Systemic Sclerosis (Scleroderma) Drugs in Development by Stages, Target, MoA, RoA, Molecule Type and Key Players, 2022 Update

SUMMARY

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Systemic Sclerosis (Scleroderma) - Drugs in Development by Stages, Target, MoA, RoA, Molecule Type and Key Players, 2022 Update, provides an overview of the Systemic Sclerosis (Scleroderma) (Immunology) pipeline landscape.

Scleroderma is a group of rare diseases that involve the hardening and tightening of the skin and connective tissues. Symptoms include muscle pains, joint pain and swelling, ulcers occurring on fingertips, bloating of the tummy and diarrhea or constipation. Treatment includes antibiotic, pain relievers and immunosuppressant.

REPORT HIGHLIGHTS

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Systemic Sclerosis (Scleroderma) - Drugs in Development by Stages, Target, MoA, RoA, Molecule Type and Key Players, 2022 Update, provides comprehensive information on the therapeutics under development for Systemic Sclerosis (Scleroderma) (Immunology), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Systemic Sclerosis (Scleroderma) (Immunology) pipeline guide also reviews of key players involved in therapeutic development for Systemic Sclerosis (Scleroderma) and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies /Universities /Institutes, the molecules developed by Companies in Pre-Registration, Phase III, Phase II, Phase I, Phase 0, IND/CTA Filed, Preclinical and Discovery stages are 1, 6, 23, 15, 1, 2, 42 and 5 respectively. Similarly, the Universities portfolio in Preclinical and Discovery stages comprises 4 and 1 molecules, respectively.

Systemic Sclerosis (Scleroderma) (Immunology) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Note: Certain content / sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The pipeline guide provides a snapshot of the global therapeutic landscape of Systemic Sclerosis (Scleroderma) (Immunology).

The pipeline guide reviews pipeline therapeutics for Systemic Sclerosis (Scleroderma) (Immunology) by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Systemic Sclerosis (Scleroderma) (Immunology) therapeutics and enlists all their major and minor projects.

The pipeline guide evaluates Systemic Sclerosis (Scleroderma) (Immunology) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Systemic Sclerosis (Scleroderma) (Immunology)

REASONS TO BUY

Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

Find and recognize significant and varied types of therapeutics under development for Systemic Sclerosis (Scleroderma) (Immunology).

Classify potential new clients or partners in the target demographic.

Develop tactical initiatives by understanding the focus areas of leading companies.

Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.

Formulate corrective measures for pipeline projects by understanding Systemic Sclerosis (Scleroderma) (Immunology) pipeline depth and focus of Indication therapeutics.

Develop and design in-licensing and out-licensing strategies by identifying

prospective partners with the most attractive projects to enhance and expand business potential and scope.

Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.

Systemic Sclerosis (Scleroderma) - Companies Involved in Therapeutics Development

Systemic Sclerosis (Scleroderma) - Drug Profiles

Mar 14, 2022: Chemomab reports on two scientific presentations that support the potential therapeutic utility of CM-101 in Systemic Sclerosis

Mar 01, 2022: Cantargia reports positive preclinical efficacy data for CAN10 demonstrating anti-fibrotic and anti-inflammatory effects in systemic sclerosis

Dec 15, 2021: Kyowa Kirin announces application for partial change of approved indication of LUMICEF for Systemic Sclerosis in Japan

Dec 13, 2021: Cantargia reports positive results for CAN10 antibody in preclinical systemic sclerosis model

Dec 07, 2021: Prometheus Biosciences reports positive topline phase 1 data on lead therapeutic candidate PRA023; expands indications to include Systemic Sclerosis-Associated Interstitial Lung Disease (SSc-ILD)

Dec 02, 2021: Emerald Health Pharmaceuticals' novel drug candidate demonstrates significant anti-inflammatory and anti-fibrotic activity in multi-organ fibrosis preclinical model

Nov 08, 2021: Cantargia reports progress in manufacturing process development and provides update on clinical trial preparations for CAN10

Oct 14, 2021: Blade Therapeutics announces FDA orphan drug designation granted to Cudetaxestat for treatment of systemic sclerosis

Jun 14, 2021: Gesynta Pharma announces significant progress across development program for first-in-class drug candidate GS-248

May 24, 2021: Daewoong Pharmaceutical's fibrosis drug 'DWN12088' additionally

designated as an orphan drug by the US FDA

Apr 01, 2021: Kadmon doses first patient in open-label phase 2 clinical trial of Belumosudil in systemic sclerosis

Mar 31, 2021: Phase-2 clinical trial of MT-7117 initiated in the U.S., Canada, and Europe for the rare disease, diffuse cutaneous systemic sclerosis (dcSSc)

Mar 19, 2021: Cantargia reports positive preclinical safety and efficacy results in the CAN10 project

Mar 11, 2021: Vicore Pharma's drug candidate C21 dilates peripheral resistance vessels in fibrotic disease

Mar 04, 2021: Genentech's Actemra becomes the first biologic therapy approved by the FDA for slowing the rate of decline in pulmonary function in adults With systemic sclerosis-associated interstitial lung disease, a rare, debilitating condition
