Abstracts

Probable ATP Dependent RNA Helicase DDX58 - Pipeline Review, H2 2019

SUMMARY

According to the recently published report 'Probable ATP Dependent RNA Helicase DDX58 - Pipeline Review, H2 2019'; Probable ATP Dependent RNA Helicase DDX58 (DEAD Box Protein 58 or RIG I Like Receptor 1 or Retinoic Acid Inducible Gene 1 Protein or DDX58 or EC 3.6.4.13) pipeline Target constitutes close to 13 molecules. Out of which approximately 10 molecules are developed by companies and remaining by the universities/institutes.

Probable ATP Dependent RNA Helicase DDX58 (DEAD Box Protein 58 or RIG I Like Receptor 1 or Retinoic Acid Inducible Gene 1 Protein or DDX58 or EC 3.6.4.13) - RIG-I (retinoic acid-inducible gene 1) is a RIG-I-like receptor dsRNA helicase enzyme encoded by the DDX58 gene. It is involved in viral double-stranded (ds) RNA recognition and the regulation of immune response. It acts as a cytoplasmic sensor of viral nucleic acids and plays a major role in sensing viral infection and in the activation of a cascade of antiviral responses including the induction of type I interferons and proinflammatory cytokines.

The report 'Probable ATP Dependent RNA Helicase DDX58 - Pipeline Review, H2 2019' outlays comprehensive information on the Probable ATP Dependent RNA Helicase DDX58 (DEAD Box Protein 58 or RIG I Like Receptor 1 or Retinoic Acid Inducible Gene 1 Protein or DDX58 or EC 3.6.4.13) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type; that are being developed by Companies /

Universities.

It also reviews key players involved in Probable ATP Dependent RNA Helicase DDX58 (DEAD Box Protein 58 or RIG I Like Receptor 1 or Retinoic Acid Inducible Gene 1 Protein or DDX58 or EC 3.6.4.13) targeted therapeutics development with respective active and dormant or discontinued projects. Currently, The molecules developed by companies in Phase II, Phase I, Preclinical and Discovery stages are 1, 2, 5 and 2 respectively. Similarly, the universities portfolio in Preclinical stages comprises 3 molecules, respectively. Report covers products from therapy areas Oncology and Infectious Disease which include indications Hepatitis B, Solid Tumor, Breast Cancer, Lymphoma, Melanoma, Metastatic Liver Cancer, Multiple Myeloma (Kahler Disease), Neuroendocrine Tumors and Triple-Negative Breast Cancer (TNBC).

SCOPE

The report provides a snapshot of the global therapeutic landscape for Probable ATP Dependent RNA Helicase DDX58 (DEAD Box Protein 58 or RIG I Like Receptor 1 or Retinoic Acid Inducible Gene 1 Protein or DDX58 or EC 3.6.4.13)

The report reviews Probable ATP Dependent RNA Helicase DDX58 (DEAD Box Protein 58 or RIG I Like Receptor 1 or Retinoic Acid Inducible Gene 1 Protein or DDX58 or EC 3.6.4.13) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Probable ATP Dependent RNA Helicase DDX58 (DEAD Box Protein 58 or RIG I Like Receptor 1 or Retinoic Acid Inducible Gene 1 Protein or DDX58 or EC 3.6.4.13) targeted therapeutics and enlists all their major and minor projects

The report assesses Probable ATP Dependent RNA Helicase DDX58 (DEAD Box Protein 58 or RIG I Like Receptor 1 or Retinoic Acid Inducible Gene 1

Protein or DDX58 or EC 3.6.4.13) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Probable ATP Dependent RNA Helicase DDX58 (DEAD Box Protein 58 or RIG I Like Receptor 1 or Retinoic Acid Inducible Gene 1 Protein or DDX58 or EC 3.6.4.13) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Probable ATP Dependent RNA Helicase DDX58 (DEAD Box Protein 58 or RIG I Like Receptor 1 or Retinoic Acid Inducible Gene 1 Protein or DDX58 or EC 3.6.4.13)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Probable ATP Dependent RNA Helicase DDX58 (DEAD Box Protein 58 or RIG I Like Receptor 1 or Retinoic Acid Inducible Gene 1 Protein or DDX58 or EC 3.6.4.13) development landscape

Develop and design in-licensing and out-licensing strategies by identifying

prospective partners with the most attractive projects to enhance and expand business potential and scope

Contents

Introduction

Global Markets Direct Report Coverage

Probable ATP Dependent RNA Helicase DDX58 (DEAD Box Protein 58 or RIG I Like Receptor 1 or Retinoic Acid Inducible Gene 1 Protein or DDX58 or EC 3.6.4.13) - Overview

Probable ATP Dependent RNA Helicase DDX58 (DEAD Box Protein 58 or RIG I Like Receptor 1 or Retinoic Acid Inducible Gene 1 Protein or DDX58 or EC 3.6.4.13) - Therapeutics Development

Products under Development by Stage of Development

Products under Development by Therapy Area

Products under Development by Indication

Products under Development by Companies

Products under Development by Universities/Institutes

Probable ATP Dependent RNA Helicase DDX58 (DEAD Box Protein 58 or RIG I Like Receptor 1 or Retinoic Acid Inducible Gene 1 Protein or DDX58 or EC 3.6.4.13) - Therapeutics Assessment

Assessment by Mechanism of Action

Assessment by Route of Administration

Assessment by Molecule Type

Probable ATP Dependent RNA Helicase DDX58 (DEAD Box Protein 58 or RIG I Like Receptor 1 or Retinoic Acid Inducible Gene 1 Protein or DDX58 or EC 3.6.4.13) - Companies Involved in Therapeutics Development

Bioncotech Therapeutics SL

Kineta Inc

Merck & Co Inc

Sirenas LLC

Spring Bank Pharmaceuticals Inc

Vycellix Inc

Probable ATP Dependent RNA Helicase DDX58 (DEAD Box Protein 58 or RIG I Like Receptor 1 or Retinoic Acid Inducible Gene 1 Protein or DDX58 or EC 3.6.4.13) - Drug Profiles

(inarigivir soproxil + tenofovir disoproxil fumarate) - Drug Profile

Featured News & Press Releases

Dec 12, 2019: Bioncotech Therapeutics phase I BO-112 data presented at ESMO Immuno-Oncology Congress 2019

Oct 17, 2019: Spring Bank announces interim top-line results from the first cohort of the phase 2 trial evaluating low-dose Inarigivir plus Vemlidy in Chronic Hepatitis B Patients

Oct 14, 2019: A Yale-developed drug shows promise as immune therapy for cancer

Jun 06, 2019: Spring Bank Announces Presentation of Promising Results from Study Highlighting Immune-Activation with Inarigivir 400mg

Apr 12, 2019: Spring Bank announces positive results from the recently completed phase 2 chronic hepatitis B ACHIEVE Trial and additional Inarigivir studies

Apr 10, 2019: Spring Bank to host a conference call to discuss Inarigivir data presented at the International Liver Congress (EASL 2019)

Mar 28, 2019: Spring Bank announces Inarigivir abstracts accepted for oral and poster presentations at The International Liver Congress (EASL 2019)

Nov 09, 2018: Spring Bank announces additional Inarigivir results at AASLD Conference

Oct 09, 2018: Merck to present data on tumor drug candidate MK-4621 at ESMO 2018

Oct 03, 2018: Spring Bank announces Inarigivir data presentations at AASLD Conference

Aug 02, 2018: Spring Bank announces positive study results from the Inarigivir ACHIEVE trial

Apr 10, 2018: Spring Bank Announces Expanded Inarigivir Data from the ACHIEVE Trial to Be Presented at The International Liver Congress

Mar 14, 2018: Spring Bank Announces Presentation of Combined Inarigivir 25 mg and 50 mg 12 and 24 Week ACHIEVE Results Demonstrating Enhanced Anti-Viral Efficacy in HBeAg-Negative Patients

Nov 15, 2017: Spring Bank Pharmaceuticals Announces Positive Top-Line Results from the Second Cohort of Part A of the Phase 2 ACHIEVE Trial

Oct 20, 2017: Spring Bank Pharmaceuticals Announces Additional Inarigivir (formerly SB 9200) Results from the ACHIEVE Trial in HBV Patients at AASLD Conference
