Islet Amyloid Polypeptide (Amylin or Diabetes Associated Peptide or Insulinoma Amyloid Peptide or IAPP) - Pipeline Review, H2 2018

SUMMARY

Islet Amyloid Polypeptide (Amylin or Diabetes Associated Peptide or Insulinoma Amyloid Peptide or IAPP) pipeline Target constitutes close to 13 molecules. Out of which approximately 10 molecules are developed by companies and remaining by the universities/institutes. The latest report Islet Amyloid Polypeptide - Pipeline Review, H2 2018, outlays comprehensive information on the Islet Amyloid Polypeptide (Amylin or Diabetes Associated Peptide or Insulinoma Amyloid Peptide or IAPP) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type.

Islet Amyloid Polypeptide (Amylin or Diabetes Associated Peptide or Insulinoma Amyloid Peptide or IAPP) - Islet amyloid polypeptide (IAPP) or Amylin is a peptide hormone. This hormone is released from pancreatic beta cells following food intake to regulate blood glucose levels and act as a satiation signal. It inhibits insulin-stimulated glucose utilization and glycogen deposition in muscle. The molecules developed by companies in Phase II, Phase I and Preclinical stages are 1, 4 and 5 respectively.

Similarly, the universities portfolio in Preclinical and Discovery stages comprises 2 and 1 molecules, respectively. Report covers products from therapy areas Metabolic Disorders, Central Nervous System, Gastrointestinal and Musculoskeletal Disorders which include indications Type 2 Diabetes, Obesity, Type 1 Diabetes (Juvenile

Diabetes), Alzheimer's Disease, Non-Alcoholic Steatohepatitis (NASH), Non Alcoholic Fatty Liver Disease (NAFLD), Osteoarthritis and Parkinson's Disease.

Furthermore, this report also reviews key players involved in Islet Amyloid Polypeptide (Amylin or Diabetes Associated Peptide or Insulinoma Amyloid Peptide or IAPP) targeted therapeutics development with respective active and dormant or discontinued projects. Driven by data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Islet Amyloid Polypeptide (Amylin or Diabetes Associated Peptide or Insulinoma Amyloid Peptide or IAPP)

The report reviews Islet Amyloid Polypeptide (Amylin or Diabetes Associated Peptide or Insulinoma Amyloid Peptide or IAPP) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Islet Amyloid Polypeptide (Amylin or Diabetes Associated Peptide or Insulinoma Amyloid Peptide or IAPP) targeted therapeutics and enlists all their major and minor projects

The report assesses Islet Amyloid Polypeptide (Amylin or Diabetes Associated Peptide or Insulinoma Amyloid Peptide or IAPP) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Islet Amyloid Polypeptide (Amylin or Diabetes Associated Peptide or Insulinoma Amyloid Peptide or IAPP) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Islet Amyloid Polypeptide (Amylin or Diabetes Associated Peptide or Insulinoma Amyloid Peptide or IAPP)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Islet Amyloid Polypeptide (Amylin or Diabetes Associated Peptide or Insulinoma Amyloid Peptide or IAPP) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Contents

Introduction

Global Markets Direct Report Coverage

Islet Amyloid Polypeptide (Amylin or Diabetes Associated Peptide or Insulinoma Amyloid Peptide or IAPP) - Overview

Islet Amyloid Polypeptide (Amylin or Diabetes Associated Peptide or Insulinoma Amyloid Peptide or IAPP) - Therapeutics Development

Products under Development by Stage of Development

Products under Development by Therapy Area

Products under Development by Indication

Products under Development by Companies

Products under Development by Universities/Institutes

Islet Amyloid Polypeptide (Amylin or Diabetes Associated Peptide or Insulinoma Amyloid Peptide or IAPP) - Therapeutics Assessment

Assessment by Mechanism of Action

Assessment by Route of Administration

Assessment by Molecule Type

Islet Amyloid Polypeptide (Amylin or Diabetes Associated Peptide or Insulinoma Amyloid Peptide or IAPP) - Companies Involved in Therapeutics Development

Adocia SAS

AstraZeneca Plc

Boehringer Ingelheim GmbH

Eli Lilly and Co

Neurimmune Holding AG

Nordic Bioscience AS

Prothena Corp Plc

reMYND NV

Islet Amyloid Polypeptide (Amylin or Diabetes Associated Peptide or Insulinoma Amyloid Peptide or IAPP) - Drug Profiles

(insulin human + pramlintide acetate) - Drug Profile
