Abstracts

Melanocyte Protein PMEL (ME20M or Melanocyte Protein Pmel 17 or Melanocytes Lineage Specific Antigen GP100 or Melanoma Associated ME20 Antigen or P1 or P100 or Premelanosome Protein or Silver Locus Protein Homolog or PMEL) - Pipeline Review, H2 2017

SUMMARY

According to the recently published report 'Melanocyte Protein PMEL - Pipeline Review, H2 2017'; Melanocyte Protein PMEL (ME20M or Melanocyte Protein Pmel 17 or Melanocytes Lineage Specific Antigen GP100 or Melanoma Associated ME20 Antigen or P1 or P100 or Premelanosome Protein or Silver Locus Protein Homolog or PMEL) pipeline Target constitutes close to 5 molecules. Out of which approximately 4 molecules are developed by companies and remaining by the universities/institutes.

Melanocyte Protein PMEL (ME20M or Melanocyte Protein Pmel 17 or Melanocytes Lineage Specific Antigen GP100 or Melanoma Associated ME20 Antigen or P1 or P100 or Premelanosome Protein or Silver Locus Protein Homolog or PMEL) - Melanocyte protein PMEL also known as premelanosome protein (PMEL) is a protein encoded by the PMEL gene. This protein is involved in generating internal matrix fibers that define the transition from Stage I to Stage II melanosomes. This protein undergoes a complex

pattern of posttranslational processing and modification that is essential to the proper functioning of the protein.

The report 'Melanocyte Protein PMEL - Pipeline Review, H2 2017' outlays comprehensive information on the Melanocyte Protein PMEL (ME20M or Melanocyte Protein Pmel 17 or Melanocytes Lineage Specific Antigen GP100 or Melanoma Associated ME20 Antigen or P1 or P100 or Premelanosome Protein or Silver Locus Protein Homolog or PMEL) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type; that are being developed by Companies/Universities.

It also reviews key players involved in Melanocyte Protein PMEL (ME20M or Melanocyte Protein Pmel 17 or Melanocytes Lineage Specific Antigen GP100 or Melanoma Associated ME20 Antigen or P1 or P100 or Premelanosome Protein or Silver Locus Protein Homolog or PMEL) targeted therapeutics development with respective active and dormant or discontinued projects. Currently, The molecules developed by companies in Phase II, Phase I and Preclinical stages are 1, 1 and 2 respectively. Similarly, the universities portfolio in Phase I stages comprises 1 molecules, respectively. Report covers products from therapy areas Oncology which include indications Glioblastoma Multiforme (GBM), Melanoma and Metastatic Melanoma.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Melanocyte Protein PMEL (ME20M or Melanocyte Protein Pmel 17 or Melanocytes Lineage Specific Antigen GP100 or Melanoma Associated ME20 Antigen or P1 or P100 or Premelanosome Protein or Silver Locus Protein Homolog or PMEL)

The report reviews Melanocyte Protein PMEL (ME20M or Melanocyte Protein Pmel 17 or Melanocytes Lineage Specific Antigen GP100 or Melanoma Associated ME20 Antigen or P1 or P100 or Premelanosome Protein or Silver Locus Protein Homolog or PMEL) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Melanocyte Protein PMEL (ME20M or Melanocyte Protein Pmel 17 or Melanocytes Lineage Specific Antigen GP100 or Melanoma Associated ME20 Antigen or P1 or P100 or Premelanosome Protein or Silver Locus Protein Homolog or PMEL) targeted therapeutics and enlists all their major and minor projects

The report assesses Melanocyte Protein PMEL (ME20M or Melanocyte Protein Pmel 17 or Melanocytes Lineage Specific Antigen GP100 or Melanoma Associated ME20 Antigen or P1 or P100 or Premelanosome Protein or Silver Locus Protein Homolog or PMEL) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Melanocyte Protein PMEL (ME20M or Melanocyte Protein Pmel 17 or Melanocytes Lineage Specific Antigen GP100 or Melanoma Associated ME20 Antigen or P1 or P100 or Premelanosome Protein or Silver Locus Protein Homolog or PMEL) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Melanocyte Protein PMEL (ME20M or Melanocyte Protein Pmel 17 or Melanocytes Lineage Specific Antigen GP100 or Melanoma Associated ME20

Antigen or P1 or P100 or Premelanosome Protein or Silver Locus Protein Homolog or PMEL)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Melanocyte Protein PMEL (ME20M or Melanocyte Protein Pmel 17 or Melanocytes Lineage Specific Antigen GP100 or Melanoma Associated ME20 Antigen or P1 or P100 or Premelanosome Protein or Silver Locus Protein Homolog or PMEL) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Contents

Introduction

Global Markets Direct Report Coverage

Melanocyte Protein PMEL (ME20M or Melanocyte Protein Pmel 17 or Melanocytes Lineage Specific Antigen GP100 or Melanoma Associated ME20 Antigen or P1 or P100 or Premelanosome Protein or Silver Locus Protein Homolog or PMEL) - Overview

Melanocyte Protein PMEL (ME20M or Melanocyte Protein Pmel 17 or Melanocytes Lineage Specific Antigen GP100 or Melanoma Associated ME20 Antigen or P1 or P100 or Premelanosome Protein or Silver Locus Protein Homolog or PMEL) - Therapeutics Development
