Abstracts

Orexin Receptor Type 1 (Hypocretin Receptor Type 1 or HCRTR1) Drugs in Development by Therapy Areas and Indications, Stages, MoA, RoA, Molecule Type and Key Players, 2022 Update

SUMMARY

Orexin Receptor Type 1 (Hypocretin Receptor Type 1 or HCRTR1) pipeline Target constitutes close to 14 molecules. Out of which approximately 14 molecules are developed by Companies. The latest report Orexin Receptor Type 1 - Drugs In Development, 2022, outlays comprehensive information on the Orexin Receptor Type 1 (Hypocretin Receptor Type 1 or HCRTR1) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type.

Orexin Receptor Type 1 (Hypocretin Receptor Type 1 or HCRTR1) - Orexin receptor type 1 (Ox1R or OX1) is a protein that is encoded by the HCRTR1 gene. The orexin 1 receptor (OX1) is a G-protein coupled receptor that is highly expressed in projections from the lateral hypothalamus and is involved in the regulation of feeding behavior. OX1 selectively binds the orexin-A neuropeptide. The molecules developed by companies in Pre-Registration, Phase III, Phase II, Phase I, Preclinical and Discovery stages are 2, 2, 3, 4 and 1 respectively. Report covers products from therapy areas Central Nervous System, Respiratory and Gastrointestinal which include indications Insomnia, Binge Eating Disorder, Nicotine Addiction, Obstructive Sleep Apnea, Opium (Opioid)

Addiction, Addiction, Alcohol Addiction, Chronic Obstructive Pulmonary Disease (COPD), Delirium, Dementia, Dementia Associated With Alzheimer's Disease, Major Depressive Disorder, Mild Cognitive Impairment, Narcolepsy, Panic Disorders, Parkinson's Disease, Reflux Esophagitis (Gastroesophageal Reflux Disease), Sleep Disorders, Smoking Cessation and Unspecified Psychiatric Disorders.

Furthermore, this report also reviews key players involved in Orexin Receptor Type 1 (Hypocretin Receptor Type 1 or HCRTR1) targeted therapeutics development with respective active and dormant or discontinued projects. Driven by data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Orexin Receptor Type 1 (Hypocretin Receptor Type 1 or HCRTR1)

The report reviews Orexin Receptor Type 1 (Hypocretin Receptor Type 1 or HCRTR1) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Orexin Receptor Type 1 (Hypocretin Receptor Type 1 or HCRTR1) targeted therapeutics and enlists all their major and minor projects

The report assesses Orexin Receptor Type 1 (Hypocretin Receptor Type 1 or HCRTR1) targeted therapeutics based on mechanism of action (MoA), route of

administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Orexin Receptor Type 1 (Hypocretin Receptor Type 1 or HCRTR1) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Orexin Receptor Type 1 (Hypocretin Receptor Type 1 or HCRTR1)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Orexin Receptor Type 1 (Hypocretin Receptor Type 1 or HCRTR1) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and @Scope

Featured News & Press Releases

Jul 19, 2022: Idorsia announces World Champion Skier, Philanthropist and Entrepreneur Lindsey Vonn as patient ambassador for QUVIVIQ (daridorexant), a Once Nightly Treatment for Insomnia

Jun 03, 2022: Eisai to present latest data on lemborexant at the 36th Annual SLEEP 2022 Meeting

May 13, 2022: Idorsia U.S. announces first wave of patients prescribed QUVIVIQ (daridorexant) through partnership with pharmacy services provider

May 03, 2022: Europe's first dual orexin receptor antagonist - QUVIVIQ (daridorexant) - granted approval to improve both nighttime symptoms and daytime functioning in adults with chronic insomnia disorder

May 02, 2022: Idorsia's new treatment QUVIVIQ (daridorexant) is now available in the US for adults living with insomnia

Mar 10, 2022: New data for daridorexant in patients with insomnia disorder - including long-term safety and efficacy - to be presented at World Sleep 2022

Feb 25, 2022: QUVIVIQ (daridorexant) recommended for approval in Europe as a new treatment for adults with insomnia disorder

Jan 25, 2022: Cerevance doses first subjects in phase 1 clinical trial of CVN766

Jan 20, 2022: The Lancet Neurology reports impact of daridorexant on both nighttime symptoms and daytime functioning in adults with insomnia

Jan 10, 2022: Idorsia receives US FDA approval of QUVIVIQ (daridorexant) 25 and 50 mg for the treatment of adults with insomnia

Jan 10, 2022: Idorsia presents at the 40th J.P. Morgan Healthcare Conference - Ready for first product launches - QUVIVIQ (daridorexant) approved by the US FDA

Jun 30, 2021: Eisai launches in-house developed anti-insomnia drug Dayvigo (Lemborexant) in Hong Kong

Jun 09, 2021: Idorsia to present new Phase 3 data on daridorexant in insomnia at SLEEP 2021

Jun 09, 2021: Eisai to present latest data of Lemborexant at 35th Annual Sleep Meeting

Mar 10, 2021: FDA accepts the new drug application for review of Idorsia's daridorexant for the treatment of adult patients with insomnia
