Influenza A Virus, H3N2 Subtype Infections Drugs in Development by Stages, Target, MoA, RoA, Molecule Type and Key Players, 2022 Update

SUMMARY

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Influenza A Virus, H3N2 Subtype Infections - Drugs In Development, 2022, provides an overview of the Influenza A Virus, H3N2 Subtype Infections (Infectious Disease) pipeline landscape.

H3N2 infections are caused by variant H3N2 virus which is an influenza virus. Symptoms include cough, sore throat, runny or stuffy nose, chills, nausea, vomiting, and/or diarrhea. Risk factors include age, chronic medical conditions like asthma, diabetes, heart disease, weakened immune systems, and neurological or neurodevelopment conditions. Treatment includes antiviral medications and antibiotics.

REPORT HIGHLIGHTS

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Influenza A Virus, H3N2 Subtype Infections - Drugs In Development, 2022, provides comprehensive information on the therapeutics under development for Influenza A Virus, H3N2 Subtype Infections (Infectious Disease), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Influenza A Virus, H3N2 Subtype Infections (Infectious Disease) pipeline guide also reviews of key players involved in therapeutic development for Influenza A Virus, H3N2 Subtype Infections and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies/Universities/Institutes, the molecules developed by Companies in Pre-Registration, Phase III, Phase II, Phase I, Preclinical and Discovery stages are 5, 7, 11, 5, 15 and 4 respectively. Similarly, the Universities portfolio in Phase III, Phase I and Preclinical stages comprises 3, 1 and 3 molecules, respectively.

Influenza A Virus, H3N2 Subtype Infections (Infectious Disease) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The pipeline guide provides a snapshot of the global therapeutic landscape of Influenza A Virus, H3N2 Subtype Infections (Infectious Disease).

The pipeline guide reviews pipeline therapeutics for Influenza A Virus, H3N2 Subtype Infections (Infectious Disease) by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Influenza A Virus, H3N2 Subtype Infections (Infectious Disease) therapeutics and enlists all their major and minor projects.

The pipeline guide evaluates Influenza A Virus, H3N2 Subtype Infections (Infectious Disease) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Influenza A Virus, H3N2 Subtype Infections (Infectious Disease)

REASONS TO BUY

Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

Find and recognize significant and varied types of therapeutics under development for Influenza A Virus, H3N2 Subtype Infections (Infectious Disease).

Classify potential new clients or partners in the target demographic.

Develop tactical initiatives by understanding the focus areas of leading companies.

Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.

Formulate corrective measures for pipeline projects by understanding Influenza A Virus, H3N2 Subtype Infections (Infectious Disease) pipeline depth and focus of Indication therapeutics.

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope.

Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.

Featured News & Press Releases

Mar 15, 2022: First Participants dosed in phase 2a study of pan-antiviral nasal spray

Jan 05, 2022: Zosano Pharma announces publication of clinical data demonstrating comparable immunogenicity of a Trivalent Influenza Vaccine formulated on its transdermal microneedle system versus an intramuscular injection of the vaccine at a higher dose

Aug 31, 2021: FLUMIST QUADRIVALENT (Influenza Vaccine Live, Intranasal) vaccine now available in the US for annual flu season

Aug 02, 2021: FluGen announces publication of positive results from phase 2 human challenge study of its M2SR vaccine candidate against highly drifted strain of H3N2 influenza virus

Jul 01, 2021: FluGen awarded US Department of Defense funding to conduct clinical study evaluating investigational M2SR flu vaccine and current standard-of-care high dose vaccine

May 25, 2021: FluGen initiates NIH-funded trial of M2SR flu vaccine; first study in adults up to age

Aug 13, 2020: AstraZeneca ships FLUMIST QUADRIVALENT Vaccine in the US for

2020-2021 Flu Season

Feb 25, 2020: Novavax' Preclinical NanoFlu Data published in vaccines; details structural basis for broadly neutralizing immunity

Nov 04, 2019: Sanofi: FDA approves Fluzone High-Dose Quadrivalent (Influenza Vaccine) for adults 65 years of age and older

Oct 16, 2019: Novavax begins Phase III clinical trial for influenza vaccine NanoFlu

Jun 27, 2019: Novavax confirms accelerated approval pathway available for licensure of Nanoflu

Feb 12, 2019: FluGen's M2SR Influenza Vaccine succeeds in phase 2 human challenge trial against a highly mismatched virus

Jan 03, 2019: Novavax announces positive phase 2 NanoFlu results in older adults

Dec 05, 2018: Next generation cell-based influenza vaccine shows significantly greater effectiveness compared to standard egg-based options in the 2017-18 US Influenza Season

Nov 16, 2018: Seqirus announces U.S. \$140 Million manufacturing expansion to meet growing demand for innovative cell-based influenza vaccines
