Abstracts

Metabotropic Glutamate Receptor 5 - Pipeline Review, H2 2020

SUMMARY

Metabotropic Glutamate Receptor 5 (GPRC1E or MGLUR5 or GRM5) - Metabotropic glutamate receptor 5 (mGluR5) is a G protein-coupled receptor. Ligand binding causes a conformation change that triggers signaling via guanine nucleotide-binding proteins (G proteins) and modulates the activity of down-stream effectors. Signaling activates a phosphatidylinositol calcium second messenger system and generates a calcium activated chloride current. mGluR5 plays an important role in the regulation of synaptic plasticity and the modulation of the neural network activity.

Metabotropic Glutamate Receptor 5 (GPRC1E or MGLUR5 or GRM5) pipeline Target constitutes close to 19 molecules. Out of which approximately 13 molecules are developed by companies and remaining by the universities/institutes. The molecules developed by companies in Phase II, Phase I, Preclinical and Discovery stages are 3, 2, 7 and 1 respectively. Similarly, the universities portfolio in Preclinical stages comprises 6 molecules, respectively. Report covers products from therapy areas Central Nervous System, Genetic Disorders and Ophthalmology which include indications Anxiety Disorders, Depression, Fragile X Syndrome, Alzheimer's Disease, Autism, Major Depressive Disorder, Parkinson's Disease, Schizophrenia, Alcohol Addiction, Amyotrophic Lateral Sclerosis, Blepharospasm, Cognitive Impairment, Cognitive Impairment Associated With Schizophrenia (CIAS), Dementia, Drug Addiction, Drug-Induced Dyskinesia, Dyskinesia, Dystonia, Movement Disorders, Neurology, Pain, Rett Syndrome, Spasmodic Torticollis (Cervical Dystonia) and Substance (Drug) Abuse.

The latest report Metabotropic Glutamate Receptor 5 - Pipeline Review, H2 2020, outlays comprehensive information on the Metabotropic Glutamate Receptor 5 (GPRC1E or MGLUR5 or GRM5) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type. It also reviews key players involved in Metabotropic Glutamate Receptor 5 (GPRC1E or MGLUR5 or GRM5) targeted therapeutics development with respective active and dormant or discontinued projects.

The report is built using data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Metabotropic Glutamate Receptor 5 (GPRC1E or MGLUR5 or GRM5)

The report reviews Metabotropic Glutamate Receptor 5 (GPRC1E or MGLUR5 or GRM5) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Metabotropic Glutamate Receptor 5 (GPRC1E or MGLUR5 or GRM5) targeted therapeutics and enlists all their major and minor projects

The report assesses Metabotropic Glutamate Receptor 5 (GPRC1E or MGLUR5 or GRM5) targeted therapeutics based on mechanism of action (MoA), route of

administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Metabotropic Glutamate Receptor 5 (GPRC1E or MGLUR5 or GRM5) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Metabotropic Glutamate Receptor 5 (GPRC1E or MGLUR5 or GRM5)Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Metabotropic Glutamate Receptor 5 (GPRC1E or MGLUR5 or GRM5) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Contents

Introduction

Development Milestones

Featured News & Press Releases

Jan 17, 2019: Experimental drug improves eye gaze behavior in fragile X syndrome Dec 13, 2018: Sosei Heptares starts new clinical development program - First subject dosed in Phase I study of HTL0014242, a selective mGlu5 negative allosteric modulator

in development to treat psychiatric and neurological disorders

Oct 17, 2016: Addex Therapeutics to Conduct Phase IIa Proof of Concept Study of Dipraglurant in Focal Cervical Dystonia

Jun 02, 2016: Addex Dipraglurant Positive Phase 2 Data in PD-LID Published in Leading Peer Reviewed Journal of the Movement Disorder Society

Apr 11, 2016: Addex Reports Positive Results of an mGlu5 Receptor Occupancy Study with Dipraglurant in Healthy Volunteers

Mar 15, 2016: Addex Reports Successful Completion of an mGlu5 Receptor Occupancy Study with Dipraglurant in Healthy Volunteers

Jan 11, 2016: Addex Dipraglurant Shows Highly Statistically Significant Anti-Dyskinetic Effects Following Additional Analysis of Data from the PD-LID Phase II Proof of Concept Jan 04, 2016: Addex' Dipraglurant Receives Orphan Drug Designation from the FDA for Levodopa-Induced Dyskinesia Associated with Parkinson's Disease Dec 17, 2015: Addex Reports Statistically Significant Positive Interim Data for Dipraglurant in Healthy Volunteer mGlu5 Receptor Occupancy Trial

Aug 14, 2015: Addex Dipraglurant Demonstrates Anxiolytic- and Antidepressant-like Activity in Multiple Preclinical Models Relevant for Non-Motor Symptoms in Parkinson's Disease

Jul 22, 2015: Addex Dipraglurant Dosed in First Subject in Receptor Occupancy Study in Collaboration with Johns Hopkins University and with Funding from The Michael J. Fox Foundation

Feb 23, 2015: Addex Initiates Dipraglurant Receptor Occupancy Clinical Study in Collaboration with Johns Hopkins University with Funding from The Michael J. Fox Foundation

Jan 19, 2015: Addex and Dystonia Medical Research Foundation Announce Partnership to Explore the Therapeutic use of Dipraglurant in the Treatment of Dystonia Sep 04, 2013: Chronic treatment with Addex Dipraglurant Rescues Impairment of Long-Term Synaptic Plasticity in a Validated Preclinical Model of Primary Generalized Torsion Dystonia 1

May 01, 2013: Addex's Dipragluant Demonstrates Dose-dependent mGlu5 Receptor Occupancy In Non-human Primate PET Study
