Abstracts

Leptin Receptor (HuB219 or OB Receptor or CD295 or LEPR) - Pipeline Review, H1 2019

SUMMARY

According to the recently published report 'Leptin Receptor - Pipeline Review, H1 2019'; Leptin Receptor (HuB219 or OB Receptor or CD295 or LEPR) pipeline Target constitutes close to 7 molecules.

Leptin Receptor (HuB219 or OB Receptor or CD295 or LEPR) - Leptin receptor or LEP-R is a protein encoded by the LEPR gene. It acts as a receptor for hormone LEP/leptin. Upon binding it mediates LEP central and peripheral effects through the activation of different signaling pathways such as JAK2/STAT3 and MAPK cascade. LEP acts as an appetite-regulating factor that induces a decrease in food intake and an increase in energy consumption by inducing anorexigenic factors and suppressing orexigenic neuropeptides also regulates bone mass and secretion of hypothalamo-pituitary-adrenal hormones. In the periphery increases basal metabolism, influences reproductive function, regulates pancreatic beta-cell function and insulin secretion, is pro-angiogenic and affects innate and adaptive immunity.

The report 'Leptin Receptor - Pipeline Review, H1 2019' outlays comprehensive information on the Leptin Receptor (HuB219 or OB Receptor or CD295 or LEPR) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type; that are being developed by Companies/Universities.

It also reviews key players involved in Leptin Receptor (HuB219 or OB Receptor or CD295 or LEPR) targeted therapeutics development with respective active and dormant or discontinued projects. Currently, The molecules developed by companies in Phase I and Preclinical stages are 1 and 6 respectively. Report covers products from therapy areas Metabolic Disorders, Central Nervous System, Oncology and Ophthalmology which include indications Obesity, Lipodystrophy (Lipoatrophy), Alzheimer's Disease, Breast Cancer, Choroidal Neovascularization, Type 1 Diabetes (Juvenile Diabetes) and Type 2 Diabetes.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Leptin Receptor (HuB219 or OB Receptor or CD295 or LEPR)

The report reviews Leptin Receptor (HuB219 or OB Receptor or CD295 or LEPR) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Leptin Receptor (HuB219 or OB Receptor or CD295 or LEPR) targeted therapeutics and enlists all their major and minor projects

The report assesses Leptin Receptor (HuB219 or OB Receptor or CD295 or LEPR) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Leptin Receptor (HuB219 or OB Receptor or CD295 or LEPR) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Leptin Receptor (HuB219 or OB Receptor or CD295 or LEPR)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Leptin Receptor (HuB219 or OB Receptor or CD295 or LEPR) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope
