## Abstracts

Neuroblastoma Drugs in Development by Stages, Target, MoA, RoA, Molecule Type and Key Players, 2022 Update

### SUMMARY

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Neuroblastoma - Drugs In Development, 2022, provides an overview of the Neuroblastoma (Oncology) pipeline landscape.

Neuroblastoma is the cancer of the nerve tissues and neural crest cells of adrenal glands, neck, chest or spinal cord, occurring predominantly in children. It usually begins in the adrenal glands further spreading to other parts of the body. The predisposing factors involved in neuroblastoma include genetic conditions. Symptoms include lump in abdomen or chest, weakness, bone pain, breathing problems, dark circles around the eyes and difficulty in movement. The condition may be diagnosed by X-ray imaging, CT scan, MRI, biopsy, urine test, etc. It may be controlled by chemotherapy, radiation therapy, stem cell transplants and medication such as monoclonal antibody regimens.

### REPORT HIGHLIGHTS

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Neuroblastoma - Drugs In Development, 2022, provides comprehensive information on the therapeutics under development for Neuroblastoma (Oncology), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive

pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Neuroblastoma (Oncology) pipeline guide also reviews of key players involved in therapeutic development for Neuroblastoma and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies/Universities/Institutes, the molecules developed by Companies in Pre-Registration, Phase II, Phase I, Phase 0, IND/CTA Filed, Preclinical, Discovery and Unknown stages are 2, 48, 20, 1, 4, 56, 13 and 1 respectively. Similarly, the Universities portfolio in Phase II, Phase I, Phase 0, Preclinical and Discovery stages comprises 5, 5, 1, 16 and 1 molecules, respectively.

Neuroblastoma (Oncology) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

**Note:** Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

## SCOPE

The pipeline guide provides a snapshot of the global therapeutic landscape of Neuroblastoma (Oncology).

The pipeline guide reviews pipeline therapeutics for Neuroblastoma (Oncology) by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Neuroblastoma (Oncology) therapeutics and enlists all their major and minor projects.

The pipeline guide evaluates Neuroblastoma (Oncology) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Neuroblastoma (Oncology)

## **REASONS TO BUY**

Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

Find and recognize significant and varied types of therapeutics under development for Neuroblastoma (Oncology).

Classify potential new clients or partners in the target demographic.

Develop tactical initiatives by understanding the focus areas of leading companies.

Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.

Formulate corrective measures for pipeline projects by understanding Neuroblastoma (Oncology) pipeline depth and focus of Indication therapeutics.

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand

business potential and scope.

Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.

Featured News & Press Releases

Oct 28, 2022: Y-mAbs announces scheduling of FDA advisory committee meeting for Omburtamab

Oct 03, 2022: Y-mAbs announces pivotal data for Omburtamab

Sep 26, 2022: Y-mAbs announces regulatory filing for DANYELZA (naxitamab-gqgk) in Brazil

Aug 30, 2022: Y-mAbs and Takeda announces marketing authorization in Israel for DANYELZA (naxitamab-gqgk) for neuroblastoma

Jul 26, 2022: The global pharmaceutical industry is accelerating; Aptorum Group has received orphan drug designation from US FDA for its SACT-1

Jun 28, 2022: SciClone Pharmaceuticals : NMPA approval of IND of DANYELZA (naxitamab) and GM-CSF in combination with Irinotecan and Temozolomide in patients with high-risk neuroblastoma with primary refractory disease or in first relapse

Jun 03, 2022: Y-mAbs announces Naxitamab chemoimmunotherapy investigational trial for high-risk neuroblastoma meets primary endpoint

May 31, 2022: Y-mAbs announces FDA Acceptance of Biologics License Application for OMBLASTYS (omburtamab) for the treatment of Neuroblastoma for Priority Review

May 02, 2022: Athenex, Texas Children's Cancer Center, and the Center for Cell and

Gene Therapy at Baylor College of Medicine to present phase 1 Clinical Data for KUR-501, an autologous GD2 CAR-NKT Cell Therapy for Relapsed/Refractory High Risk Neuroblastoma at the ASGCT 25th Annual Meeting

May 02, 2022: Aptorum Group updates on data from the completed phase 1 clinical trial of SACT-1, targeting neuroblastoma

Apr 23, 2022: Nektar and collaborators present preclinical data on NKTR-255, a novel IL-15 receptor agonist, in combination with CAR cell therapies at the 2022 Tandem Meetings | Transplantation & Cellular Therapy Meetings of ASTCT and CIBMTR

Apr 20, 2022: Nmpa acceptance of IND of Danyelza (naxitamab) and GM-CSF in combination with irinotecan and temozolomide in patients with high-risk neuroblastoma with primary refractory disease or in first relapse

Mar 21, 2022: Ascentage Pharma's MDM2-p53 inhibitor alrizomadlin (APG-115) granted Rare Pediatric Disease Designation by the US FDA for the treatment of neuroblastoma

Feb 11, 2022: Y-mAbs announces completion of Pre-BLA meeting with FDA for Omburtamab

Jan 20, 2022: Aptorum Group receives FDA Orphan Drug Designation for its SACT-1 repurposed drug for the treatment of neuroblastoma
