Abstracts

Insulin Like Growth Factor II - Pipeline Review, H2 2020

SUMMARY

According to the recently published report 'Insulin Like Growth Factor II - Pipeline Review, H2 2020'; Insulin Like Growth Factor II (Somatomedin A or T3M 11 Derived Growth Factor or IGF2) pipeline Target constitutes close to 7 molecules. Out of which approximately 2 molecules are developed by companies and remaining by the universities/institutes.

Insulin Like Growth Factor II (Somatomedin A or T3M 11 Derived Growth Factor or IGF2) - Insulin-like growth factor 2 (IGF-2) is a protein hormone. IGF-2 is influenced by placental lactogen and plays a role in fetal development. It undergoes glucose-mediated co-secretion with insulin and acts as physiological amplifier of glucose-mediated insulin secretion. It exhibits osteogenic properties by increasing osteoblast mitogenic activity through phosphoactivation of MAPK1 and MAPK3.

The report 'Insulin Like Growth Factor II - Pipeline Review, H2 2020' outlays comprehensive information on the Insulin Like Growth Factor II (Somatomedin A or T3M 11 Derived Growth Factor or IGF2) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type; that are being developed by Companies/Universities.

It also reviews key players involved in Insulin Like Growth Factor II (Somatomedin A or T3M 11 Derived Growth Factor or IGF2) targeted therapeutics development with respective active and dormant or discontinued projects. Currently, The molecules

developed by companies in Phase II stages are 2 respectively. Similarly, the universities portfolio in Preclinical and Discovery stages comprises 3 and 2 molecules, respectively. Report covers products from therapy areas Oncology, Cardiovascular and Central Nervous System which include indications Acute Ischemic Stroke, Alzheimer's Disease, Amyotrophic Lateral Sclerosis, Breast Cancer, Huntington Disease, Metastatic Breast Cancer, Metastatic Hormone Refractory (Castration Resistant, Androgen-Independent) Prostate Cancer, Multiple Sclerosis, Non-Small Cell Lung Cancer and Solid Tumor.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Insulin Like Growth Factor II (Somatomedin A or T3M 11 Derived Growth Factor or IGF2)

The report reviews Insulin Like Growth Factor II (Somatomedin A or T3M 11 Derived Growth Factor or IGF2) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Insulin Like Growth Factor II (Somatomedin A or T3M 11 Derived Growth Factor or IGF2) targeted therapeutics and enlists all their major and minor projects

The report assesses Insulin Like Growth Factor II (Somatomedin A or T3M 11 Derived Growth Factor or IGF2) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Insulin Like Growth Factor II (Somatomedin A or T3M 11 Derived Growth Factor or IGF2) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Insulin Like Growth Factor II (Somatomedin A or T3M 11 Derived Growth Factor or IGF2) Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Insulin Like Growth Factor II (Somatomedin A or T3M 11 Derived Growth Factor or IGF2) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Contents

Introduction

Global Markets Direct Report Coverage

Insulin Like Growth Factor II (Somatomedin A or T3M 11 Derived Growth Factor or IGF2) - Overview

Insulin Like Growth Factor II (Somatomedin A or T3M 11 Derived Growth Factor or IGF2) - Therapeutics Development
