## **Abstracts**

P Selectin (CD62 Antigen Like Family Member P or Granule Membrane Protein 140 or Leukocyte Endothelial Cell Adhesion Molecule 3 or LECAM3 or Platelet Activation Dependent Granule External Membrane Protein or CD62P or SELP) - Pipeline Review, H2 2018

### **SUMMARY**

P Selectin (CD62 Antigen Like Family Member P or Granule Membrane Protein 140 or Leukocyte Endothelial Cell Adhesion Molecule 3 or LECAM3 or Platelet Activation Dependent Granule External Membrane Protein or CD62P or SELP) pipeline Target constitutes close to 6 molecules. The latest report P Selectin - Pipeline Review, H2 2018, outlays comprehensive information on the P Selectin (CD62 Antigen Like Family Member P or Granule Membrane Protein 140 or Leukocyte Endothelial Cell Adhesion Molecule 3 or LECAM3 or Platelet Activation Dependent Granule External Membrane Protein or CD62P or SELP) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type.

P Selectin (CD62 Antigen Like Family Member P or Granule Membrane Protein 140 or Leukocyte Endothelial Cell Adhesion Molecule 3 or LECAM3 or Platelet Activation

Dependent Granule External Membrane Protein or CD62P or SELP) - P-selectin is a protein encoded by the SELP gene. P-selectin functions as a cell adhesion molecule (CAM) on the surfaces of activated endothelial cells. In unactivated endothelial cells, it is stored in granules called Weibel-Palade bodies. In unactivated platelets P-selectin is stored in  $\alpha$ -granules. P-selectin plays an essential role in the initial recruitment of leukocytes (white blood cells) to the site of injury during inflammation.

The molecules developed by companies in Phase III, Preclinical, Discovery and Unknown stages are 2, 2, 1 and 1 respectively. Report covers products from therapy areas Cardiovascular, Hematological Disorders, Central Nervous System, Ear Nose Throat Disorders, Gastrointestinal, Immunology, Mouth and Dental Disorders and Oncology which include indications Vaso-Occlusive Crisis Associated With Sickle Cell Disease, Sickle Cell Disease, Inflammation, Interstitial Cystitis (Painful Bladder Syndrome/Bladder Pain Syndrome), Oral Mucositis, Periodontitis and Rhino sinusitis.

Furthermore, this report also reviews key players involved in P Selectin (CD62 Antigen Like Family Member P or Granule Membrane Protein 140 or Leukocyte Endothelial Cell Adhesion Molecule 3 or LECAM3 or Platelet Activation Dependent Granule External Membrane Protein or CD62P or SELP) targeted therapeutics development with respective active and dormant or discontinued projects. Driven by data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

**Note:** Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

## SCOPE

The report provides a snapshot of the global therapeutic landscape for P Selectin (CD62 Antigen Like Family Member P or Granule Membrane Protein 140 or Leukocyte Endothelial Cell Adhesion Molecule 3 or LECAM3 or Platelet Activation Dependent Granule External Membrane Protein or CD62P or SELP)

The report reviews P Selectin (CD62 Antigen Like Family Member P or Granule Membrane Protein 140 or Leukocyte Endothelial Cell Adhesion Molecule 3 or LECAM3 or Platelet Activation Dependent Granule External Membrane Protein or CD62P or SELP) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and

industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in P Selectin (CD62 Antigen Like Family Member P or Granule Membrane Protein 140 or Leukocyte Endothelial Cell Adhesion Molecule 3 or LECAM3 or Platelet Activation Dependent Granule External Membrane Protein or CD62P or SELP) targeted therapeutics and enlists all their major and minor projects

The report assesses P Selectin (CD62 Antigen Like Family Member P or Granule Membrane Protein 140 or Leukocyte Endothelial Cell Adhesion Molecule 3 or LECAM3 or Platelet Activation Dependent Granule External Membrane Protein or CD62P or SELP) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to P Selectin (CD62 Antigen Like Family Member P or Granule Membrane Protein 140 or Leukocyte Endothelial Cell Adhesion Molecule 3 or LECAM3 or Platelet Activation Dependent Granule External Membrane Protein or CD62P or SELP) targeted therapeutics

## REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for P Selectin

(CD62 Antigen Like Family Member P or Granule Membrane Protein 140 or Leukocyte Endothelial Cell Adhesion Molecule 3 or LECAM3 or Platelet Activation Dependent Granule External Membrane Protein or CD62P or SELP)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding P Selectin (CD62 Antigen Like Family Member P or Granule Membrane Protein 140 or Leukocyte Endothelial Cell Adhesion Molecule 3 or LECAM3 or Platelet Activation Dependent Granule External Membrane Protein or CD62P or SELP) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

## Contents

Introduction

Global Markets Direct Report Coverage

P Selectin (CD62 Antigen Like Family Member P or Granule Membrane Protein 140 or Leukocyte Endothelial Cell Adhesion Molecule 3 or LECAM3 or Platelet Activation Dependent Granule External Membrane Protein or CD62P or SELP) - Overview

P Selectin (CD62 Antigen Like Family Member P or Granule Membrane Protein 140 or Leukocyte Endothelial Cell Adhesion Molecule 3 or LECAM3 or Platelet Activation Dependent Granule External Membrane Protein or CD62P or SELP) - Therapeutics Development

Products under Development by Stage of Development

Products under Development by Therapy Area

Products under Development by Indication

Products under Development by Companies

P Selectin (CD62 Antigen Like Family Member P or Granule Membrane Protein 140 or Leukocyte Endothelial Cell Adhesion Molecule 3 or LECAM3 or Platelet Activation Dependent Granule External Membrane Protein or CD62P or SELP) - Therapeutics

Assessment

Assessment by Mechanism of Action

Assessment by Route of Administration

Assessment by Molecule Type

P Selectin (CD62 Antigen Like Family Member P or Granule Membrane Protein 140 or Leukocyte Endothelial Cell Adhesion Molecule 3 or LECAM3 or Platelet Activation Dependent Granule External Membrane Protein or CD62P or SELP) - Companies

Involved in Therapeutics Development

Global Blood Therapeutics Inc

Novartis AG

Pfizer Inc

Tumorend LLC

P Selectin (CD62 Antigen Like Family Member P or Granule Membrane Protein 140 or Leukocyte Endothelial Cell Adhesion Molecule 3 or LECAM3 or Platelet Activation Dependent Granule External Membrane Protein or CD62P or SELP) - Drug Profiles

crizanlizumab - Drug Profile

Product Description

Mechanism Of Action

R&D Progress

GM-0111 - Drug Profile

Product Description

Mechanism Of Action

R&D Progress

inclacumab - Drug Profile
