Abstracts

Opioid-Induced Constipation (OIC) Drugs in Development by Stages, Target, MoA, RoA, Molecule Type and Key Players, 2022 Update

SUMMARY

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Opioid-Induced Constipation (OIC) - Drugs in Development by Stages, Target, MoA, RoA, Molecule Type and Key Players, 2022 Update, provides an overview of the Opioid-Induced Constipation (OIC) (Toxicology) pipeline landscape.

Opioids are effective pain relievers, but often have the side effect of constipation. These medicines affect the gastrointestinal tract in a variety of ways. Opioids increase the amount of time it takes stool to move through the gastric system. They increase non-propulsive contractions in the middle of the small intestine (jejunum) and decrease longitudinal propulsive peristalsis - motions critical to moving food through the intestines. This results in food that fails to travel through the digestive tract. Opioids are also able to partially paralyze the stomach (gastroparesis) so that food remains in the digestive organ for a longer period of time. Additionally opioids reduce digestive secretions and decrease the urge to defecate. Symptoms of OIC include feeling and being sick, tiredness and lethargy, appetite loss, feeling depressed.

REPORT HIGHLIGHTS

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Opioid-Induced Constipation (OIC) - Drugs in Development by Stages, Target, MoA, RoA,

Opioid-Induced Constipation (OIC) Drugs in Development by Stages, Target, MoA, RoA, Molecule Type and Key Play...

Molecule Type and Key Players, 2022 Update, provides comprehensive information on the therapeutics under development for Opioid-Induced Constipation (OIC) (Toxicology), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Opioid-Induced Constipation (OIC) (Toxicology) pipeline guide also reviews of key players involved in therapeutic development for Opioid-Induced Constipation (OIC) and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies /Universities /Institutes, the molecules developed by Companies in Phase III, Phase II, Phase I and Preclinical stages are 1, 2, 2 and 1 respectively. Similarly, the Universities portfolio in Preclinical stages comprises 1 molecules, respectively.

Opioid-Induced Constipation (OIC) (Toxicology) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Note: Certain content / sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The pipeline guide provides a snapshot of the global therapeutic landscape of Opioid-Induced Constipation (OIC) (Toxicology).

The pipeline guide reviews pipeline therapeutics for Opioid-Induced Constipation (OIC) (Toxicology) by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Opioid-Induced Constipation (OIC) (Toxicology) therapeutics and enlists all their major and minor projects.

The pipeline guide evaluates Opioid-Induced Constipation (OIC) (Toxicology) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Opioid-Induced Constipation (OIC) (Toxicology)

REASONS TO BUY

Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

Find and recognize significant and varied types of therapeutics under development for Opioid-Induced Constipation (OIC) (Toxicology).

Classify potential new clients or partners in the target demographic.

Develop tactical initiatives by understanding the focus areas of leading companies.

Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.

Formulate corrective measures for pipeline projects by understanding Opioid-Induced Constipation (OIC) (Toxicology) pipeline depth and focus of Indication therapeutics.

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope.

Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.

Featured News & Press Releases

Jan 26, 2022: BioGaia Pharma announces first patient enrolled in phase II clinical study evaluating BGP345A for the treatment of opioid induced constipation (OIC-1)

May 15, 2015: Sucampo Announces Clinical Data on Lubiprostone to be Presented at Digestive Disease Week

Dec 30, 2014: Sucampo Announces Acceptance of New Drug Submission for AMITIZA (lubiprostone) by Health Canada

Oct 13, 2014: Clinical Data for AMITIZA Lubiprostone to be Presented at the American College of Gastroenterology 2014 Annual Scientific Meeting

Sep 29, 2014: Sucampo and Takeda Launch Direct-to-Consumer Advertising Campaign for AMITIZA (lubiprostone) for Chronic Idiopathic Constipation

Jul 23, 2014: Sucampo Announces Publication of NICE Recommendation for AMITIZA (Lubiprostone)

Jul 07, 2014: Swissmedic Approves AMITIZA (Lubiprostone) for the Treatment of Opioid-Induced Constipation

Jun 17, 2014: AMITIZA (Lubiprostone) Receives NICE Recommendation

Jun 12, 2014: Sucampo Issues Statement Regarding Anesthetic and Analgesic Drug Products Advisory Committee Meeting's Vote

May 06, 2014: Sucampo Announces New Data on AMITIZA and Opioid-Induced Constipation Published Online in Pain Medicine Journal

May 01, 2014: Sucampo Announces Clinical Data on Lubiprostone to be Presented at Two Upcoming Scientific Conferences

Apr 25, 2014: Sucampo Pharma To Present Preclinical Data For Lubiprostone at Experimental Biology Conference 2014

Mar 12, 2014: Sucampo Receives Notice that Second Indication for AMITIZA for Opioid-

Induced Constipation Is Not Approved by Medicines and Healthcare Products
Regulatory Agency in U.K.

Oct 11, 2013: Sucampo Announces Presentation of Results on AMITIZA in Opioid-
Induced Constipation at Two Upcoming Scientific Conferences

Oct 08, 2013: Clinical Data Show That Lubiprostone is Efficacious and Well Tolerated in
Children and Adolescents With Functional Constipation
