Abstracts

Orexin Receptor Type 2 - Drugs In Development, 2021

SUMMARY

According to the recently published report 'Orexin Receptor Type 2 - Drugs In Development, 2021'; Orexin Receptor Type 2 (Hypocretin Receptor Type 2 or HCRTR2) pipeline Target constitutes close to 16 molecules. Out of which approximately 15 molecules are developed by companies and remaining by the universities/institutes.

Orexin Receptor Type 2 (Hypocretin Receptor Type 2 or HCRTR2) - Orexin receptor type 2 (Ox2R or OX2) also known as hypocretin receptor type 2, is a protein that is encoded by the HCRTR2 gene. OX2 is a G-protein coupled receptor expressed exclusively in the brain. OX2 binds both orexin A and orexin B neuropeptides. OX2 is involved in the central feedback mechanism that regulates feeding behavior.

The report 'Orexin Receptor Type 2 - Drugs In Development, 2021' outlays comprehensive information on the Orexin Receptor Type 2 (Hypocretin Receptor Type 2 or HCRTR2) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type; that are being developed by Companies/Universities.

It also reviews key players involved in Orexin Receptor Type 2 (Hypocretin Receptor Type 2 or HCRTR2) targeted therapeutics development with respective active and dormant or discontinued projects. Currently, The molecules developed by companies in Pre-Registration, Phase III, Phase II, Phase I, Preclinical and Discovery stages are 2, 2, 4, 2, 3 and 2 respectively. Similarly, the universities portfolio in Preclinical stages comprises 1 molecules, respectively. Report covers products from therapy areas Central Nervous System, Respiratory, Gastrointestinal and Toxicology which include

indications Narcolepsy, Insomnia, Obstructive Sleep Apnea, Chronic Obstructive Pulmonary Disease (COPD), Delirium, Dementia, Dementia Associated With Alzheimer's Disease, Hypersomnia, Major Depressive Disorder, Mild Cognitive Impairment, Neurology, Opioid Induced Side Effects, Parkinson's Disease, Reflux Esophagitis (Gastroesophageal Reflux Disease), Sleep Disorders and Unspecified Neurologic Disorders.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Orexin Receptor Type 2 (Hypocretin Receptor Type 2 or HCRTR2)

The report reviews Orexin Receptor Type 2 (Hypocretin Receptor Type 2 or HCRTR2) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Orexin Receptor Type 2 (Hypocretin Receptor Type 2 or HCRTR2) targeted therapeutics and enlists all their major and minor projects

The report assesses Orexin Receptor Type 2 (Hypocretin Receptor Type 2 or HCRTR2) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Orexin Receptor Type 2 (Hypocretin Receptor Type 2 or HCRTR2) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Orexin Receptor Type 2 (Hypocretin Receptor Type 2 or HCRTR2) Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Orexin Receptor Type 2 (Hypocretin Receptor Type 2 or HCRTR2) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Featured News & Press Releases

Jun 30, 2021: Eisai launches in-house developed anti-insomnia drug Dayvigo (Lemborexant) in Hong Kong

Jun 09, 2021: Idorsia to present new Phase 3 data on daridorexant in insomnia at SLEEP 2021

Jun 09, 2021: Eisai to present latest data of Lemborexant at 35th Annual Sleep Meeting

May 18, 2021: NLS Pharmaceuticals announces new study data confirming Mazindol's unique orexin pathway activation for treating narcolepsy

Mar 29, 2021: NLS Pharmaceuticals announces issuance of Canadian Patent covering its novel formulation of controlled-release Mazindol (Mazindol CR)

Mar 10, 2021: FDA accepts the new drug application for review of Idorsia's daridorexant for the treatment of adult patients with insomnia

Mar 03, 2021: Idorsia submits European marketing authorisation application for daridorexant for the treatment of adult patients with insomnia

Mar 02, 2021: New Drug Approval for in-house developed anti-insomnia drug Dayvigo (Lemborexant) in Hong Kong

Feb 04, 2021: Health Canada authorizes DAYVIGO (lemborexant)

Nov 02, 2020: Eisai to present on lemborexant at Digital CTAD 2020

Oct 28, 2020: Eisai to present on lemborexant at 13th Clinical Trials on Alzheimer's Disease (CTAD) conference

Aug 28, 2020: Eisai presents new analyses from phase 3 studies of DAYVIGO (lemborexant) CIV for the treatment of insomnia in adult patients at Virtual SLEEP 2020

Aug 28, 2020: Daridorexant Phase 3 results in insomnia presented at SLEEP 2020

Aug 25, 2020: Eisai to present latest data of lemborexant at 34th Annual Sleep Meeting (SLEEP 2020)

Aug 13, 2020: Daridorexant Phase 3 results in insomnia to be presented at SLEEP 2020
