Abstracts

T Cell Surface Glycoprotein CD4 (T Cell Surface Antigen T4/Leu 3 or CD4) - Pipeline Review, H1 2018

SUMMARY

T Cell Surface Glycoprotein CD4 (T Cell Surface Antigen T4/Leu 3 or CD4) pipeline Target constitutes close to 19 molecules. Out of which approximately 12 molecules are developed by companies and remaining by the universities/institutes. The latest report T Cell Surface Glycoprotein CD4 - Pipeline Review, H1 2018, outlays comprehensive information on the T Cell Surface Glycoprotein CD4 (T Cell Surface Antigen T4/Leu 3 or CD4) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type.

T Cell Surface Glycoprotein CD4 (T Cell Surface Antigen T4/Leu 3 or CD4) - CD4 is a glycoprotein found on the surface of immune cells such as T helper cells, monocytes, macrophages, and dendritic cells. It regulates T-cell activation. It induces the aggregation of lipid rafts. It acts as a receptor for human immunodeficiency virus-1, human Herpes virus 7/HHV-7. It is down regulated by HIV-1 Vpu.

The molecules developed by companies in Phase III, Phase II, Preclinical and Discovery stages are 1, 2, 7 and 2 respectively. Similarly, the universities portfolio in Preclinical and Discovery stages comprises 3 and 4 molecules, respectively. Report covers products from therapy areas Infectious Disease, Immunology, Cardiovascular and Central Nervous System which include indications Human Immunodeficiency Virus (HIV) Infections (AIDS), Autoimmune Disorders, Encephalitis, Graft Versus Host

Disease (GVHD), Influenza A Virus, H5N1 Subtype Infections, Malaria, Myocarditis, Severe Acute Respiratory Syndrome (SARS), Simplexvirus (HSV) Infections, Smallpox, Systemic Lupus Erythematosus and West Nile Virus Infections.

Furthermore, this report also reviews key players involved in T Cell Surface Glycoprotein CD4 (T Cell Surface Antigen T4/Leu 3 or CD4) targeted therapeutics development with respective active and dormant or discontinued projects. Driven by data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for T Cell Surface Glycoprotein CD4 (T Cell Surface Antigen T4/Leu 3 or CD4)

The report reviews T Cell Surface Glycoprotein CD4 (T Cell Surface Antigen T4/Leu 3 or CD4) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in T Cell Surface Glycoprotein CD4 (T Cell Surface Antigen T4/Leu 3 or CD4) targeted therapeutics and enlists all their major and minor projects

The report assesses T Cell Surface Glycoprotein CD4 (T Cell Surface Antigen T4/Leu 3 or CD4) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to T Cell Surface Glycoprotein CD4 (T Cell Surface Antigen T4/Leu 3 or CD4) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for T Cell Surface Glycoprotein CD4 (T Cell Surface Antigen T4/Leu 3 or CD4)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding T Cell Surface Glycoprotein CD4 (T Cell Surface Antigen T4/Leu 3 or CD4) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Contents

Introduction

Global Markets Direct Report Coverage

T Cell Surface Glycoprotein CD4 (T Cell Surface Antigen T4/Leu 3 or CD4) - Overview

T Cell Surface Glycoprotein CD4 (T Cell Surface Antigen T4/Leu 3 or CD4) -
