Klebsiella Pneumoniae Infections Drugs in Development by Stages, Target, MoA, RoA, Molecule Type and Key Players, 2022 Update

SUMMARY

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Klebsiella pneumoniae Infections - Drugs In Development, 2022, provides an overview of the Klebsiella pneumoniae Infections (Infectious Disease) pipeline landscape.

Klebsiella pneumoniae is a Gram-negative bacteria. A Klebsiella pneumoniae infection is caused when the organism is able to enter the lungs. A Klebsiella pneumoniae infection is very common in patients with underlying diseases like diabetes, chronic lung diseases and chronic alcoholics. It is mostly a nosocomial infection that occurs in hospitalized patients with weakened immune system. Symptoms include necrosis, inflammation, hemorrhage, chills, dizziness, high fever, head ache and chest pain. Treatment includes antibiotics and hygiene lifestyle.

REPORT HIGHLIGHTS

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Klebsiella pneumoniae Infections - Drugs In Development, 2022, provides comprehensive information on the therapeutics under development for Klebsiella pneumoniae Infections (Infectious Disease), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research

and development history and latest news and press releases.

The *Klebsiella pneumoniae* Infections (Infectious Disease) pipeline guide also reviews of key players involved in therapeutic development for *Klebsiella pneumoniae* Infections and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies/Universities/Institutes, the molecules developed by Companies in Pre-Registration, Phase II, Phase I, IND/CTA Filed, Preclinical, Discovery and Unknown stages are 1, 1, 1, 1, 42, 12 and 1 respectively. Similarly, the Universities portfolio in Preclinical and Discovery stages comprises 6 and 3 molecules, respectively.

Klebsiella pneumoniae Infections (Infectious Disease) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The pipeline guide provides a snapshot of the global therapeutic landscape of *Klebsiella pneumoniae* Infections (Infectious Disease).

The pipeline guide reviews pipeline therapeutics for *Klebsiella pneumoniae* Infections (Infectious Disease) by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Klebsiella pneumoniae Infections (Infectious Disease) therapeutics and enlists all their major and minor projects.

The pipeline guide evaluates Klebsiella pneumoniae Infections (Infectious Disease) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Klebsiella pneumoniae Infections (Infectious Disease)

REASONS TO BUY

Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

Find and recognize significant and varied types of therapeutics under development for Klebsiella pneumoniae Infections (Infectious Disease).

Classify potential new clients or partners in the target demographic.

Develop tactical initiatives by understanding the focus areas of leading companies.

Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.

Formulate corrective measures for pipeline projects by understanding Klebsiella pneumoniae Infections (Infectious Disease) pipeline depth and focus of Indication therapeutics.

Develop and design in-licensing and out-licensing strategies by identifying

prospective partners with the most attractive projects to enhance and expand business potential and @Scope.

Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.

Featured News & Press Releases

Jul 07, 2020: Data published in Ebiomedicine validates novel scientific approach that disarms bacterial defenses to treat or prevent life-threatening infections

Sep 05, 2019: Summit presented in vivo proof of concept data for targeted Enterobacteriaceae antibiotics at ASM/ESCMID Conference

Aug 27, 2019: Vaccine against deadly superbug Klebsiella effective in mice

Aug 20, 2019: Vaxxilon receives grant to develop new prophylactic vaccine

Jul 02, 2019: Appili Therapeutics signs \$3M USD grant contract with the United States Department of Defense to develop antibiotics that target superbugs

Apr 03, 2019: Summit's pipeline expands with series of new mechanism antibiotics targeting Enterobacteriaceae

May 07, 2018: Melinta Therapeutics Receives Up to \$6.2 Million from CARB-X to Advance Clinical Development of a Novel Antimicrobial to Combat Antibiotic-Resistant Bacteria

Apr 17, 2018: Arsanis to Present Abstract On ASN300 At The 28th European Congress of Clinical Microbiology And Infectious Diseases

Nov 07, 2017: Appili Therapeutics Receives \$1.2M USD from the Department of Defense to Advance Antibiotic Targeting Drug-Resistant Bacteria

Sep 30, 2017: Development of a negamycin analogue targeting the translational machinery in gram-negative drug-resistant pathogens for the treatment of Infections

Apr 20, 2017: Arsanis Presents Data on ASN-300 at the 27th European Congress of Clinical Microbiology and Infectious Diseases

Apr 11, 2017: Appili Therapeutics Receives Funding from the Government of Canada to Support Development of New Antibiotic To Treat Gram-Negative Infections

Jun 17, 2016: Arsanis Presents Data at ASM Microbe 2016 Demonstrating Protection Against *Klebsiella pneumoniae* using Monoclonal Antibody Technology

Mar 09, 2015: Phico Therapeutics Receives Translation Award to Advance its SASPject PT4 Aimed at *Escherichia coli* and *Klebsiella pneumoniae* Towards Clinical Trials
