## Abstracts

Rotavirus Infections - Pipeline Review, H1 2020

### SUMMARY

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Rotavirus Infections - Pipeline Review, H1 2020, provides an overview of the Rotavirus Infections (Infectious Disease) pipeline landscape.

Rotavirus is a virus that infects the bowels. Rotavirus is the most common cause of severe diarrhea among infants and children. Transmission of rotavirus most often occurs through fecal-oral contact. Usually, this occurs from poor hand washing or from ingestion of contaminated food or water. The virus may also be transmitted through the respiratory tract or by other body fluids, but these routes are less common. The virus may live on inanimate surfaces, such as doorknobs, toys, and hard surfaces. Symptoms may include severe diarrhea, vomiting, fever, and dehydration.

### REPORT HIGHLIGHTS

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Rotavirus Infections - Pipeline Review, H1 2020, provides comprehensive information on the therapeutics under development for Rotavirus Infections (Infectious Disease), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Rotavirus Infections (Infectious Disease) pipeline guide also reviews of key players involved in therapeutic development for Rotavirus Infections and features dormant and

discontinued projects. The guide covers therapeutics under Development by Companies/Universities/Institutes, the molecules developed by Companies in Pre-Registration, Phase III, Phase II, Phase I, Preclinical and Discovery stages are 1, 2, 2, 1, 5 and 1 respectively. Similarly, the Universities portfolio in Phase III, Phase II, Preclinical, Discovery and Unknown stages comprises 1, 3, 1, 1 and 1 molecules, respectively.

Rotavirus Infections (Infectious Disease) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

**Note:** Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

## SCOPE

The pipeline guide provides a snapshot of the global therapeutic landscape of Rotavirus Infections (Infectious Disease).

The pipeline guide reviews pipeline therapeutics for Rotavirus Infections (Infectious Disease) by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Rotavirus Infections (Infectious Disease) therapeutics and enlists all their major and minor projects.

The pipeline guide evaluates Rotavirus Infections (Infectious Disease) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Rotavirus Infections (Infectious Disease)

## **REASONS TO BUY**

Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

Find and recognize significant and varied types of therapeutics under development for Rotavirus Infections (Infectious Disease).

Classify potential new clients or partners in the target demographic.

Develop tactical initiatives by understanding the focus areas of leading companies.

Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.

Formulate corrective measures for pipeline projects by understanding Rotavirus Infections (Infectious Disease) pipeline depth and focus of Indication therapeutics.

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope.

Adjust the therapeutic portfolio by recognizing discontinued projects and

understand from the know-how what drove them from pipeline.

## Contents

Introduction

Global Markets Direct Report Coverage

Rotavirus Infections - Overview

Rotavirus Infections - Therapeutics Development

Pipeline Overview

Pipeline by Companies

Pipeline by Universities/Institutes

Products under Development by Companies

Products under Development by Universities/Institutes

Rotavirus Infections - Therapeutics Assessment

Assessment by Target

Assessment by Mechanism of Action

Assessment by Route of Administration

Assessment by Molecule Type

Rotavirus Infections - Companies Involved in Therapeutics Development

Aridis Pharmaceuticals Inc

Beijing Minhai Biotechnology Co Ltd

Bharat Biotech Ltd

Chongqing Zhifei Biological Products Co Ltd

GlaxoSmithKline Plc

Hilleman Laboratories Pvt Ltd

Medicago Inc

Micron Biomedical Inc

Pfizer Inc

Serum Institute of India Ltd

UMN Pharma Inc

Yisheng Biopharma Co Ltd

Rotavirus Infections - Drug Profiles

(diphtheria + Haemophilus influenza [serotype B] + hepatitis B + pertussis

(acellular, adsorbed) + rotavirus + tetanus) vaccine - Drug Profile
