Integrin Beta 1 (Fibronectin Receptor Subunit Beta or Glycoprotein Iia or VLA 4 Subunit Beta or CD29 or ITGB1) - Pipeline Review, H2 2018

SUMMARY

Integrin Beta 1 (Fibronectin Receptor Subunit Beta or Glycoprotein Iia or VLA 4 Subunit Beta or CD29 or ITGB1) pipeline Target constitutes close to 21 molecules. Out of which approximately 19 molecules are developed by companies and remaining by the universities/institutes. The latest report Integrin Beta 1 - Pipeline Review, H2 2018, outlays comprehensive information on the Integrin Beta 1 (Fibronectin Receptor Subunit Beta or Glycoprotein Iia or VLA 4 Subunit Beta or CD29 or ITGB1) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type.

Integrin Beta 1 (Fibronectin Receptor Subunit Beta or Glycoprotein Iia or VLA 4 Subunit Beta or CD29 or ITGB1) - Integrin beta-1 also known as CD29 is a protein encoded by the ITGB1 gene. It is involved in up-regulation of the activity of kinases such as PKC via binding to KRT1. It plays a mechanistic adhesive role during telophase. Integrin alpha-3/beta-1 provides a docking site for FAP at invadopodia plasma membranes in a collagen-dependent manner and participates in the adhesion, formation of invadopodia and matrix degradation processes, promoting cell invasion.

The molecules developed by companies in Phase II, Phase I, Preclinical and Discovery stages are 2, 1, 11 and 5 respectively. Similarly, the universities portfolio in Preclinical stages comprises 2 molecules, respectively. Report covers products from therapy areas

Musculoskeletal Disorders, Genetic Disorders, Oncology, Ophthalmology, Immunology, Cardiovascular, Gastrointestinal, Infectious Disease and Respiratory which include indications Muscular Dystrophy, Duchenne Muscular Dystrophy, Rheumatoid Arthritis, Wet (Neovascular/Exudative) Macular Degeneration, Arterial Thrombosis, Breast Cancer, Ebolavirus Infections (Ebola Hemorrhagic Fever), Fibrosis, Idiopathic Pulmonary Fibrosis, Keratoconjunctivitis Sicca (Dry Eye), Liver Fibrosis, Metastatic Melanoma, Prostate Cancer and Solid Tumor.

Furthermore, this report also reviews key players involved in Integrin Beta 1 (Fibronectin Receptor Subunit Beta or Glycoprotein Iia or VLA 4 Subunit Beta or CD29 or ITGB1) targeted therapeutics development with respective active and dormant or discontinued projects. Driven by data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Integrin Beta 1 (Fibronectin Receptor Subunit Beta or Glycoprotein Iia or VLA 4 Subunit Beta or CD29 or ITGB1)

The report reviews Integrin Beta 1 (Fibronectin Receptor Subunit Beta or Glycoprotein Iia or VLA 4 Subunit Beta or CD29 or ITGB1) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Integrin Beta 1 (Fibronectin Receptor Subunit Beta or Glycoprotein Iia or VLA 4 Subunit Beta or CD29 or ITGB1)

targeted therapeutics and enlists all their major and minor projects

The report assesses Integrin Beta 1 (Fibronectin Receptor Subunit Beta or Glycoprotein Iia or VLA 4 Subunit Beta or CD29 or ITGB1) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Integrin Beta 1 (Fibronectin Receptor Subunit Beta or Glycoprotein Iia or VLA 4 Subunit Beta or CD29 or ITGB1) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Integrin Beta 1 (Fibronectin Receptor Subunit Beta or Glycoprotein Iia or VLA 4 Subunit Beta or CD29 or ITGB1) Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Integrin Beta 1 (Fibronectin Receptor Subunit Beta or Glycoprotein Iia or VLA 4 Subunit Beta or CD29 or ITGB1) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Contents

Introduction

Global Markets Direct Report Coverage

Integrin Beta 1 (Fibronectin Receptor Subunit Beta or Glycoprotein IIA or VLA 4 Subunit Beta or CD29 or ITGB1) - Overview

Integrin Beta 1 (Fibronectin Receptor Subunit Beta or Glycoprotein IIA or VLA 4 Subunit Beta or CD29 or ITGB1) - Therapeutics Development

Products under Development by Stage of Development

Products under Development by Therapy Area

Products under Development by Indication

Products under Development by Companies

Products under Development by Universities/Institutes

Integrin Beta 1 (Fibronectin Receptor Subunit Beta or Glycoprotein IIA or VLA 4 Subunit Beta or CD29 or ITGB1) - Therapeutics Assessment

Assessment by Mechanism of Action

Assessment by Route of Administration

Assessment by Molecule Type

Integrin Beta 1 (Fibronectin Receptor Subunit Beta or Glycoprotein IIA or VLA 4 Subunit Beta or CD29 or ITGB1) - Companies Involved in Therapeutics Development

Avipero Ltd

Bausch Health Companies Inc

Pliant Therapeutics Inc

Strykagen Corp

Tasly Pharmaceutical Group Co Ltd
