Hypoparathyroidism - Pipeline Review, H2 2020

SUMMARY

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Hypoparathyroidism - Pipeline Review, H2 2020, provides an overview of the Hypoparathyroidism (Hormonal Disorders) pipeline landscape.

Hypoparathyroidism is decreased function of the parathyroid glands with underproduction of parathyroid hormone. This leads to low levels of calcium in the blood, often causing cramping and twitching of muscles (involuntary muscle contraction), and several other symptoms. The condition can be inherited, but it is also encountered after thyroid or parathyroid gland surgery, and it can be caused by immune system-related damage as well as a number of rarer causes. The treatment includes artificial form of the hormone that can be administered as replacement, calcium replacement or vitamin.

REPORT HIGHLIGHTS

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Hypoparathyroidism - Pipeline Review, H2 2020, provides comprehensive information on the therapeutics under development for Hypoparathyroidism (Hormonal Disorders), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Hypoparathyroidism (Hormonal Disorders) pipeline guide also reviews of key

players involved in therapeutic development for Hypoparathyroidism and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies/Universities/Institutes, the molecules developed by Companies in Phase II, Phase I, Preclinical and Discovery stages are 3, 3, 3 and 4 respectively. Similarly, the Universities portfolio in Phase I stages comprises 1 molecules, respectively.

Hypoparathyroidism (Hormonal Disorders) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The pipeline guide provides a snapshot of the global therapeutic landscape of Hypoparathyroidism (Hormonal Disorders).

The pipeline guide reviews pipeline therapeutics for Hypoparathyroidism (Hormonal Disorders) by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Hypoparathyroidism (Hormonal Disorders) therapeutics and enlists all their major and minor projects.

The pipeline guide evaluates Hypoparathyroidism (Hormonal Disorders) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Hypoparathyroidism (Hormonal Disorders)

REASONS TO BUY

Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

Find and recognize significant and varied types of therapeutics under development for Hypoparathyroidism (Hormonal Disorders).

Classify potential new clients or partners in the target demographic.

Develop tactical initiatives by understanding the focus areas of leading companies.

Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.

Formulate corrective measures for pipeline projects by understanding Hypoparathyroidism (Hormonal Disorders) pipeline depth and focus of Indication therapeutics.

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope.

Adjust the therapeutic portfolio by recognizing discontinued projects and

understand from the know-how what drove them from pipeline.

Featured News & Press Releases

Oct 23, 2020: Ascendis Pharma receives Orphan Designation for TransCon PTH for treatment of hypoparathyroidism in Europe

Oct 14, 2020: Amolyt Pharma doses first subject in phase 1 clinical trial of parathyroid hormone analog, AZP-3601, for Hypoparathyroidism

Sep 28, 2020: Ascendis Pharma announces preliminary six-month data from open-label extension of phase 2 PaTH forward trial and files IND amendment to initiate phase 3 PaTHway trial of TransCon PTH in adult hypoparathyroidism

Sep 21, 2020: BridgeBio Pharma's Calcilytix Therapeutics initiates phase 2 study of encaleret for Autosomal Dominant Hypocalcemia Type 1 (ADH1)

Sep 04, 2020: Ascendis Pharma announces presentations for TransCon PTH and hypoparathyroidism at 22nd European Congress of Endocrinology

Jul 07, 2020: ProLynx announces SBIR grant award to develop long-acting parathyroid hormone for hypo-parathyroidism

Apr 19, 2020: Ascendis Pharma announces top-line data from fixed dose portion of phase 2 trial demonstrating potential of TransCon PTH as a replacement therapy for Hypoparathyroidism

Nov 14, 2019: Ascendis Pharma expands TransCon PTH Phase 2 PaTH forward clinical trial to expedite enrollment of subjects previously treated with NATPARA in the United States

Oct 18, 2019: Leahy, Sanders, Welch urge FDA to swiftly resolve critical drug recall

Sep 23, 2019: Entera Bio reports positive results from a phase 2 PK/PD study of Oral PTH (1-34) in patients with Hypoparathyroidism

Sep 06, 2019: Takeda Issues US Recall of NATPARA (parathyroid hormone) for Injection Due to the Potential for Rubber Particulate

May 15, 2019: Takeda to highlight new research into the long-term complications of chronic hypoparathyroidism at the European Congress of Endocrinology 2019 Annual Meeting

Apr 24, 2019: Ascendis Pharma announces presentations related to TransCon PTH at

upcoming Medical Conferences

Mar 26, 2019: Takeda presents new data at the Endocrine Society's 2019 Annual Meeting about the patient burden and long-term impact of chronic hypoparathyroidism

Mar 26, 2019: Ascendis Pharma reports positive results from heiGHt trial
