Abstracts

Tetanus - Pipeline Review, H2 2020

SUMMARY

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Tetanus - Pipeline Review, H2 2020, provides an overview of the Tetanus (Infectious Disease) pipeline landscape.

Tetanus is a serious illness caused by Clostridium bacteria. Signs and symptoms of tetanus include spasms and stiffness in jaw muscles, difficulty swallowing, stiffness of abdominal muscles, fever, sweating, elevated blood pressure and rapid heart rate. The predisposing factors include burns, surgical wounds, ear infections, swelling around the injury and infected foot ulcers. Treatment includes antibiotics, sedatives and beta blockers.

REPORT HIGHLIGHTS

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Tetanus - Pipeline Review, H2 2020, provides comprehensive information on the therapeutics under development for Tetanus (Infectious Disease), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Tetanus (Infectious Disease) pipeline guide also reviews of key players involved in therapeutic development for Tetanus and features dormant and discontinued projects.

The guide covers therapeutics under Development by Companies/Universities/Institutes, the molecules developed by Companies in Pre-Registration, Phase III, Phase II, Phase I, IND/CTA Filed, Preclinical, Discovery and

Unknown stages are 2, 9, 7, 9, 1, 9, 1 and 1 respectively. Similarly, the Universities portfolio in Phase II and Discovery stages comprises 1 and 1 molecules, respectively.

Tetanus (Infectious Disease) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Note:

Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The pipeline guide provides a snapshot of the global therapeutic landscape of Tetanus (Infectious Disease).

The pipeline guide reviews pipeline therapeutics for Tetanus (Infectious Disease) by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Tetanus (Infectious Disease) therapeutics and enlists all their major and minor projects.

The pipeline guide evaluates Tetanus (Infectious Disease) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Tetanus (Infectious Disease)

REASONS TO BUY

Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

Find and recognize significant and varied types of therapeutics under development for Tetanus (Infectious Disease).

Classify potential new clients or partners in the target demographic.

Develop tactical initiatives by understanding the focus areas of leading companies.

Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.

Formulate corrective measures for pipeline projects by understanding Tetanus (Infectious Disease) pipeline depth and focus of Indication therapeutics.

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope.

Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.

Contents

Featured News & Press Releases

Jan 14, 2019: FDA approves expanded use of Adacel (Tdap) vaccine for repeat vaccination

Aug 02, 2016: CanSino submits a clinical trial application for the component DTP diphtheria tetanus pertussis combo vaccine (adults, teenagers and children above 6 years Old)

Sep 01, 2015: Commercialisation of a world changing invention for the stabilisation and delivery of vaccines

Nov 24, 2014: CanSinotech submitted CTA of "Diphtheria and Tetanus Toxoids and Component Pertussis Vaccine Adsorbed" to CFDA

Apr 01, 2014: Sanofi Pasteur Announces FDA Has Expanded Age Indication of Adacel® Tdap Vaccine to Include Persons 10 Years of Age

Jul 25, 2005: Sanofi pasteur Begins Shipping ADACEL Vaccine in the U.S. for Combined Protection against Tetanus, Diphtheria, and Pertussis

Jun 13, 2005: U.S. FDA Licenses sanofi pasteur's ADACEL Vaccine for Combined Protection Against Tetanus, Diphtheria and Pertussis

Jun 10, 2005: Society for Adolescent Medicine Statement on the FDA Licensure of Adacel Vaccine

Mar 18, 2005: FDA Advisory Panel Recommends Licensure of sanofi pasteur's ADACEL Vaccine for Combined Protection against Tetanus, Diphtheria and Pertussis

Aug 11, 2004: Aventis Submits Application for FDA Licensure of ADACEL Vaccine for Prevention of Tetanus, Diphtheria and Pertussis in Adolescents and Adults.
