Abstracts

Pemphigus Vulgaris Drugs in Development by Stages, Target, MoA, RoA, Molecule Type and Key Players, 2022 Update

SUMMARY

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Pemphigus Vulgaris - Drugs In Development, 2022, provides an overview of the Pemphigus Vulgaris (Immunology) pipeline landscape.

Pemphigus vulgaris is a rare autoimmune disease that causes painful blistering on the skin and the mucous membranes. Risk factors include race, gender and age. Symptoms of pemphigus vulgaris include painful blisters that start in the mouth, skin blisters that come and go; the blisters always occur near the surface of the skin and oozing, crusting, or peeling at the blister site.

REPORT HIGHLIGHTS

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Pemphigus Vulgaris - Drugs In Development, 2022, provides comprehensive information on the therapeutics under development for Pemphigus Vulgaris (Immunology), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Pemphigus Vulgaris (Immunology) pipeline guide also reviews of key players involved in therapeutic development for Pemphigus Vulgaris and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies/Universities/Institutes, the molecules developed by Companies in Phase III, Phase II, Phase I, Preclinical and Discovery stages are 1, 1, 3, 6 and 2 respectively. Similarly, the Universities portfolio in Preclinical stages comprises 1 molecules, respectively.

Pemphigus Vulgaris (Immunology) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The pipeline guide provides a snapshot of the global therapeutic landscape of Pemphigus Vulgaris (Immunology).

The pipeline guide reviews pipeline therapeutics for Pemphigus Vulgaris (Immunology) by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Pemphigus Vulgaris (Immunology) therapeutics and enlists all their major and minor projects.

The pipeline guide evaluates Pemphigus Vulgaris (Immunology) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Pemphigus Vulgaris (Immunology)

REASONS TO BUY

Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

Find and recognize significant and varied types of therapeutics under development for Pemphigus Vulgaris (Immunology).

Classify potential new clients or partners in the target demographic.

Develop tactical initiatives by understanding the focus areas of leading companies.

Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.

Formulate corrective measures for pipeline projects by understanding Pemphigus Vulgaris (Immunology) pipeline depth and focus of Indication therapeutics.

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope.

Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.

Featured News & Press Releases

Sep 10, 2022: Cabaletta Bio presents new interim data from the DesCAARTes Phase 1 Trial at the 31st EADV Congress

Sep 10, 2022: Cabaletta Bio to present data at the 31st EADV Congress and provides update on DesCAARTes trial

May 18, 2022: Cabaletta Bio presents updated interim DesCAARTes trial phase 1 data at the ASGCT 25th Annual Meeting

May 02, 2022: Cabaletta Bio to present DSG3-CAART clinical data at Upcoming Scientific Meetings in May

Dec 14, 2021: Cabaletta Bio reports top-line biologic activity data from two lowest dose cohorts in DesCAARTes trial in patients with mucosal pemphigus vulgaris

Nov 15, 2021: Zai Lab announces first patient dosed in Greater China in global registrational clinical trial of efgartigimod in pemphigus

Nov 01, 2021: Cabaletta Bio reports clinical data from the third dose cohort in DesCAARTes trial in patients with mPV

Aug 18, 2021: Cabaletta Bio reports clinical data from the second dose cohort in DesCAARTes trial in patients with mPV

May 03, 2021: Cabaletta Bio reports acute safety data from the first dose cohort in DesCAARTes trial

Dec 08, 2020: Cabaletta Bio announces first patient dosed in Landmark DesCAARTes trial of DSG3-CAART for treatment of mucosal-dominant pemphigus vulgaris

Aug 25, 2020: Cabaletta Bio announces publication of comprehensive preclinical study results for DSG3-CAART in pemphigus vulgaris

May 06, 2020: Cabaletta Bio receives FDA Fast Track Designation for DSG3-CAART for the treatment of Mucosal Pemphigus Vulgaris

Jan 29, 2020: FDA grants DSG3-CAART orphan drug designation for the treatment of pemphigus vulgaris

Dec 18, 2019: Topas Therapeutics announces first patient enrolled in phase 1 trial with TPM203 in pemphigus vulgaris

Oct 01, 2019: Cabaletta Bio receives IND clearance from FDA to initiate first clinical trial of DSG3-CAART in patients with Mucosal Pemphigus Vulgaris
