## Abstracts

Interleukin 1 (IL1) - Pipeline Review, H1 2018

### SUMMARY

According to the recently published report 'Interleukin 1 (IL1) - Pipeline Review, H1 2018'; Interleukin 1 (IL1) pipeline Target constitutes close to 22 molecules. Out of which approximately 21 molecules are developed by companies and remaining by the universities/institutes.

Interleukin 1 (IL1) - Interleukin-1 is a cytokine which plays an important role regulation of immune and inflammatory responses. It helps leukocytes pass through blood vessel walls to sites of infection and causes fever by affecting areas of the brain that control body temperature. There are two forms of interleukin-1, alpha and beta. IL-1 stimulates thymocyte proliferation by inducing IL-2 release, B-cell maturation and proliferation, and fibroblast growth factor activity.

The report 'Interleukin 1 (IL1) - Pipeline Review, H1 2018' outlays comprehensive information on the Interleukin 1 (IL1) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type; that are being developed by Companies/Universities.

It also reviews key players involved in Interleukin 1 (IL1) targeted therapeutics development with respective active and dormant or discontinued projects. Currently, The molecules developed by companies in Pre-Registration, Filing rejected/Withdrawn, Phase III, Phase II, Phase I, Preclinical and Discovery stages are 1, 1, 1, 6, 1, 10 and 1 respectively. Similarly, the universities portfolio in Preclinical stages comprises 1 molecules, respectively.

Report covers products from therapy areas Cardiovascular, Immunology, Metabolic Disorders, Oncology, Dermatology, Musculoskeletal Disorders, Ear Nose Throat Disorders, Gastrointestinal, Genetic Disorders, Central Nervous System and Genito Urinary System And Sex Hormones which include indications Gouty Arthritis (Gout), Non-Small Cell Lung Cancer, Epidermolysis Bullosa, Inflammation, Atherosclerosis, Behcet Disease, Familial Mediterranean Fever, Type 2 Diabetes, Acne Vulgaris, Atopic Dermatitis, Autoimmune Disorders, Bladder Cancer, Bullous Pemphigoid, Cancer Anorexia-Cachexia Syndrome, Cardiovascular Risk Factors, Cervical Cancer, Colorectal Cancer, Diabetes, Esophageal Cancer, Fallopian Tube Cancer, Hearing Disorders, Hidradenitis Suppurativa, Hypercholesterolemia, Inflammatory Bowel Disease, Kidney Fibrosis, Liver Fibrosis, Lymphoma, Metastatic Colorectal Cancer, Mevalonate Kinase Deficiency (Hyperimmunoglobulin D Syndrome (HIDS)), Muckle-Wells Syndrome, Myocardial Infarction, Neonatal Onset Multisystem Inflammatory Disease, Ovarian Cancer, Pain, Pancreatic Cancer, Pericarditis, Plaque Psoriasis (Psoriasis Vulgaris), Prostate Cancer, Restenosis, Rheumatoid Arthritis, Rhinitis, Sarcoidosis, Skin Inflammation, Skin Ulcers, Systemic Idiopathic Juvenile Arthritis and Tumor Necrosis Factor Receptor-Associated Periodic Syndrome (Familial Hibernian Fever).

**Note:** Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

## SCOPE

The report provides a snapshot of the global therapeutic landscape for Interleukin 1 (IL1)

The report reviews Interleukin 1 (IL1) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Interleukin 1 (IL1) targeted

therapeutics and enlists all their major and minor projects

The report assesses Interleukin 1 (IL1) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Interleukin 1 (IL1) targeted therapeutics

## **REASONS TO BUY**

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Interleukin 1 (IL1)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Interleukin 1 (IL1) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

## Contents

Introduction

Global Markets Direct Report Coverage

Interleukin 1 (IL1) - Overview

Interleukin 1 (IL1) - Therapeutics Development

Products under Development by Stage of Development

Products under Development by Therapy Area

Products under Development by Indication

Products under Development by Companies

Products under Development by Universities/Institutes

Interleukin 1 (IL1) - Therapeutics Assessment

Assessment by Mechanism of Action

Assessment by Route of Administration

Assessment by Molecule Type

Interleukin 1 (IL1) - Companies Involved in Therapeutics Development

Apexigen Inc

Exicure Inc

Immune Response BioPharma Inc

Moderna Therapeutics Inc

Novartis AG

Omnitura Therapeutics Inc

Opsona Therapeutics Ltd
