Somatostatin Receptor Type 2 (SRIF1 or SSTR2) - Pipeline Review, H1 2018

SUMMARY

Somatostatin Receptor Type 2 (SRIF1 or SSTR2) - Somatostatin receptor type 2 is a protein that encoded by the SSTR2 gene. Somatostatin acts at many sites to inhibit the release of many hormones and other secretory proteins. SSTR2 is expressed in highest levels in cerebrum and kidney.

Somatostatin Receptor Type 2 (SRIF1 or SSTR2) pipeline Target constitutes close to 13 molecules. Out of which approximately 12 molecules are developed by companies and remaining by the universities/institutes. The molecules developed by companies in Phase III, Phase II, Phase I, Preclinical and Discovery stages are 1, 2, 1, 4 and 4 respectively.

Similarly, the universities portfolio in Phase II stages comprises 1 molecules, respectively. Report covers products from therapy areas Hormonal Disorders, Metabolic Disorders, Oncology, Central Nervous System, Gastrointestinal, Genetic Disorders, Ophthalmology and Women's Health which include indications Acromegaly, Neuroendocrine Tumors, Diabetic Retinopathy, Pituitary ACTH Hypersecretion (Cushing Disease), Age Related Macular Degeneration, Chronic Pain, Gastric Motility Disorder, Gastrointestinal Tumor, Hypoglycemia, Ileus (Intestinal Obstruction), Medulloblastoma, Meningioma, Neuroblastoma, Neuropathic Pain, Pancreatic Tumor, Pituitary Tumor, Polycystic Kidney Disease, Type 2 Diabetes and Women Infertility.

The latest report Somatostatin Receptor Type 2 (SRIF1 or SSTR2) - Pipeline Review,

H1 2018, outlays comprehensive information on the Somatostatin Receptor Type 2 (SRIF1 or SSTR2) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type.

It also reviews key players involved in Somatostatin Receptor Type 2 (SRIF1 or SSTR2) targeted therapeutics development with respective active and dormant or discontinued projects.

The report is built using data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Somatostatin Receptor Type 2 (SRIF1 or SSTR2)

The report reviews Somatostatin Receptor Type 2 (SRIF1 or SSTR2) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Somatostatin Receptor Type 2 (SRIF1 or SSTR2) targeted therapeutics and enlists all their major and minor projects

The report assesses Somatostatin Receptor Type 2 (SRIF1 or SSTR2) targeted

therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Somatostatin Receptor Type 2 (SRIF1 or SSTR2) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Somatostatin Receptor Type 2 (SRIF1 or SSTR2)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Somatostatin Receptor Type 2 (SRIF1 or SSTR2) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and @Scope
