstructive hypertrophic cardiomyopathy patients

Mar 26, 2020: MyoKardia provides clinical trial update on Mavacamten

Mar 26, 2020: MyoKardia provides clinical trial update in the context of the COVID-19 pandemic

Feb 20, 2020: Cytokinetics announces preclinical data for CK-3773274 presented at the Biophysical Society 64th Annual Meeting

Jan 06, 2020: Cytokinetics announces Start of Redwood-HCM, a phase 2 clinical trial of CK-3773274

Nov 11, 2019: MyoKardia announces 48-week data from PIONEER-OLE study of Mavacamten

Nov 11, 2019: MyoKardia announces positive topline data from its phase 2 MAVERICK-HCM clinical trial of mavacamten

Nov 04, 2019: MyoKardia announces abstracts on mavacamten selected for presentation at the American Heart Association Scientific Sessions 2019

Sep 16, 2019: Cytokinetics announces data from phase 1 study of CK-3773274 at the HFSA 23 Annual Scientific Meeting

Sep 10, 2019: MyoKardia to Evaluate Mavacamten as an Alternative to Septal Reduction Therapy in Obstructive Hypertrophic Cardiomyopathy Patients

Sep 06, 2019: Cytokinetics to present on its Hypertrophic Cardiomyopathy drug candidate CK-274 at 23rd Annual HFSA Scientific Meeting

Aug 31, 2019: MyoKardia Presents 36-week Data from PIONEER-OLE Study of Mavacamten at the European Society of Cardiology Congress 2019

Aug 26, 2019: MyoKardia announces mavacamten abstract selected for presentation at the European Society of Cardiology Congress 2019

Aug 26, 2019: MyoKardia announces MYK-581 abstract selected for presentation at the European Society of Cardiology Congress 2019

Aug 23, 2019: MyoKardia starts dosing hypertrophic cardiomyopathy patients
