## **Abstracts**

Protein Glutamine Gamma Glutamyltransferase 2 (Tissue Transglutaminase or Transglutaminase C or Transglutaminase H or Transglutaminase 2 or TGase C or TGase H or TGM2 or EC 2.3.2.13) - Pipeline Review, H2 2018

### **SUMMARY**

Protein Glutamine Gamma Glutamyltransferase 2 (Tissue Transglutaminase or Transglutaminase C or Transglutaminase H or Transglutaminase 2 or TGase C or TGase H or TGM2 or EC 2.3.2.13) - Transglutaminase 2 (TG2) is a member of the transglutaminase family that catalyzes calcium-dependent posttranslational modification of proteins by inserting highly stable isopeptide bonds between polypeptide chains or by conjugating polyamines to proteins. TG2 also exhibits GTPase activity and can serve as a signal-transduction G protein.

Protein Glutamine Gamma Glutamyltransferase 2 (Tissue Transglutaminase or Transglutaminase C or Transglutaminase H or Transglutaminase 2 or TGase C or TGase H or TGM2 or EC 2.3.2.13) pipeline Target constitutes close to 6 molecules. Out of which approximately 5 molecules are developed by companies and remaining by the universities/institutes. The molecules developed by companies in Phase II, Preclinical and Discovery stages are 1, 3 and 1 respectively. Similarly, the universities portfolio in Preclinical stages comprises 1 molecules, respectively.

Report covers products from therapy areas Gastrointestinal, Oncology, Infectious Disease and Respiratory which include indications Celiac Disease, Acute Myelocytic Leukemia (AML, Acute Myeloblastic Leukemia), Burkholderia Infections, Cystic Fibrosis, Pseudomonas aeruginosa Infections and Renal Cell Carcinoma.

The latest report Protein Glutamine Gamma Glutamyltransferase 2 - Pipeline Review, H2 2018, outlays comprehensive information on the Protein Glutamine Gamma Glutamyltransferase 2 (Tissue Transglutaminase or Transglutaminase C or Transglutaminase H or Transglutaminase 2 or TGase C or TGase H or TGM2 or EC 2.3.2.13) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type. It also reviews key players involved in Protein Glutamine Gamma Glutamyltransferase 2 (Tissue Transglutaminase or Transglutaminase C or Transglutaminase H or Transglutaminase 2 or TGase C or TGase H or TGM2 or EC 2.3.2.13) targeted therapeutics development with respective active and dormant or discontinued projects.

The report is built using data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

**Note:** Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

## SCOPE

The report provides a snapshot of the global therapeutic landscape for Protein Glutamine Gamma Glutamyltransferase 2 (Tissue Transglutaminase or Transglutaminase C or Transglutaminase H or Transglutaminase 2 or TGase C or TGase H or TGM2 or EC 2.3.2.13)

The report reviews Protein Glutamine Gamma Glutamyltransferase 2 (Tissue Transglutaminase or Transglutaminase C or Transglutaminase H or Transglutaminase 2 or TGase C or TGase H or TGM2 or EC 2.3.2.13) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Protein Glutamine Gamma Glutamyltransferase 2 (Tissue Transglutaminase or Transglutaminase C or Transglutaminase H or Transglutaminase 2 or TGase C or TGase H or TGM2 or EC 2.3.2.13) targeted therapeutics and enlists all their major and minor projects

The report assesses Protein Glutamine Gamma Glutamyltransferase 2 (Tissue Transglutaminase or Transglutaminase C or Transglutaminase H or Transglutaminase 2 or TGase C or TGase H or TGM2 or EC 2.3.2.13) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Protein Glutamine Gamma Glutamyltransferase 2 (Tissue Transglutaminase or Transglutaminase C or Transglutaminase H or Transglutaminase 2 or TGase C or TGase H or TGM2 or EC 2.3.2.13) targeted therapeutics

## REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Protein Glutamine Gamma Glutamyltransferase 2 (Tissue Transglutaminase or Transglutaminase C or Transglutaminase H or Transglutaminase 2 or TGase C or TGase H or TGM2 or EC 2.3.2.13)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Protein Glutamine Gamma Glutamyltransferase 2 (Tissue Transglutaminase or Transglutaminase C or Transglutaminase H or Transglutaminase 2 or TGase C or TGase H or TGM2 or EC 2.3.2.13) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

## Contents

Introduction

Global Markets Direct Report Coverage

Protein Glutamine Gamma Glutamyltransferase 2 (Tissue Transglutaminase or Transglutaminase C or Transglutaminase H or Transglutaminase 2 or TGase C or TGase H or TGM2 or EC 2.3.2.13) - Overview

Protein Glutamine Gamma Glutamyltransferase 2 (Tissue Transglutaminase or Transglutaminase C or Transglutaminase H or Transglutaminase 2 or TGase C or TGase H or TGM2 or EC 2.3.2.13) - Therapeutics Development

Products under Development by Stage of Development

Products under Development by Therapy Area

Products under Development by Indication

Products under Development by Companies

Products under Development by Universities/Institutes

Protein Glutamine Gamma Glutamyltransferase 2 (Tissue Transglutaminase or Transglutaminase C or Transglutaminase H or Transglutaminase 2 or TGase C or TGase H or TGM2 or EC 2.3.2.13) - Therapeutics Assessment

Assessment by Mechanism of Action

Assessment by Route of Administration

Assessment by Molecule Type

Protein Glutamine Gamma Glutamyltransferase 2 (Tissue Transglutaminase or Transglutaminase C or Transglutaminase H or Transglutaminase 2 or TGase C or TGase H or TGM2 or EC 2.3.2.13) - Companies Involved in Therapeutics Development

Catabasis Pharmaceuticals Inc

Zedira GmbH

Protein Glutamine Gamma Glutamyltransferase 2 (Tissue Transglutaminase or Transglutaminase C or Transglutaminase H or Transglutaminase 2 or TGase C or TGase H or TGM2 or EC 2.3.2.13) - Drug Profiles
