Abstracts

Resistant *Pseudomonas aeruginosa* Infections Drugs in Development by Stages, Target, MoA, RoA, Molecule Type and Key Players, 2022 Update

SUMMARY

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Resistant *Pseudomonas aeruginosa* Infections – Drugs In Development, 2022, provides an overview of the Resistant *Pseudomonas aeruginosa* Infections (Infectious Disease) pipeline landscape.

Pseudomonas aeruginosa has become an important cause of infection, especially in patients with compromised host defense mechanisms. It has an ability to rapidly develop resistance to multiple classes of antibiotics. It is the most common pathogen isolated from patients who have been hospitalized for more than one week. Signs and symptoms include pneumonia, fever, fatigue, itchy rash, bleeding ulcers and headache. Risk factors include age and weakened immune system.

REPORT HIGHLIGHTS

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Resistant *Pseudomonas aeruginosa* Infections – Drugs In Development, 2022, provides comprehensive information on the therapeutics under development for Resistant *Pseudomonas aeruginosa* Infections (Infectious Disease), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of

the therapeutics, its complete research and development history and latest news and press releases.

The Resistant *Pseudomonas aeruginosa* Infections (Infectious Disease) pipeline guide also reviews of key players involved in therapeutic development for Resistant *Pseudomonas aeruginosa* Infections and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies /Universities /Institutes, the molecules developed by Companies in Pre-Registration, Phase II, Phase I, IND/CTA Filed, Preclinical and Discovery stages are 1, 1, 2, 1, 3 and 3 respectively. Similarly, the Universities portfolio in Preclinical and Discovery stages comprises 1 and 3 molecules, respectively.

Resistant *Pseudomonas aeruginosa* Infections (Infectious Disease) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Note: Certain content / sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The pipeline guide provides a snapshot of the global therapeutic landscape of Resistant *Pseudomonas aeruginosa* Infections (Infectious Disease).

The pipeline guide reviews pipeline therapeutics for Resistant *Pseudomonas aeruginosa* Infections (Infectious Disease) by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products

which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Resistant *Pseudomonas aeruginosa* Infections (Infectious Disease) therapeutics and enlists all their major and minor projects.

The pipeline guide evaluates Resistant *Pseudomonas aeruginosa* Infections (Infectious Disease) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Resistant *Pseudomonas aeruginosa* Infections (Infectious Disease)

REASONS TO BUY

Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

Find and recognize significant and varied types of therapeutics under development for Resistant *Pseudomonas aeruginosa* Infections (Infectious Disease).

Classify potential new clients or partners in the target demographic.

Develop tactical initiatives by understanding the focus areas of leading companies.

Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.

Formulate corrective measures for pipeline projects by understanding Resistant

Pseudomonas aeruginosa Infections (Infectious Disease) pipeline depth and focus of Indication therapeutics.

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope.

Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.

Contents

- Introduction
- Global Markets Direct Report Coverage
- Resistant *Pseudomonas aeruginosa* Infections – Overview
- Resistant *Pseudomonas aeruginosa* Infections – Therapeutics Development
- Pipeline Overview
- Pipeline by Companies
- Pipeline by Universities/Institutes
- Products under Development by Companies
- Products under Development by Universities/Institutes
- Resistant *Pseudomonas aeruginosa* Infections – Therapeutics Assessment
- Assessment by Target
- Assessment by Mechanism of Action
- Assessment by Route of Administration
- Assessment by Molecule Type
- Resistant *Pseudomonas aeruginosa* Infections – Companies Involved in Therapeutics Development
- Resistant *Pseudomonas aeruginosa* Infections – Drug Profiles
- Resistant *Pseudomonas aeruginosa* Infections – Dormant Projects
- Resistant *Pseudomonas aeruginosa* Infections – Product Development Milestones
- Featured News & Press Releases
- Appendix
- Methodology
- Coverage
- Secondary Research
- Primary Research
