Low Back Pain Drugs in Development by Stages, Target, MoA, RoA, Molecule Type and Key Players, 2022 Update

SUMMARY

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Low Back Pain - Drugs In Development, 2022, provides an overview of the Low Back Pain (Central Nervous System) pipeline landscape.

Low back pain can happen anywhere below the ribs and above the legs. Causes of low back pain include overuse, strain, or injury, aging, arthritis, illness and cancer involving the spine. Symptoms include tingling or burning sensation, a dull achy feeling, or sharp pain and weakness in legs or feet. Treatment includes pain medications such NSAIDs (non-steroidal anti-inflammatory drugs) or opioids and muscle relaxants.

REPORT HIGHLIGHTS

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Low Back Pain - Drugs In Development, 2022, provides comprehensive information on the therapeutics under development for Low Back Pain (Central Nervous System), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Low Back Pain (Central Nervous System) pipeline guide also reviews of key players involved in therapeutic development for Low Back Pain and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies/Universities/Institutes, the molecules developed by Companies in Pre-Registration, Phase III, Phase II, Phase I, Preclinical, Discovery and Unknown stages are 1, 7, 17, 8, 9, 3 and 2 respectively. Similarly, the Universities portfolio in Preclinical and Discovery stages comprises 1 and 1 molecules, respectively.

Low Back Pain (Central Nervous System) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The pipeline guide provides a snapshot of the global therapeutic landscape of Low Back Pain (Central Nervous System).

The pipeline guide reviews pipeline therapeutics for Low Back Pain (Central Nervous System) by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Low Back Pain (Central Nervous System) therapeutics and enlists all their major and minor projects.

The pipeline guide evaluates Low Back Pain (Central Nervous System) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Low Back Pain (Central Nervous System)

REASONS TO BUY

Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

Find and recognize significant and varied types of therapeutics under development for Low Back Pain (Central Nervous System).

Classify potential new clients or partners in the target demographic.

Develop tactical initiatives by understanding the focus areas of leading companies.

Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.

Formulate corrective measures for pipeline projects by understanding Low Back Pain (Central Nervous System) pipeline depth and focus of Indication therapeutics.

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and @Scope.

Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.

Featured News & Press Releases

Jun 30, 2022: BioRestorative Therapies announces first patient enrolled for the company's phase 2 clinical trial to treat chronic lumbar disc disease (cLDD)

Jun 22, 2022: BioRestorative Therapies announces clinical trial contract with second site for the company's phase 2 clinical trial to treat chronic lumbar disc disease (cLDD)

Jun 13, 2022: BioRestorative Therapies announces clinical site initiation for the company's phase 2 clinical trial to treat chronic lumbar disc disease (cLDD)

Apr 29, 2022: BioRestorative Therapies hosts principal investigator meeting for its BRTX-100 phase 2 clinical trial to treat chronic lumbar disc disease

Apr 18, 2022: BioRestorative Therapies announces selection of 10 clinical sites for its phase 2 clinical trial to treat chronic lumbar disc disease

Apr 04, 2022: BioRestorative Therapies announces cGMP Cell Manufacturing Facility Certification

Feb 16, 2022: BioRestorative Therapies announces notice of allowance on key patent for its BRTX-100 disc program

Feb 07, 2022: BioRestorative Therapies announces it has initiated its phase 2 clinical trial to treat chronic lumbar disc disease

Jan 04, 2022: BioRestorative Therapies awarded an STTR phase I grant to explore the

therapeutic effects of PEG-Peptide hydrogel-encapsulated hypoxic bone marrow stem cells

Aug 20, 2021: Notification of application for manufacturing and marketing approval of the additional indications of “low back pain, humeroscapular periarthritis, cervico-omobrachial syndrome and tenosynovitis” for ZICTHORU Tapes (Transdermal, pain treatment NSAID patch, development code: HP-3150) in Japan

Aug 19, 2021: BioRestorative Therapies awarded one of top 10 spine device companies by MedTech Outlook

Jun 30, 2021: Mesoblast provides update on program for chronic low back pain due to degenerative disc disease

Feb 17, 2021: AnGes’ phase 1b results of NF-kappa B Oligo DNA Decoy administration in subjects with chronic discogenic low back pain support advancement into phase 2 clinical study

Feb 10, 2021: Mesoblast phase 3 trial shows that a single injection of Rexlemestrocet-L + Hyaluronic Acid carrier results in at least two years of pain reduction with opioid sparing activity in patients with chronic low back pain due to degenerative disc disease

Dec 07, 2020: Notification of the results of Phase clinical study of HP-3150 for “low back pain, humeroscapular periarthritis, cervico-omobrachial syndrome and tenosynovitis” in Japan (transdermal, pain treatment NSAID patch)
