## **Abstracts**

Integrin Alpha V (Vitronectin Receptor Subunit Alpha or CD51 or ITGAV) - Pipeline Review, H1 2018

### **SUMMARY**

According to the recently published report 'Integrin Alpha V - Pipeline Review, H1 2018'; Integrin Alpha V (Vitronectin Receptor Subunit Alpha or CD51 or ITGAV) pipeline Target constitutes close to 28 molecules. Out of which approximately 22 molecules are developed by companies and remaining by the universities/institutes.

Integrin Alpha V (Vitronectin Receptor Subunit Alpha or CD51 or ITGAV) - Integrin alpha-V is a protein encoded by the ITGAV gene. Alpha-V integrins are receptors for vitronectin, cytotactin, fibronectin, fibrinogen, laminin, matrix metalloproteinase-2, osteopontin, osteomodulin, prothrombin, thrombospondin and vWF. The encoded preproprotein is proteolytically processed to generate light and heavy chains that comprise the alpha V subunit. This subunit associates with beta 1, beta 3, beta 5, beta 6 and beta 8 subunits. The heterodimer consisting of alpha V and beta 3 subunits is also known as the vitronectin receptor. This integrin regulate angiogenesis and cancer progression.

The report 'Integrin Alpha V - Pipeline Review, H1 2018' outlays comprehensive information on the Integrin Alpha V (Vitronectin Receptor Subunit Alpha or CD51 or ITGAV) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type; that are being developed by Companies/Universities.

It also reviews key players involved in Integrin Alpha V (Vitronectin Receptor Subunit Alpha or CD51 or ITGAV) targeted therapeutics development with respective active and dormant or discontinued projects. Currently, The molecules developed by companies in Phase II, Phase I and Preclinical stages are 5, 1 and 16 respectively. Similarly, the universities portfolio in Preclinical stages comprises 6 molecules, respectively.

Report covers products from therapy areas Oncology, Ophthalmology, Metabolic Disorders, Musculoskeletal Disorders, Dermatology, Gastrointestinal, Infectious Disease, Respiratory and Cardiovascular which include indications Fibrosis, Wet (Neovascular/Exudative) Macular Degeneration, Breast Cancer, Diabetic Nephropathy, Diabetic Retinopathy, Glioblastoma Multiforme (GBM), Idiopathic Pulmonary Fibrosis, Pancreatic Cancer, Wounds, Age Related Macular Degeneration, Cardiovascular Disease, Diabetic Macular Edema, Genital Warts (Condylomata Acuminata), Liver Fibrosis, Malabsorption Syndrome, Melanoma, Metastatic Colorectal Cancer, Metastatic Melanoma, Multiple Myeloma (Kahler Disease), Retinal Vein Occlusion, Sepsis and Venous Leg Ulcers (Crural ulcer).

**Note:** Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

## SCOPE

The report provides a snapshot of the global therapeutic landscape for Integrin Alpha V (Vitronectin Receptor Subunit Alpha or CD51 or ITGAV)

The report reviews Integrin Alpha V (Vitronectin Receptor Subunit Alpha or CD51 or ITGAV) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Integrin Alpha V (Vitronectin

Receptor Subunit Alpha or CD51 or ITGAV) targeted therapeutics and enlists all their major and minor projects

The report assesses Integrin Alpha V (Vitronectin Receptor Subunit Alpha or CD51 or ITGAV) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Integrin Alpha V (Vitronectin Receptor Subunit Alpha or CD51 or ITGAV) targeted therapeutics

## **REASONS TO BUY**

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Integrin Alpha V (Vitronectin Receptor Subunit Alpha or CD51 or ITGAV)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Integrin Alpha V (Vitronectin Receptor Subunit Alpha or CD51 or ITGAV) development landscape

Develop and design in-licensing and out-licensing strategies by identifying

prospective partners with the most attractive projects to enhance and expand business potential and scope

## Contents

Introduction

Global Markets Direct Report Coverage
