Abstracts

Soluble Guanylate Cyclase (sGC or EC 4.6.1.2) Drugs in Development by Stages, Target, MoA, RoA, Molecule Type and Key Players, 2022 Update

SUMMARY

Soluble Guanylate Cyclase (sGC or EC 4.6.1.2) - Soluble guanylyl cyclase (sGC) is the known receptor for nitric oxide. Binding of nitric oxide to the heme moiety of the cyclase induces its capacity to synthesize the second messenger cGMP. Although the changes in the state of the heme moiety upon exposure of enzyme to NO and its correlation to the stimulation of sGC catalytic activity.

Soluble Guanylate Cyclase (sGC or EC 4.6.1.2) pipeline Target constitutes close to 31 molecules. Out of which approximately 28 molecules are developed by companies and remaining by the universities/institutes. The molecules developed by companies in Phase III, Phase II, Phase I and Preclinical stages are 4, 5, 6 and 13 respectively. Similarly, the universities portfolio in Preclinical and Discovery stages comprises 2 and 1 molecules, respectively. Report covers products from therapy areas Cardiovascular, Ophthalmology, Metabolic Disorders, Genito Urinary System And Sex Hormones, Infectious Disease, Oncology, Gastrointestinal, Respiratory, Central Nervous System, Hematological Disorders, Dermatology, Immunology and Musculoskeletal Disorders which include indications Glaucoma, Pulmonary Arterial Hypertension, Chronic Kidney Disease (Chronic Renal Failure), Coronavirus Disease 2019 (COVID-19), Chronic Thromboembolic Pulmonary Hypertension, Diabetic Nephropathy, Hypertension, Neuroinflammation, Ocular Hypertension, Pulmonary Hypertension, Sickle Cell Disease With Vaso-Occlusive Crisis, Acute Heart Failure, Acute Respiratory Distress Syndrome,

Alzheimer's Disease, Asthma, Brain Cancer, Chronic Obstructive Pulmonary Disease (COPD), Cirrhosis, Cognitive Impairment Associated With Schizophrenia (CIAS), Colorectal Cancer, Critical Limb Ischemia, Diabetic Foot Ulcers, Diabetic Retinopathy, Diastolic Heart Failure, Dry (Atrophic) Macular Degeneration, Idiopathic Pulmonary Fibrosis, Idiopathic Pulmonary Hypertension, Inflammatory Bowel Disease, Ischemic Stroke, Kidney Disease (Nephropathy), Liver Fibrosis, MELAS Syndrome (Mitochondrial Encephalomyopathy, Lactic Acidosis and Stroke-Like Episodes), Mitochondrial Diseases, Mycobacterium Infections, Non-Alcoholic Steatohepatitis (NASH), Non-Proliferative Diabetic Retinopathy (NPDR), Open-Angle Glaucoma, Osteoporosis, Pancreatic Cancer, Peripheral Arterial Disease (PAD)/Peripheral Vascular Disease (PVD), Pneumonia, Portal Hypertension, Pressure Ulcers, Prostate Cancer, Raynauds Disease, Schizophrenia, Skin Ulcers, Stable Angina, Stroke, Systemic Sclerosis (Scleroderma), Triple-Negative Breast Cancer (TNBC), Unspecified Cardiovascular Disorders and Vascular Dementias.

The latest report Soluble Guanylate Cyclase - Drugs In Development, 2022, outlays comprehensive information on the Soluble Guanylate Cyclase (sGC or EC 4.6.1.2) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type. It also reviews key players involved in Soluble Guanylate Cyclase (sGC or EC 4.6.1.2) targeted therapeutics development with respective active and dormant or discontinued projects.

The report is built using data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Soluble Guanylate Cyclase (sGC or EC 4.6.1.2)

The report reviews Soluble Guanylate Cyclase (sGC or EC 4.6.1.2) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific

sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Soluble Guanylate Cyclase (sGC or EC 4.6.1.2) targeted therapeutics and enlists all their major and minor projects

The report assesses Soluble Guanylate Cyclase (sGC or EC 4.6.1.2) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Soluble Guanylate Cyclase (sGC or EC 4.6.1.2) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Soluble Guanylate Cyclase (sGC or EC 4.6.1.2) Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Soluble Guanylate Cyclase (sGC or EC 4.6.1.2) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Soluble Guanylate Cyclase (sGC or EC 4.6.1.2) - Dormant Products

Soluble Guanylate Cyclase (sGC or EC 4.6.1.2) - Discontinued Products

Soluble Guanylate Cyclase (sGC or EC 4.6.1.2) - Product Development Milestones Featured News & Press Releases

Oct 06, 2022: Cyclerion announces mitochondrial disease-focused corporate strategy

Sep 29, 2022: Bayer launches vericiguat (Verquvo) in India, the first novel treatment approved to reduce the risk of cardiovascular deaths and repeated hospitalizations

Sep 19, 2022: Nicox announces last patients complete final visit in NCX 470 phase 3 Mont Blanc glaucoma trial

Jul 28, 2022: Cyclerion Therapeutics announces positive topline clinical data for CY6463 in patients with Cognitive Impairment Associated with Schizophrenia (CIAS)

Jul 07, 2022: Nicox announces publication of NCX 470 results demonstrating improvements to ocular hemodynamics and retinal cell physiology

Jun 28, 2022: Cyclerion Therapeutics provides additional positive CY6463 MELAS clinical data at a webina hosted by United Mitochondrial Disease Foundation

Jun 22, 2022: Cyclerion Therapeutics to discuss CY6463 MELAS Clinical Data at a Webinar Hosted by United Mitochondrial Disease Foundation

Jun 17, 2022: Cyclerion Therapeutics announces CY6463 data demonstrating improved cellular energetics in preclinical models of mitochondrial disease

Jun 10, 2022: Cyclerion Therapeutics announces positive topline clinical data for CY6463 in MELAS Patients at UMDF Mitochondrial Medicine 2022 Symposium

Jun 06, 2022: Cyclerion Therapeutics to share CY6463 MELAS topline study results, CHOP to present CY6463 preclinical data at UMDF Mitochondrial Medicine 2022 Symposium

Jun 03, 2022: Nicox accelerates topline results from NCX 470 Mont Blanc phase 3 glaucoma trial to November 2022

May 19, 2022: Verquvo (vericiguat) approved in China to treat patients with chronic heart failure and reduced ejection fraction

May 17, 2022: New therapeutic option to reduce risk of cardiovascular deaths and repeated hospitalizations among adult heart failure patients approved in Singapore

May 04, 2022: Cyclerion announces CY6463 clinical pipeline progress

May 02, 2022: Nicox at ARVO 2022: Presentation of new non-clinical evidence of improved hemodynamic and retinal cell physiology on NCX
