Placenta Growth Factor (Vascular Endothelial Growth Factor Related Protein or PGF) - Pipeline Review, H2 2018

SUMMARY

According to the recently published report 'Placenta Growth Factor - Pipeline Review, H2 2018'; Placenta Growth Factor (Vascular Endothelial Growth Factor Related Protein or PGF) pipeline Target constitutes close to 13 molecules.

Placenta Growth Factor (Vascular Endothelial Growth Factor Related Protein or PGF) - Placental growth factor is a protein encoded by the PGF gene. Placental growth factor (PGF) is a member of the VEGF (vascular endothelial growth factor). It plays an important role in angiogenesis and endothelial cell growth, stimulating their proliferation and migration. It binds to the receptor FLT1/VEGFR-1. PGF is also expressed in many other tissues, including the villous trophoblast.

The report 'Placenta Growth Factor - Pipeline Review, H2 2018' outlays comprehensive information on the Placenta Growth Factor (Vascular Endothelial Growth Factor Related Protein or PGF) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type; that are being developed by Companies/Universities.

It also reviews key players involved in Placenta Growth Factor (Vascular Endothelial Growth Factor Related Protein or PGF) targeted therapeutics development with respective active and dormant or discontinued projects. Currently, The molecules

developed by companies in Phase III, Phase II, Phase I, Preclinical and Discovery stages are 2, 2, 1, 5 and 3 respectively. Report covers products from therapy areas Metabolic Disorders, Ophthalmology and Oncology which include indications Diabetic Macular Edema, Wet (Neovascular/Exudative) Macular Degeneration, Diabetic Retinopathy, Branch Retinal Vein Occlusion, Central Retinal Vein Occlusion, Choroidal Neovascularization, Macular Edema, Retinal Vein Occlusion, Medulloblastoma, Metastatic Colorectal Cancer, Myopia, Neovascular Glaucoma, Non-Proliferative Diabetic Retinopathy (NPDR), Optic Neuropathy and Retinopathy.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Placenta Growth Factor (Vascular Endothelial Growth Factor Related Protein or PGF)

The report reviews Placenta Growth Factor (Vascular Endothelial Growth Factor Related Protein or PGF) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Placenta Growth Factor (Vascular Endothelial Growth Factor Related Protein or PGF) targeted therapeutics and enlists all their major and minor projects

The report assesses Placenta Growth Factor (Vascular Endothelial Growth Factor Related Protein or PGF) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Placenta Growth Factor (Vascular Endothelial Growth Factor Related Protein or PGF) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Placenta Growth Factor (Vascular Endothelial Growth Factor Related Protein or PGF)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Placenta Growth Factor (Vascular Endothelial Growth Factor Related Protein or PGF) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope
